RE: Campus COVID Update – Fall 2021

Good morning Campus Community -

As summer comes to a close and the Fall semester is upon us, NHS College will continue to observe safety protocols related to COVID.

- Face masks are mandatory in common areas on campus, and entrance/check in at Door C will be necessary for the foreseeable future. **One exception will be during Registration Week (August 16 – 20), when we will use Door G as an entrance for visitors to campus.**
- Students and visitors are advised that while children are welcome as visitors, given the recent rise in COVID cases on Fort Berthold for their own safety and that of the campus community, we ask that children only be on campus when absolutely necessary.
- Team and campus community members will observe the standard safety procedures of hand washing, sanitizing, and social distancing as the circumstances allow. For in person classes, please observe social distancing and respect the space of your classmates and instructors.
- We STRONGLY ENCOURAGE all team members to get vaccinated at no cost to you, via Elbowoods Memorial Health Center vaccination clinics which are held regularly in various segments. Students are also HIGHLY encouraged to do so as well.

We look forward to a safe and productive school year this year. Welcome back to campus! Let's do all we can to keep each other safe.

Sincerely,

Twyla Baker, Ph.D.
