

ASSOCIATE OF SCIENCE DEGREE PROGRAM

# Equine Studies

The mission of NHSC's Equine Studies Program is to provide students with a realistic venue for pursuing their passion for horses. The program is designed to increase knowledge of the science, behavior, care and management of horses, to expand awareness of the equine industry well above that of the average horse person and to understand the importance of horses in Native culture. NHSC's experiential approach and broad-based curriculum allows graduates to pursue a wide range of equine-related professions.

Students in the Equine Studies Program have optional electives that emphasize equine-assisted learning or natural horsemanship. If you are interested in earning a bachelor's degree in equine science from another university, you are encouraged to take electives while earning an associate's degree.

Career paths available with an associate's degree in equine studies include:

- Animal control officer
- Artificial inseminator
- Barn hand
- Barn /stable manager
- Bloodstock agent
- Breeding manager
- Broodmare manager
- Clinician
