HISTORY

The Nueta Hidatsa Sahnish College (NHSC) is tribally chartered by the Three Affiliated Tribes of the Fort Berthold Reservation headquarters at New Town, North Dakota. NHSC is tribally controlled by a Board of Directors, which consist of seven-members appointed by the six segment council members and one tribal chairperson. Originally named Fort Berthold Community College, it was founded May 2, 1973, as the agency responsible for higher education on the Fort Berthold Reservation. On March 27, 2015 the Three Affiliated Tribes Business Council signed a resolution changing the name of the college to Nueta Hidatsa Sahnish College.

The Three Affiliated Tribes endorsed the concept that a locally based higher education institution was needed to train Tribal members and to act as a positive influence in retaining the Tribal cultures. A steering committee was appointed to oversee the initial operations of the College. This committee was replaced by the selection of a Board of Directors in 1974.

The first classes offered at NHSC were on an extension basis with coordinating accredited institutions. The articulation agreements made in the beginning were with University of Mary, Bismarck, ND; Minot State College, Minot, ND; and the University of North Dakota, Williston Center, Williston, ND. The College proceeded to develop long-range planning models. This planning resulted in the development of a framework for carrying out the mission and goals of the College, and also in the improvement of the educational and vocational services in the communities throughout the Reservation.

Nueta Hidatsa Sahnish College was granted accreditation on February 12, 1988, through the North Central Association of Schools and Colleges. On July 12, 2006, Nueta Hidatsa Sahnish College was granted continued 10-year accreditation through The Higher Learning

Commission (HLC). The College is one of thirty-four tribal colleges granted 1994 Land Grant Institution status and is also a member of the American Indian Higher Education Consortium (AIHEC). On February 25, 2011, HLC's Institutional Actions Council (IAC) voted to extend the College's Accreditation to include Bachelor of Science Degrees in Elementary Education and Environmental Science, and the Bachelor of Arts in Native American Studies, enabling students to earn four-year degrees at their home college on Fort Berthold Reservation.

NHSC continues to strive to meet its mission of providing quality cultural, academic and vocational education and services to the Mandan, Hidatsa, and Arikara Nation.

MISSION

A unique educational community founded in culture and spirituality that nurtures holistic student success.

VISION

Nueta Hidatsa Sahnish College: Integrates dynamic, cultural principles to honor the past, for those living in the present and shaping the future.

PHILOSOPHY

We believe that Nueta Hidatsa Sahnish College seeks to:

Enhance the quality of life for the Mandan, Hidatsa and Arikara Nation

- Offers opportunities for improvement of our economic well-being and quality of life.

-
- Initiates and implements new or innovative ideas for the benefit of the Tribe, including leadership and training.

Build a positive strong identity of the Three Affiliated Tribes

- A builder of people and communities of the Mandan, Hidatsa and Arikara Nation
- Integrates Three Affiliated Tribes culture, traditions and language, in all academic and social activities empowering the people.
- A place where all people come first for their educational needs.

Ensure development of global citizenship by providing necessary training and leadership

- Utilize the art of technology to deliver courses.
- Prepare globally to address the impact of other cultures, economies, environments, and actions.
- Develop and utilize the existing resources for the further development of the staff/faculty and Board of Directors.

Develop a financially strong institution, which meets the needs of the students by providing a safe learning environment, which promotes diversity and relevant curriculum/programs.

- Provide a caring and nurturing atmosphere, which meets the needs of all the students.
- Utilize multiple teaching methods and techniques for a variety of learning styles.
- Offer self-improvement opportunities while maintaining the culture of the Mandan, Hidatsa and Arikara Nation.
- Select and develop a faculty who believe in the vision and mission of the College.
- Provide continuous assessment of
 - Teaching methods
 - Curriculum

- Community needs and trends to determine course and program offerings, recreation, sports, childcare, student housing.
 - Encourage the need to voice informed opinions to make positive change.
 - Become a leader among tribally controlled colleges, providing the highest quality of culture, academic, and student services.

ACADEMIC FREEDOM

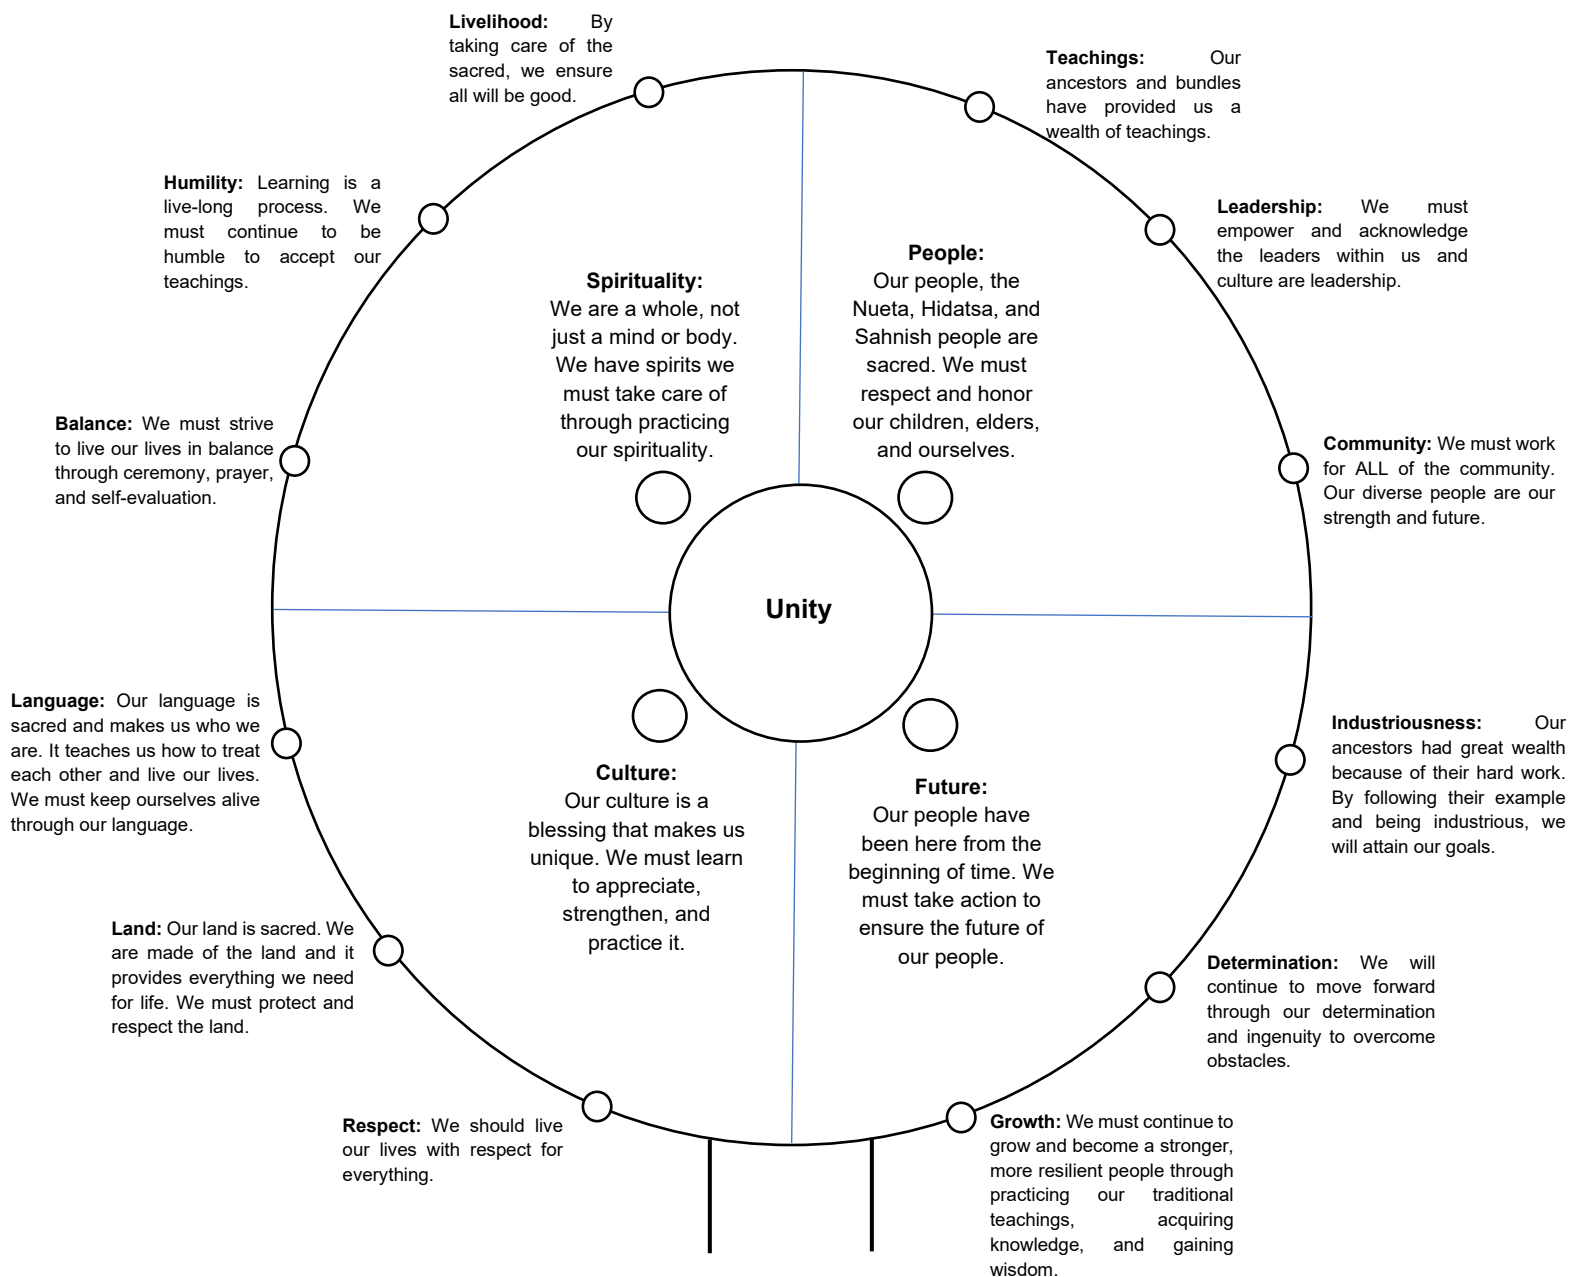

Nueta Hidatsa Sahnish College is committed to intellectual thought and pursuit. The college encourages faculty to introduce students to broad and diverse points of view and research. As part of the college's Native American tradition, it is recognized certain tenets will be expressed as part of the curriculum and are acceptable whenever applicable. At all times, faculty members should exercise sound judgment, respect the rights of others to express ideas and opinions and ensure that the same freedom be extended to students and colleagues.

VALUES

Honesty
Respect
Responsibility
Tenacity
Curiosity
Being a Good Relative
Innovation

EARTH LODGE VALUES

The Nueta Hidatsa Sahnish College's values are illustrated through the earth lodge, which is the common home to the Nueta, Hidatsa, and Sahnish people. Unity, being the key value, is in the center (fire pit), which the rest of the values build around. Spirituality, People, Culture, and Future are the four domains represented by the four main posts. The outer twelve posts represent values within each of the four domains.

Unity:

The Nueta, Hidatsa, and Sahnish people have lived and worked together for over two hundred years. We have worked together harmoniously, peacefully and with friendship. We strive to continue this unity for our future generations.

ADMISSIONS INFORMATION

Please see the Student Handbook for more detailed information.

Nueta Hidatsa Sahnish College subscribes to an Open Enrollment Admissions Policy. Any person who is a graduate of an accredited high school or who has his or her General Education Development (GED®) certificate may be admitted to NHSC. Admission to NHSC does not ensure admittance to any course of study. Some programs have requirements beyond standard college admissions that must be met.

Procedures:

The following items are required for Admissions to NHSC:

- ✓ Online Application for Admissions
- ✓ Official copy of high school transcripts or GED certificate or GED transcript
- ✓ A complete Free Application for Federal Student Aid (FAFSA)
- ✓ Copy of Driver's License or State ID
- ✓ Social Security card
- ✓ All Native American students enrolled in a federally recognized tribe must submit an official verification of tribal enrollment
- ✓ Students must have an official copy of their transcript(s) from previously attended college(s) sent directly to the registrar's office at NHSC
- ✓ Dual credit/Dual Enrollment students must submit the Dual Credit form they receive from their high school for each course
- ✓ Non-US citizens must provide documentation to verify that they are eligible non-citizens
- ✓ Jay Treaty eligible students must provide a copy of their Canadian birth certificate and certification of at least 50% American Indian blood (CIB).

The student is responsible for ensuring all documents are received. A hold will be placed on a student's academic record if all documentation is not in his/her file at the end of the first 6 weeks (about 1 and a half months) of the semester. The student will not be allowed to enroll again until all documentation is submitted. Financial aid may also be delayed if documentation is not submitted before financial aid disbursement.

FINANCIAL AID INFORMATION AND POLICIES

Please see the Student Handbook for more detailed information.

The Nueta Hidatsa Sahnish College Office of Student Financial Aid provides assistance to students in securing adequate resources to attend NHSC. A variety of programs are available.

All students should apply for financial aid. Office hours are 8:00 am-5:00 pm, Monday-Friday. The Financial Aid office is closed for lunch between 12:00 pm-1:00pm. For more information, see: www.fafsa.ed.gov and www.nhsc.edu

Types of Financial Aid Available:

- 477 Demonstration Project
- American Indian College Fund:
www.collegefund.org
- North Dakota Student Financial Assistance Grant (SSIG)
- Three Affiliated Tribes Higher Education Program
- MHA Education
- Three Affiliated Tribes Job Training Partnership Act (477)
- Veteran's Benefits
- Vocational Rehabilitation
- Title IV Funds Earned and Unearned

Other scholarships are available at Nueta Hidatsa Sahnish College. See Financial Aid Director for more information.

STUDENT SERVICES INFORMATION AND POLICIES

Please see the Student Handbook for more detailed information.

Student Services supports the “Open Door” Philosophy at Nueta Hidatsa Sahnish College, by promoting and providing equal access to students, regardless of academic background or experience.

The Function of Students Services is to:

- Promote student success and retention
- Facilitate student learning and development
- Provide student-centered customer friendly services

The Primary Roles of Student Services are:

- Admissions, Registration, Student Records-Registrar, Admissions Clerk
- Student Orientation to NHSC-Student Services Staff
- Financial Aid Services-Financial Aid Director
- Counseling and guidance- Student Development/Retention Counselor
- Student Programs, Clubs, & Activities-Vice President of Student Services and Student Club Advisors
- Academic Assistance- Vice President of Student Services and Peer Tutors
- Mentoring Outreach Programs- Vice President of Student Services and Outreach Mentors at community sites.
- Disabilities coordination-Vice President of Student Services, Student Development/Retention Counselor

The following Student Services topics are addressed in the Student Handbook:

- Equal Opportunity and Non-discrimination
- Disabilities
- Student Rights
- Student Responsibilities
- Code of Conduct
- Student Discipline
- Disciplinary Outcomes
- Appeals
- Grounds of Appeal
- Due Process for Disciplinary
- Due Process in cases of Alleged Academic Dishonesty
- Zero Tolerance for Violence Policy
- Zero Tolerance of Campus Violence
- Incident Response
- Incident Reporting
- Grievance Process
- Disciplinary Outcomes

VETERAN’S BENEFITS

Veterans’ benefits are accessible through our Student Success Coordinator and our Student Success Center in Room 37.

Potential students are provided with a brief explanation about the education benefit programs offered by the Department of Veterans Affairs and Department of Defense.

NHSC provides educational plans for all individuals using federal military and veterans’ educational benefits that detail how those individuals will fulfill all the requirements necessary to graduate and the expected timeline of completion by disclosing general degree requirements* for the service member, family members, and veteran’s educational program (education plan*) to the member and his or her Service.

These requirements, typically articulated in the institution's course catalog, should:

- Include the total number of credits needed for graduation.
- Divide the coursework students must complete in accordance with institutional academic policies into general education, required, and elective courses.
- Articulate any additional departmental or academic requirements, such as satisfying institutional and major field grade point average requirements, a passing grade in any comprehensive exams, or completion of a portfolio or final project.

In addition to providing degree requirements, the institution provides to service members, veterans, and their family members who have previous coursework from other accredited institutions and relevant military training and experiential learning an evaluated educational plan that indicates how many, if any, transfer credits it intends to award and how these transfer credits will be applied toward the student's educational program. The evaluated educational plan* will be provided within 60 days after the individual has selected a degree program and all required official transcripts have been received.

NHS College Policy for the Veterans Benefits and Transition Act of 2018

This policy complies with Title 38 United States Code Section 3679(e) School Compliance Form. This policy pertains to a Covered Individual which is any individual who is entitled to educational assistance under chapter 31, Vocational Rehabilitation and Employment, or chapter 33, Post 9/11 GI Bill benefits.

NHS College will permit any Covered Individual to attend or participate in the course of education during the period beginning on the date on which the individual provides to the educational institution a certificate of eligibility (COE) for entitlement to educational assistance under chapter

31 or 33 (a certificate of eligibility can also include a Statement of Benefits obtained from the Department of Veterans Affairs (VA) website, e-Benefits, or VAF 28-1905 form for chapter 31 authorization purposes) and ending on the earlier of the following dates:

- The date on which payment from VA is made to the institution.
- 90 days after the date, the institution certified tuition and fees after receiving the certificate of eligibility.

NHS College will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds, on any covered individual because of the individual's inability to meet his or her financial obligations to the institution due to the delayed disbursement funding from VA under chapter 31 or 33. The COE or VAF 28-1905 must be presented to the institution no later than the first day of class.

NHS College will not drop any Covered Individual after the business office receives a copy of the VAF-28-1905 or receives a chapter 33 Post 911 Eligibility form from the certifying official who do not have additional charges such as meal plans, or anything above the Tuition and Fees. The Covered Individual must sign the payment plan but will not be dropped if VA covers 100%.

NHS College does not offer loans to students and will not hold a Pell Grant as collateral to any Covered Individual which meets the criteria above, while the institution is awaiting payment by VA. NHS College will disperse Pell Grants with the same schedule as the student population.

If VA does not pay the institution, the student is responsible for all balances resulting from reductions or terminations of the student's enrollment. NHS College certifying officials will certify time periods in accordance with VA Auditors and existing VA policies.

GENERAL EDUCATION DEVELOPMENT (GED)

The Nueta Hidatsa and Sahnish College (NHSC), Adult Basic and Secondary Education and Literacy Education Program offer GED classes in the communities on the Fort Berthold Reservation. Our Adult Learning Centers (ALC) provide services to help students increase their knowledge and improve their skills in Reasoning through Language Arts, Social Studies, Science, and Mathematics.

(GED) General Educational Development Test:

- Reasoning Through Language Arts (155 minutes): 25 min + 45 min extended response, break + 70 min
- Science (90 minutes): 2 short answers, 10 minutes each
- Social Studies (90 minutes): 65 min + 25 min extended response
- Mathematical Reasoning (115 minutes)

Acquiring a GED may take as short as a few weeks or several months; variables include time away from school, availability for classes/studying, attendance, and motivation. The minimum age for enrollment and testing in North Dakota is sixteen (16). Candidates are not required to take any courses or prepare for the GED test. However, candidates may wish to assess their current academic skills or improve skills by attending the Adult Learning Centers, which provide instruction in the four content test areas. Students who have met the eligibility requirements will be awarded a diploma from the Department of Public Instruction when he/she has successfully taken and passed all four (4) GED exams with a minimum standard score of 150. Scores of 170 and above are considered "GED with Honors". A student who meets all the requirements will receive an original diploma and transcript. A duplicate transcript and/or diploma can be requested in writing from the Department

of Public Instruction. There is a processing fee for each transcript and each duplicate diploma.

Why should you take the GED Test? A GED certificate is widely recognized as the equivalent of a high school diploma and can help you in the following ways: Employment, Education, and Personal Development.

For More Information Please Contact:

Betty Lockwood
GED Director
(701) 627-8096

NHS COLLEGE SINGING SPRING LIBRARY

NHSC Singing Spring Library and Learning Resource Center is an integral part of the NHSC educational process. The online catalog and many subscription databases are significant information resources that support student learning and are available through the Library and Learning Resource Center. A prominent feature of the collection is the Native American Studies holdings. The Special Collections contains titles about the Mandan, Hidatsa, and Arikara tribes and a Native literary collection. The Special Collection may only be used on-site.

Services include:

- Research and Information Retrieval Assistance
- Circulation-Online Public Access Computer (OPAC)
- Instruction for Library and Information Resources
- Study Area
- Viewing/Meeting Room
- Interlibrary Loan
- Audio Equipment
- Computer Use
- Internet Evaluation and Search Strategies

Circulating books are loaned for 30 days with a limit of 5 items. Periodicals, Videos/DVDs are loaned for 7 days. **For all other details, please see the Library Policy in the Student Handbook.

Library information services correspond with student learning by assisting the student and faculty to find, retrieve, analyze, and use information.

TECHNOLOGY DEPARTMENT

The Nueta Hidatsa Sahnish College Technology Department offers a wide variety of services to support students, faculty, staff, and community in the daily operational management of the campus information technology infrastructure. Some of the supported areas include Network Accounts, Campus Information Systems, network infrastructure, hardware & software applications, print services, distance education, campus communications, and Internet access.

The Technology Office is where the administrative wing and Hidatsa Hall meet in Room 23. Technology staff are available at the Help Desk Monday through Thursday from 9am-6pm. Friday 9am-5pm. A helpdesk is available via email and phone as well.

Student Accounts

All Students are assigned an NHSC Student Account. This account allows students to log into campus computers, access print services, utilize installed software applications, and access the Internet. This service is governed by the NHSC Acceptable Use Policy and students are required to verify they have read and understand these rules of use. Students are assigned a username and password once they have been accepted by NHSC.

Student E-mail Accounts

All students are assigned an NHSC Student e-mail account once they are accepted at NHSC. NHSC Student e-mail is the official means of communication between the institution and the student. Students should check their e-mail account regularly for school announcements and communications from instructors and staff of the College. Student e-mail is accessed through Office 365 and utilizes the student's username and password. The accounts can be accessed from any computer on or off campus. Student e-mail and Accounts are kept active for one semester after the students' last semester of attendance.

myNHSC Student Accounts

myNHSC is a secure web portal that provides anytime, anywhere online access to a number of administrative, community and academic services such as: admission information, status of application, financial aid, course schedules, registration, degree audits, student grades and transcript requests, campus-wide announcements and calendars, discussion forums, bulletin boards, and online courses. Students are assigned a username & password that is provided at Registration or e-mailed to the students' NHSC e-mail accounts at the end of registration. Students unable to log onto their myNHSC should contact the Technology Office Help Desk at (701) 627-8026.

Laptop College

In 2020, NHS College made the move to a laptop institution. Each student needs to have a laptop to attend NHS College. Students can purchase a laptop through the Technology Department using their book vouchers. Being a laptop college assists students in having needed technology at home and the ability to bring their laptops with them to class to enhance learning.

Campus Computer Labs

If students need to access a computer, there are several locations on campus:

- Student Success Center – Room 37 - Monday – Friday
8 AM to 8 PM

-
- Room 16 – Monday – Friday 8 AM to 8 PM, when classes are not scheduled
 - Singing Springs Library – Monday – Friday 8 AM- 5 PM
 - The Learning Center – Monday – Friday 8 AM – 8PM

Campus Wireless Access

NHSC provides wireless internet access throughout all campus classrooms, offices, and commons areas. Access is free and open to the public. Use of the campus wireless services is governed by the NHSC Acceptable Use Policy.

Connect to: “NHSC Public WIFI”
password: Fall2021!

Campus News & Events System

- The **NHSC Web Site** is a suitable place to start to find information about the college. The web site is located at www.nhsc.edu.
- **myNHSC** contains announcements of interest to students.
- **Emergency Closings** due to weather are aired on KMHA 91.3 FM, shared via email, and the College’s Facebook page.
- **Nueta Hidatsa Sahnish College Facebook/Instagram** provides a virtual social network and informational tool for members. Students who are members of Facebook or Instagram can add NHSC to their profile to receive campus news and events, participate in student discussions, and receive real-time updates to their Facebook/Instagram enabled cell phones.

Distance Education

NHS College offers classes via Asynchronous, Hybrid and Synchronous learning. Asynchronous classes are offered online with no set date or time required to be online. Hybrid and Synchronous classes are offered in both an online or in-person method with a specific date and time for each class.

Classes offered Asynchronously will be listed as “Online” within our Academic Class Schedule. Classes offered

Hybrid and Synchronous will be listed with a specific date, time, and classroom within our Academic Class Schedule. Synchronous classes are also found in the same manner as Hybrid courses.

- **Hybrid and Asynchronous Courses** are accessed through the myNHSC Web Portal available at www.nhsc.edu. Students use their myNHSC account to access their online course content. This service allows students to access courses that are academically challenging and utilize secure web pages & communication tools; such as e-mail, chat, list, discussion boards, etc. to communicate with instructors & other classmates. Students are introduced to myNHSC during Student Orientation and are provided help or support throughout the year by the Technology Department. Students should have a working knowledge of the Internet, know how to use a web browser such as Internet Explorer, and be familiar with Microsoft XP/Vista/Windows 11 or compatible systems. Online courses can be accessed from any computer (With an Internet connection). More information can be found on the NHSC Web Site. For Hybrid courses, Faculty members will teach via Microsoft Teams, in addition to using the myNHSC Web Portal. For Asynchronous courses, Faculty members will teach via the myNHSC Web Portal.

STUDENT CLUBS AND ORGANIZATIONS

The College encourages the development and maintenance of student clubs and organizations. Students are invited to participate in extra-curricular activities on campus.

American Indian Business Leaders (AIBL)

The American Indian Business Leaders (AIBL) gives Business students the opportunity to participate in tribal college competitions which focus on Leadership and Business-related topics.

American Indian Higher Education Consortium (AIHEC)

The American Indian Higher Education Consortium (AIHEC) sponsors student activities which include Student Recognition Awards, Student Congress, Academic Bowl, Business Bowl, Speech/Drama, Math/Science, Art/Poster Contest, and basketball tournaments. The advisors for these clubs are volunteers and are generally faculty members, who have expertise and experience in specific areas.

American Indian Science and Engineering Society Chapter (AISES)

AISES promotes science activities and participates in reservation-wide K-14 science related programs. Students are often able to travel to regional and national AISES Conventions to present their research.

All Chiefs Society

The All-Chiefs Society is a Native American Studies organization dedicated to the preservation of the Mandan, Hidatsa, and Arikara culture, language, and history. The organization also provides leadership, education and research opportunities valuing our traditional way of life. The organization plans cultural events like hand games, powwows, colloquia, elder speakers to relay our oral tradition and more. The All-Chiefs Society is open to students, faculty, NHSC alumni, and Tribal members.

NHSC Horse Nation Student Club

As tribal people, our rich history includes close ties to our relatives, the Horse Nation. Today, while they may not have access to their own horses, many families are interested in continuing or returning to the horse culture way of life.

The NHSC Horse Nation Student Club is for any student who enjoys spending time with and/or learning about horses. The NHSC Horse Nation Student Club is part of the Department of Agriculture and Equine Science's initiative of working with our horse relatives to provide innovative learning, living, and community services. The Horse Nation provides:

- Horse Fun Days and educational opportunities for kids and families
- Special event activities/rides and equine competitions
- Specialty horse care and horsemanship seminars
- Continuing Education horsemanship & wellness courses

Along with all the fun, we know that these opportunities support healthy living through outdoor activities, positive social support, and cultural grounding.

Student Senate

The Student Senate is the student's chief governing body, and all enrolled students are automatically members. The Student Senate organizes various student activities and college events, and it represents the students by giving them a voice to express their concerns and opinions to the faculty and administration. All students are encouraged to take an active role in this organization. Elections are held annually for officers from the membership at large. These offices include Student body President, Vice President, Secretary, Treasurer and Student Representatives from the main campus and the communities. The Student Senate has a budget and a staff advisor.

Criteria for Executive Council: Any student running for election for an officer position (President, Vice President, Treasurer, Secretary) must be a full-time student and must be carrying at least twelve credits. The District Representatives and the Public Relations Person must be at least part-time, carrying at least six credits. All candidates except for the first-year students must maintain the appropriate grade point average of 2.0.

ASSESSMENT OF STUDENT LEARNING

Assessment of Student Learning at NHSC is designed to ensure that each segment of the College contributes in a positive way to the student's learning experience. Nueta Hidatsa Sahnish College believes that:

- Continual assessment and feedback produce an academic environment that enables each student to progress toward his or her potential.
- Nurturing students' human potential is vital to the well-being of the MHA Nation.
- Assessment supports the goal of producing students who can continue their formal education at transfer institutions or excel in their chosen career fields. Assessment also ensures the accountability of the college; validation of student learning likewise validates the expenditure of resources required to provide educational services.

Assessment is not confined to graduates. Upon entry to NHSC, all students who have not previously attended college, or plan to register for Mathematics or English courses, will be tested to determine proficiency in Mathematics, Reading, and Writing. These tests will ensure proper placement of students in these courses, maximizing the likelihood of student success.

It is vital that students give full effort when participating in assessment activities, so the College can document successful learning outcomes. Students should also be aware that some regular class assignments may be used for assessment purposes as well as part of their grade in the class.

Student Learning Assessment is performed on several levels:

Institutional Assessment

Institutional Learning Outcomes (ILOs) are mapped to the general education requirements, each program's core courses and measured implicitly in the General Studies Student Learning Assessment.

The five ILOs are:

1. Students will develop critical thinking skills
2. Students will be able to clearly communicate both orally and in writing
3. Students will effectively utilize quantitative reasoning, scientific methods and technology
4. Students will acquire intellectual concepts and dispositions that enable them to live and contribute as active and successful Tribally educated participants in a diverse and global society
5. Students will receive information and training on emotional, mental, physical, social, and spiritual wellness.

General Education Assessment

General Education at NHSC is measured in several different ways. Students must enroll in two institutional requirement courses: PSY 100: Psychology of Student Success during their first semester, and ASMT 200: Assessment of Student Learning during their final semester and General Education courses are measured as part of the General Studies Program Review.

Programmatic Assessment

Each program has Program Learning Outcomes specific to the curriculum and certificate/degree level. Faculty assess their students in courses taken throughout the curriculum and aggregate the data annually. Program Assessment is demonstrated during annual Program Review and is evaluated by a team of faculty and staff. Programs undergo review every third year.

Course Assessment

Each course at NHSC has course learning outcomes that guide the teaching and learning in the course and align with the Program Learning Outcomes and Institutional Learning Outcomes.

All four levels of outcomes are mapped to make sure that the Institutional Learning Outcomes are embedded into everything from the general education core to the programs to the courses. In addition, the five ILOs are assessed in NHSC's Co-Curricular programs to make sure that the learning that occurs at NHSC is a complete full-circle process.

POLICY AND PROCEDURES FOR REGISTRATION AND ACADEMIC RECORD INFORMATION

FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT OF 1974 (FERPA)

Nueta Hidatsa Sahnish College (NHSC) adheres to a policy of compliance with the Family Educational Rights & Privacy Act (FERPA), also known as the Buckley Amendment, which is defined as:

"A federal law designed to protect the privacy of education records, to establish the right of students to inspect and review their education records, and to provide guidelines for the correction of inaccurate and misleading data through informal and formal hearings."

(FERPA,

<http://www.ed.gov/policy/gen/guid/fpco/ferpa/index.html>).

In compliance with the Family Education Rights and Privacy Act of 1974, students who are or have been in attendance at Nueta Hidatsa Sahnish College have certain rights to request, inspect, review, and challenge the records maintained by the institution under the provisions of the Act. Nueta Hidatsa Sahnish College does

not permit access to or the release of education records or personally identifiable information contained therein (other than directory information) of students **without the student's written consent**, other than to officials of the institutions and those granted access by the Act.

FERPA gives parents certain rights with respect to their children's education records.

These rights transfer to the student when they reach 18 or attend a school beyond the high school level. Students to whom the rights have transferred are "eligible students." However, an educational agency or institution may disclose educational records, or personally identifiable information from educational records, to a parent without the prior written consent of an eligible student if the student is claimed as a dependent for Federal income tax purposes by either parent; the disclosure is in connection with a health or safety emergency described in 34 CFR § 99.36; the disclosure is in regard to the student's violation of a law or policy.

- Parents or eligible students have the right to inspect and review the student's education records maintained by the school. Schools are not required to provide copies of records unless, for reasons such as great distance, it is impossible for parents or eligible students to review the records. Schools may charge a fee for copies.
- Parents or eligible students have the right to request that a school correct their record which they believe to be inaccurate or misleading. If the school decides not to amend the record, the parent or eligible student then has the right to a formal hearing. After the hearing, if the school still decides not to amend the record, the parent or eligible student has the right to place a statement with the record setting forth his or her view about the contested information.
- Generally, schools must have written permission from the parent or eligible student to release any information from a student's education record. However, FERPA allows schools to disclose those

records, without consent, to the following parties or under the following conditions (34 CFR § 99.31):

- School officials with legitimate educational interest; Other schools to which a student is transferring; Specified officials for audit or evaluation purposes;
- Appropriate parties in connection with financial aid to a student; Organizations conducting certain studies for or on behalf of the school;
- Accrediting organizations;
- To comply with a judicial order or lawfully issued subpoena; Appropriate officials in cases of health and safety emergencies; and
- State and local authorities, within a juvenile justice system, pursuant to specific State law.

Unless a student signs a document stating they do not permit the disclosure of their “directory” information, schools may disclose, without consent, “directory” information, such as a student's name, address, telephone number, date and place of birth, honors and awards, and dates of attendance. Disclosure “means to permit access to or the release, transfer, or other communication of personally identifiable information contained in education records by any means, including, oral, written, or electronic means, to any party except that party identified as the party that provided or created the record.” (34 CFR § 99.31) However, schools must tell parents and eligible students about directory information and allow parents and eligible students a reasonable amount of time to request that the school not disclose directory information about them. Schools must notify parents and eligible students annually of their rights under FERPA. The actual means of notification (special letter, inclusion in a PTA bulletin, student handbook, or newspaper article) is left to the discretion of each school.

NHSC encourages students to self-advocate, regarding their academic career and progress.

DIRECTORY INFORMATION

As defined by FERPA, some information, called Directory Information, is not considered harmful if released and is not subject to the above restrictions of public access or release. By FERPA regulations, NHSC may disclose appropriately designated “directory information” without written consent, unless you have advised the College to the contrary in accordance with college procedures. Some ways the College uses the directory information is for a student directory for NHSC employees, honors’ list, graduation lists, photos released to the American Indian Higher Education Consortium and verification of students’ attendance for potential employers or student loans. Nueta Hidatsa Sahnish College has designated the following as directory information:

The student’s name, address, email address, telephone number, residency status, tribal affiliation, major and minor fields of study, class level, enrollment status, effective date of enrollment status, birth date and place, participation in officially recognized activities and athletics, weight/height of member of athletic teams, dates of attendance, degrees, anticipated and actual graduation date, honors and awards received, the most recent educational agency or institution attended, and photographic, video, or electronic images of the student taken and maintained by the institution.

All other information may not be released without written consent of students. Grades, Social Security numbers, ethnic backgrounds and student schedules may not be released to anyone other than the student --- and NEVER over the phone.

Within 14 calendar days after the first day of class, any student at Nueta Hidatsa Sahnish College may inform the

Registrar's office by written request that directory information relating to that student should not be released or appear in the local directory. The restriction will remain in effect unless the student reverses existing directory restrictions by submitting a written request to the Registrar.

For more information, see the bulletin and consult with the Registrar by emailing registrar@nhsc.edu.

Or you may contact us at the following address:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW Washington, D.C. 20202-8520

ACADEMIC ADVISING

NHSC uses a Split Model of advising. Initially, all students, regardless of their program, receive guidance from an Academic Advisor, who assists with degree plans, registration, degree progression, and onboarding topics. Before the students' second semester, students are then advised by a Faculty Advisor specific to their program, who will track their progress until program completion.

ACADEMIC ADVISOR

All new students, transfer students, and readmitted students will be assigned to the Academic Advisor and will be required to meet with this advisor prior to registering for their first semester at NHSC. Students will then be transitioned to their Faculty Advisor before their second semester.

FACULTY ADVISOR

All full-time faculty members within each program serve as Faculty Advisors. Toward the end of their first semester, students will be assigned to a Faculty Advisor in their program. Each program will designate a primary Faculty Advisor responsible for maintaining students' degree plans and tracking their progress. Secondary advisors, who are any faculty member within the program, provide additional guidance on courses, degree progression, career opportunities, and more.

TRANSFER CREDIT POLICY

Students who have attended college elsewhere must notify Nueta Hidatsa Sahnish College (NHS College) of all previous enrollments. Students must have all official transcripts sent as part of their admissions requirements.

Any transfer coursework must meet the same criteria as the courses listed in NHSC Bulletin.

Courses taken at another institution will be evaluated for transfer credit. To be transferred the coursework must meet the following criteria:

- Course was earned at an accredited institution
- It is college-level coursework (minimum of 100-level)
- The student must have received at least a "C" or better in the course for transfer
- The coursework is documented on an official transcript sent to the NHSC Registrar from the institution at which the coursework was completed
- The completed course has sufficiently equivalent content to a course required by NHSC

NHSC's Academic Advisor will determine which credits satisfy specific curriculum requirements within the

student's degree plan. This process may require more information on the course content (course descriptions, syllabi, etc.) when obtainable.

The Academic Advisor will record the transferred courses on the Transcript Evaluation form and submit it to the registrar. Only courses documented on an official transcript will be evaluated.

For a transfer student to receive a degree and/or certificate from NHSC, students must have earned a minimum of half of the 120 credits for the bachelor's degree and half of the 60 credits for the associate degree from NHSC.

As with any other institution of higher education, NHSC reserves the right to determine courses for transfer into the College.

MATH PLACEMENT

An assessment for placement into math courses is required for all new NHSC students, or NHSC students who have never had an evaluation or re-admitted students if they have not completed their math course(s). The placement evaluation ensures that all students take the correct level of math courses required for their program. The results of the placement evaluation or testing do not affect admission to NHSC but are required before registration.

Students will complete a math placement evaluation before registration. Math faculty will score the assessments using a department-created rubric, and the results will determine the appropriate math course placement for each student.

Students are assigned to classes based on the following conditions:

Total is 50 points \Rightarrow 100%

For STEM students

Score $x < 70\%$, \Rightarrow MA 102 Intermediate Algebra with supports

Score $70\% \leq x < 90\%$, \Rightarrow MA 103 College Algebra

Score $x \geq 90\%$, \Rightarrow MA 105 Trigonometry

For non-STEM students

Score $x < 35\%$, \Rightarrow MA 102 with supports

Score $35\% \leq x < 70\%$, \Rightarrow MA 102

Score $x \geq 70\%$, \Rightarrow MA 103 College Algebra

Students who have completed college courses that meet NHSC's math course prerequisites will be placed directly into the appropriate course without additional evaluation. However, transfer courses must be assessed for equivalency to NHSC courses (refer to the Transfer policy). Prerequisite grades must comply with NHSC's policies on prerequisite grades, transfer grades, and specific program requirements.

DECLARATION OF MAJOR

Students must declare a major during registration at NHSC. Only courses taken on the degree plan of that major can be used for computation of financial aid. During registration, students will be assigned an advisor in their area of study. If students wish to change their major, then they must fill out a Change of Major form found in the office of the Registrar.

A student may declare more than one major but is required to satisfy all the requirements for each major. Courses can be used for more than one major. A student must meet with an appropriate advisor to prepare a degree plan for each major. Degrees for each major will be posted separately on the student's transcript.

To receive financial aid, students are considered to have only one major and the courses they take that are

covered by financial aid must be in the degree plan of that particular major. Financial aid will not cover courses in a second degree if the course is not required for the first degree. However, students taking 12 credit hours in their first major can take additional hours in the second major and receive full-time financial aid.

STUDENT CLASSIFICATIONS

The following student classifications for students attending NHSC are applied for Fall or Spring Semester:

- Full-Time Student: 12 credit hours or more
- Three-Fourths ($\frac{3}{4}$) Time Student: 9-11 credit hours
- One-Half ($\frac{1}{2}$) Time Student: 6-8 credit hours
- Less than half time: 1-5 credit hours

The following student classifications for students attending NHSC are applied for Summer Semester:

- Full-time Student: 6 credit hours
- One-Half ($\frac{1}{2}$) Time Student: 3 credit hours

To see a more detailed breakdown of student classifications, please refer to the student handbook p. 16-17.

GRADUATION REQUIREMENTS

To graduate with a Bachelor of Arts Degree, Bachelor of Science Degree, Associate of Arts Degree, Associate of Science Degree, Associate of Applied Science Degree, or Vocational Certificate from the Nueta Hidatsa Sahnish College, candidates must:

1. Complete all general education and core professional requirements, or certificate requirements of the program in which enrolled.
2. Be enrolled at NHSC during their last academic term, except where the final term is completed

elsewhere as part of an approved NHSC degree program. An example of such an exception is the Pre-engineering program, where students may transfer coursework back from the affiliated University after transferring to complete their associate degree in Pre-Engineering.

3. Maintain a minimum cumulative grade point average of 2.00. Note: Some programs, such as Teacher Education, may require a higher GPA, either cumulatively or per semester. To be eligible for graduation, grades in all core requirement courses must be a "C" or better. For "General Education Requirements," grades must be at least a "D," but a minimum combined GPA of 2.0 for these courses is required for graduation. Additionally, general education prerequisite courses must receive a grade of "C" or higher to advance to the next course and earn credit toward graduation
4. Apply for Graduation before the deadline listed in the Academic Calendar. A completed degree plan must accompany the application for graduation.
5. Pay all financial obligations to the College.
6. Meet the residency requirement of NHSC, which is a minimum of 24 semester hours for an Associate of Arts, Associate of Science, and Associate of Applied Science Degree; the last 32 semester hours for a Bachelor of Science or Bachelor of Arts Degree; 16 semester hours for a nine (9) month Vocational Certificate.
7. Return all NHSC property to the College. This includes library materials, laboratory equipment, sports equipment, and any other property and supplies.
8. Where applicable, complete an e-portfolio as a graduation project.
9. Complete the assessment examination within the ASMT 200 course.
10. Candidates for a Bachelor of Arts or Bachelor of Science Degree must have passed 32 semester credits in upper-division (courses numbered 300 and above) courses.

COMMENCEMENT

The College has two formal graduation ceremonies. One is held in December after the fall semester and the other in May after the spring semester. If students do not attend the graduation ceremony, they must arrange with the Registrar to receive their degrees by mail.

GRADES AND GRADING

NHS College uses letter grades to evaluate a student's work in each course. The student must meet the course requirements to receive a grade and credit. The quality of student work and achievement of learning outcomes is indicated by a letter grade. In computing scholastic averages, each letter grade is assigned a specific number of honor points for each credit earned. The instructor determines the final grade. The calculation of a grade point average for the term and institutional grade point average for the composite of work is calculated based on the following:

Grade	Interpretation	Honor Points
A	Superior	4.0
B	Above Average	3.0
C	Average	2.0
D	Below Average	1.0
W	Withdrawal	*
AU	Audit	*
P	Pass	*
I	Incomplete	*
F	Failure	0

*Not calculated in grade-point average but may be calculated in attempted credits for Satisfactory academic progress (SAP) used for financial aid eligibility.

Pass (P) grades may only be given for internships, practicum, workshops, and courses with notification to the Curriculum Committee.

AUDITING A COURSE

1. If a student wants to officially register for a class without earning a letter grade or credit, the course may be scheduled as an audit. The cost incurred is \$50.00
2. A student auditing a course may be required to participate fully in the class. Expectations should be clarified with the course instructor at the start of the semester.
3. To schedule an audit, the student registers for the course in the Registrar's Office. The student should write "AU" in place of credits on the form. The course will appear on the student's semester schedule as though it has been scheduled for credit.
4. A course may be dropped for credit and added for audit or dropped for audit and added for credit only during the drop/add period for the course. Student Accounts will be notified and will make changes on the student bill.
5. A course scheduled for audit will appear on the student's record with the symbol "AU" if attendance was regular or "W" if the attendance was unsatisfactory. No credit is earned, and the student's grade point average is not affected.
6. Credits for a course being audited are counted by the Registrar as part of a semester credit load in determining an overload. Credits for a course being audited are not counted for the following:
 - a. Determining enrollment
 - b. Determining financial aid status

ACADEMIC BANKRUPTCY

As of Fall 2019, Nueta Hidatsa Sahnish College no longer allows Academic Bankruptcy.

ACADEMIC DISHONESTY

The act of cheating, academic fraud, or plagiarism will not be tolerated at the Nueta Hidatsa Sahnish College. Academic fraud is creating false documents, altering existing documents, or forging official signatures or credentials for academic purposes.

PLAGIARISM

“Plagiarism is a special kind of cheating which often is poorly understood. It is defined as the conscious presentation of someone else’s ideas, words, or materials as one’s own, without properly indicating by footnote or some other appropriate form of citation the source or origin of the material. Other author’s ideas, interpretations, and words are their personal and legal property. If one wishes to use such material, one is required to give full credit to the original source. This also includes material that is paraphrased from another source or person. Plagiarism may be avoided by acknowledging, through some standard procedure, the sources for the ideas and interpretations and quoted phrases, sentences, or paragraphs. No matter the source of material used, whether quoted or paraphrased, acknowledgement of the source is required. Failure to give credit is plagiarism. The college reserves the right to place a student on academic probation and/or suspension if an instructor can sufficiently prove to the Academic Dean or the President that an incident has occurred. The instructor will submit a report to the student’s personal academic file. Appeals for such actions

must be submitted following an academic appeals process”. The Grievance Process is listed in its entirety in the 2022-2023 NHSC College Handbook, p. 87.

GRADE APPEAL PROCEDURE

A course grade is considered final unless the student or instructor files an appropriate appeal. For the student who has reason to believe the grade issued is incorrect, the following Grade Appeal Procedure must be followed:

Student Grade Appeal Procedure

A student has up to six (6) weeks from the end of the semester from which the final grades were submitted to initiate a grade appeal.

1. Initial Appeal: The student must discuss the grade objection with the instructor from whom the disagreement stems.
2. Submission of Written Appeal: If the student is not satisfied with the verbal conference with the instructor, she/he must submit a written appeal to the Academic Dean within five (5) working days, and she/he will receive a written response from the Academic Dean within five (5) working days.
3. Appeal Committee: If the student is not satisfied with the written response, she/he has five (5) working days to request in writing that the Appeals Committee hear the matter. This request is given to the Vice President of Academics and a hearing will be scheduled within five (5) working days.

The Appeal Committee shall be comprised of the following:

- a. Academic Dean
- b. Faculty Chair (unless this person is directly involved.)
- c. One faculty or staff member selected by the student.
- d. Faculty member appointed for two-year term

-
- e. One additional non-academic staff member

Committee Hearing Procedure:

1. The student will verbally address the Appeal Committee, stating his/her reasons for why the grade should be changed. The student should have a written synopsis of his/her argument.
2. The committee will then hear from the instructor, who will provide his/her arguments for keeping the current grade. The instructor should likewise bring any supporting documents that he/she feels are relevant.
3. The committee shall then vote on the appeal; the Academic Dean shall vote only to break a tie.
4. The Appeal Committee's decision shall be submitted in writing to the Vice President of Academics within five (5) working days of the hearing, and the Vice President of Academics may either uphold or over-rule it.
 - a. The instructor may appeal a decision that was made in favor of the student.
 - b. If the Committee votes to deny the appeal, the Vice President of Academics will automatically review the decision.
 - c. The Vice President of Academics shall transmit (via letter, e-mail, or both) the outcome of the appeal to the instructor, student, and the Appeal's Committee.

GRADE POINT AVERAGE

A student's scholastic standing of Grade Point Average (GPA) is obtained by dividing the number of honor points earned for that semester by the current total semester hours attempted. The cumulative or total GPA is obtained by the same method using overall semester hours attempted and overall honor points earned from NHSC and all transferred credit. Grades of W, P, and I are disregarded when figuring grade point averages.

Figuring Grade Point Average

Course Title - Course Grade - #Credits – Honor Points - Points Earned:

ENG 110	B	4	x 3	12
MA 101	C	4	x 2	8
NAS 113	A	4	x 4	16
ECON 201	F	3	x 0	0

TOTAL: 15 credits and 36 Points

Semester GPA: $36/15=2.40$

ADMINISTRATIVE DROP

NHSC faculty members reserve the right to withdraw a student from any course. Prior to an administrative drop, the faculty must submit an Early Alert Form to notify the student. The purpose of administrative withdrawal is to limit the financial liability and academic consequences for the student. Reasons for administrative drop include, but are not limited to:

- Lack of attendance – Students who have excessive or extended absences in a face-to-face class may be dropped. It is up to each instructor as to what is excessive or extended and will differ depending on the course length and weekly schedule. Students in online, hybrid, or independent study courses who fail to contact the instructor in person or electronically within the first two weeks and/or at least once a week thereafter may also be dropped.
- Academic dishonesty: Students involved in any form of dishonesty may be dropped as per the instructor's discretion.

Students should not assume they are automatically withdrawn. Instead, they are strongly encouraged to check with the instructor of the course.

Students will remain responsible for any financial liability they have incurred, less applicable refunds, and for any academic and financial aid consequences due to the administrative withdrawal.

If an administrative withdrawal occurs before the add/drop date set by the registrar's office, the course will not appear on the student's transcript. After the add/drop date, a "W" will appear for that course.

Students will be notified that they will be administratively dropped if they do not directly appeal to the instructor within one week. A copy of the notification will be sent directly to the instructor as well as to the Registrar.

Students who feel they have been wrongfully withdrawn should follow the appeal process:

1. A student has one week from receiving the notification from the Retention Counselor to appeal in writing to the instructor. The instructor will meet with the student within three working days.
2. If the matter cannot be settled within those three working days, the student has the responsibility to confer with the Academic Dean within three additional working days. The student must give a copy of the written appeal to the Academic Dean. The Academic Dean will meet with the student, Faculty Chair, faculty member, and the Vice President of Academics. A recommendation and/or decision will be made at this meeting.
3. The student must attend class during the appeal process. If he/she does not attend class during the appeal process, the Vice President of Academics may decide to omit step 2 of the appeal process, and the student will remain administratively withdrawn.

COURSE CHALLENGE

Course challenges at NHSC are designed to free students from taking courses where content has already been mastered. Students enrolled at NHSC in good standing may submit a request to challenge any courses listed in the college bulletin. Students can challenge three credits per semester, but they cannot challenge more than twelve total credits. The same course may not be challenged twice. Each course challenged has a non-refundable fee of \$100.

The procedure for challenging a course is:

1. Contact the course instructor to obtain written approval for a challenge exam or credit for prior learning/training.
2. If approval is obtained, present the written approval to the Academic Dean for approval.
3. Present the form to the Business Office and pay the fee.
4. Return a verification of payment to the instructor and arrange to take the examination or submit documentation of prior learning/training; the instructor will note the grade and provide a 'P' or 'F' on the form.
5. The instructor forwards the grade to the Registrar's Office. Pass credit is given if a grade of "C" or better is reported on the exam, or documentation of prior learning/training is deemed sufficient.
6. An exam to challenge a course may be taken only once; refusal of documentation of prior learning/training may be appealed to the Vice President of Academics.

INCOMPLETES

The Incomplete (I) grade may be granted when students are unable to complete course requirements for reasons beyond their control or by circumstances created by the college. A contract, complete with requirements, between the student and the instructor, must be signed by the student, the instructor, and the Vice President of

Academics, and submitted to the Registrar. The instructor and the Registrar's Office will retain a copy of the contract requirements. The student must be passing the coursework to qualify for consideration for an incomplete. The deadline (all incompletes must be complete within 42 days of when the grades were due - **summer** is not considered a semester it is a term - and **no Incompletes** should be given at this time) negotiated by the student and the instructor for completing the work will be included in the requirements. A 'Default' letter grade, which indicates the student's final grade if no additional work is submitted, is indicated on the Contract. Instructors **MUST** submit a Change-of-Grade Form to the Registrar by the end of the Incomplete Contract period to award the student a grade other than the Default. Graduates may not graduate with an "I" on their NHSC academic record.

SATISFACTORY ACADEMIC PROGRESS (SAP)

NHSC has set the following standards for maintaining Satisfactory Academic Progress:

A student pursuing a bachelor's degree must complete at least 120 semester hours and is considered making satisfactory academic progress if their GPA meets the following minimum standards.

Semester	Semester GPA
First	1.50
Second	1.75
Third and following	2.00

A student pursuing an Associate of Arts or Associate of Science Degree must complete at least 60 semester hours and is considered making satisfactory academic progress if their semester GPA meets the following minimum standards.

Semester	Semester GPA
First	1.50

Second	1.75
Third and following	2.00

Vocational Students are considered to make satisfactory academic progress if their semester and cumulative GPA meet the following minimum standards.

Semester	Semester GPA
First	2.00
Second	2.00

All Students must have a 2.00 cumulative GPA to graduate.

ACADEMIC PROBATION AND SUSPENSION

Academic Probation or Suspension occurs under the following conditions:

1. **Academic Probation:** Academic Probation occurs when a student's GPA does not meet the SAP criteria previously listed. Such students will remain on Continued Academic Probation at the end of the next semester if their semester or cumulative GPA falls below the minimum standards.
2. **Reinstatement:** Students must achieve the minimum SAP standards for the semester and cumulative GPA to be removed from academic probation status.
3. **Academic Suspension:** Any student who fails in two (2) successive semesters to achieve Satisfactory Academic Progress will be suspended. This academic suspension means the student will not be eligible to enroll for one year. The student can appeal their academic suspension within thirty-(30) days of the Registrar receiving final grades. When the student returns, they enter Continued Academic Probation.

-
- Upon the student's return, if they fail to make Satisfactory Academic Progress, per NHSC minimum semester and cumulative GPA standards, they will be suspended for one academic year.
 - Students may appeal suspension through the Student Affairs Committee as found in the NHSC Student Handbook.
 - Students must file a petition with the Vice President of Student Services to enroll at NHSC after each Academic Suspension.

GRADE REPORTS

Final grade reports are reported on myNHSC at the end of the semester. Only final grades are recorded on transcripts.

TRANSCRIPTS

An official transcript contains the Registrar's signature, official stamp, and College seal. Official transcripts are sent only between institutions. An unofficial transcript does not have the Registrar's signature, official stamp, or College seal. It is issued directly to the student.

Student must have a zero balance in their student account at the time of degree completion in order to receive an official transcript or diploma from the registrar's office.

All attempts will be made to release transcripts within five (5) working days. This will give the College processing time to verify whether financial obligations exist.

Transcript Request Procedure:

The Registrar will process a transcript request using the following procedures: Students must -

1. Obtain a Request for Transcript form.
2. Return transcript form or written request to the Registrar.
3. If financial obligations exist and a transcript is not released, the Registrar will notify the student in writing.

Note: Transcripts will not be issued by telephone or email requests.

SCHOLASTIC HONORS

NHSC acknowledges the importance of awarding deserving students who have distinguished themselves by their high scholastic achievement. These students will be placed on the Scholastic Honor Roll at the end of each semester. To be eligible, students must have been enrolled full time and have no Incomplete grades. The required GPAs (Grade Point Average) are:

President's List:

Achieve a GPA of 3.80 to 4.00 for the semester.

Dean's List:

Achieve a GPA of 3.50 to 3.79 for the semester.

Honor List:

Achieve a GPA between 3.00 to 3.49 for the semester.

SCHOLASTIC HONORS AT GRADUATION

Students receiving an associate degree may graduate with one of two distinctions:

1. *High Honors are awarded to the graduate who achieved a cumulative GPA of 3.80 and above.*
2. *Honors are awarded to the graduate who has achieved a cumulative GPA of 3.50 to 3.79.*

Students receiving a bachelor's degree may graduate with one of three distinctions:

1. *Summa Cum Laude* is awarded to the graduate whose grade-point average is 3.900 or higher.
2. *Magna Cum Laude* is awarded to the graduate whose grade-point average is 3.700-3.899.
3. *Cum Laude* is awarded to the graduate whose grade-point average is 3.500-3.699.

Honor graduates must complete the minimum required semester hours at NHSC.

ATTENDANCE

- At NHSC, attendance is recorded by each instructor. Attendance is an important part of student success.
- Students in face-to-face, online, hybrid, or independent study courses who fail to attend or make contact with the instructor either in-person or electronically within the first two weeks will be dropped.
- It is the responsibility of the student to notify the instructor in case of illness or if the student expects to be absent for a legitimate reason. Instructors are required to attempt to contact students who are absent and then submit an Early Alert after three consecutive absences.
- If the absences continue, the instructor and/or other college faculty and staff members may file additional alerts, implement interventions, and conduct follow-up communication to promote good attendance and student success. If necessary, an administrative withdrawal may be used to withdraw the student from the course if continuation in the course is not feasible.
- Students who have excessive or extended absences may be subject to a College-Initiated Withdrawal. It is up to each instructor to

determine what is excessive or extended and will differ depending on the course length and weekly schedule.

- Students that cease attendance before the 60% cut-off date are subject to any return of Title IV federal funds (Pell).

REPEATING A COURSE

Students may repeat a course. However, the first grade is never removed from the transcript. The last grade a student receives in the repeated course is used in computing the cumulative GPA. For students receiving federal financial aid, a course for which the student received a grade of "F" or "W" may only be repeated twice. Students who choose to repeat a course beyond the second attempt or if they want to improve a grade of "D" or higher, they will be financially responsible for those credits.

FINAL EXAM POLICY

Students must take their finals during the time scheduled by the instructor. A make-up final will be granted when students are unable to take the regularly scheduled final for reasons beyond their control or by circumstances created by the College.

ADD/DROP PROCEDURES

A student who has registered and who wishes to change a class or classes before the add/drop deadline, may do so using the "Add/Drop Course" tab in myNHSC. The last day to add or drop a course is listed in the Academic Calendar. If dropped by this deadline, the course will not appear on the student's transcript. When a student wants to drop a course, after the Add/Drop deadline and before

the last day to withdraw, he or she must complete a Course Withdrawal form and submit it to the registrar. If a student withdraws from a course after this deadline, a letter grade of “W” will appear on the student’s transcript. Exceptions to deadlines require going through the Vice President of Academics. **Students are not withdrawn simply by not attending class; they must sign an official withdrawal form.**

Procedures: Students will use the following procedures to withdraw from courses.

1. Obtain a Course Withdrawal form from the NHSC website, which can be found under the Academics tab > Academic Forms
2. Student will complete the ‘Student-Initiated’ side of the Course Withdrawal form.
3. Student will obtain signatures from their instructor(s), advisor, Retention Counselor, a representative from Financial Aid, and Student Accounts.
4. Return completed Course Withdrawal form to Registrar; retain copy of Course Withdrawal form.

The Student Affairs Appeal Process has been established for students who encounter situations involving extenuating circumstances, or emergencies potentially affecting their educational records, that fall outside the realm of normal NHSC policy and procedures. Students may petition to be withdrawn from a class after the drop deadline for non-academic emergencies, such as a severe injury or illness, death in the family, and under some circumstances, employment. *For more information on the Student Affairs Committee refer to the Student Handbook beginning on page 103.*

TOTAL WITHDRAWAL FROM COLLEGE

Students who wish to withdraw from all classes must do so before the deadline listed in the Academic Calendar. If

a student withdraws prior to this deadline, a “W” will be entered on the transcript for each course in which the student was registered. Students who do not formally withdraw or do so after the deadline, will receive a letter grade as assigned by the instructor. Students do not withdraw simply by non-attendance. They must complete an official Withdrawal form and return it to the registrar.

Note: Students who withdraw after the third week are still responsible for their full educational cost.

Procedure: The following procedure will be used to totally withdraw from college.

1. Obtain a Withdrawal form from the NHSC website, which can be found under the Academics tab > Academic Forms
2. The student will complete the Withdrawal form.
3. The student will obtain signatures from their advisor, the Retention Counselor, and Student Accounts.
4. The student will return form to Registrar; Student should retain copy of Withdrawal form.

CREDIT/SEMESTER HOUR DESCRIPTION

At Nueta Hidatsa Sahnish College the Fall and Spring semesters are college terms averaging fifteen (15) weeks of instruction and one (1) week for final exams, for a total of sixteen (16) weeks. In a lecture course, a semester hour of credit represents fifteen contact hours; in a laboratory course, one semester hour of credit represents thirty contact hours; and in practical and field experience courses, a semester hour of credit is equivalent to forty-five contact hours. As is typical for institutions of higher education, for every hour spent in class, students are expected to work on the course for two hours out-of-class.

BULLETIN/COURSE EXPIRATION

When a student originally enrolls at NHSC, he/she is assigned a degree plan. If the student is continually enrolled, he/she can utilize the original degree plan OR convert to a modified plan, if applicable. However, if a student stops out and returns to NHSC after one semester or more, they will fall under the catalog's requirements for the year they reapply and begin courses.

Students also must be aware that a course taken more than seven (7) years prior to their current semester may need to be re-taken, that includes transfer credits from another institution. This varies by department; the student and his/her advisor should consult with the relevant Department Chair to determine whether the course(s) in question are still valid.

COURSE LOAD LIMITATION

A normal course load for a full-time student in the Fall or Spring semester ranges from twelve (12) to seventeen (17) semester hours. A student wishing to enroll in more than eighteen (18) semester hours must obtain prior approval from the Vice President of Academics.

Course load requirements may vary in Vocational certificate programs.

A student cannot enroll in more than two (2) concurrent courses during a summer session. Overload credits must be approved by the Vice President of Academics.

Overload Requirements:

- a. A prior semester grade point average of 3.00.
- b. No incomplete grades.
- c. Approval of the Vice President of Academics

The following procedures will be used to petition for overload:

1. Submit a written request to the Vice President of Academics
2. Obtain Advisor and Vice President of Academics signatures.
3. Return written permission to Registrar.

INDEPENDENT STUDY

An Independent Study is regular coursework presented individually. The number of contact hours between student and instructor must total at least 15.

Independent study is available only to sophomore (or senior, in baccalaureate programs,) students who need a particular course to complete the requirements of an established program of study to graduate by the end of that semester.

For each course taken by independent study, the student must complete an independent study contract with the instructor and Vice President of Academics; a copy of this contract must be submitted to the Registrar. The contract must specify the meeting times between Student and instructor and have attached a copy of the course syllabus to indicate that the student is expected to complete all assignments and exams required of regular students.

A \$50 fee will be charged to the student for each Independent Study class.

Independent study should NOT be viewed as a bypass for the regular class; students who have failed or withdrawn from the regularly scheduled class within the prior academic year will need to justify in writing (and, where appropriate, with documentation) their reasons for not completing the regularly scheduled class.

Requirements:

- a. A prior semester grade point average of 3.00.
- b. No incomplete grades.
- c. Approval of the Vice President of Academics

Procedures: The following procedures will be used to request an Independent Study:

1. Obtain an Independent Study Contract Template
2. Complete the Contract
3. Obtain all required signatures
4. Submit contract to the Registrar along with the Registration Form

ENROLLMENT POLICY FOR DUAL CREDIT AND DUAL ENROLLMENT

Dual Credit: The fifty-fifth legislative assembly of the State of North Dakota passed senate bill number 2033 at the 1997 session. The bill allows juniors and seniors in North Dakota's public schools to take courses offered by an approved post-secondary institution for both high school and post-secondary credit. Dual Credit students are limited to two courses per semester, and the course(s) must be at Freshman Level. Dual credit students must submit a Dual Credit Form that they receive from their high school for each course and follow standard admission procedures. Only high school students are eligible for the Dual Credit program.

Dual Enrollment: High school juniors and seniors may apply for admission to take courses. A Dual Enrollment student is not seeking Dual Credit. Dual Enrollment students are limited to two courses per semester, and the course(s) must be at Freshman Level. Students must follow standard admission procedures. The Storm Early College Coordinator oversees the Dual Credit and Dual Enrollment programs.

MINIMUM CLASS SIZE

According to NHSC policy, classes offered and held must have a minimum of five (5) paying students. The only exception to this is if a student needs the class to meet requirements for graduation in the current term. For anyone to audit the class there must first be five (5) paying students; this also includes full-time faculty and personnel.

STUDENT CLASSIFICATION

Freshman - earned less than 30 credits.

Sophomore - earned from 30 to 59 credits.

Junior - student is in a baccalaureate program and has earned from 60 to 89 credits.

Senior - student is in a baccalaureate program and has earned over 90 credits.

STUDENT EMERGENCY FUND

The Student Emergency Fund may be available to provide students with funding assistance for academic and retention purposes. Students must be in good standing with class attendance and grades and do. Contact the Vice President of Student Services for assistance.

CAMPUS SERVICES

ONLINE BOOKSTORE

Created in partnership with Akademos, Inc. and powered by TextbookX, the Online Bookstore simplifies the

textbook ordering process for students and faculty while providing a variety of physical and digital textbook formats.

Students log in with an MyNHSC username and password then select what they need from new, used, eBook, and rental options as well as having the choice to buy books from third-party marketplace merchants or other students around the country.

Students can use their Bookstore Voucher to pay for their books through our online Bookstore. What is a Bookstore Voucher? It is a way for students to purchase their books without the need to enter a credit card. The voucher allows students to “charge” their books and essential items required per class to their NHSC student account. The amount of the charges a student uses from their bookstore voucher will be paid back through the students Pell award, scholarships, or a direct payment to NHSC. Students are not able to purchase anything other than their required books, equipment, and ancillary items, along with a one-time purchase of a Dell laptop to use for educational purposes.

SECURITY

Security for the main campus, students, and staff is provided by NHSC. Please contact the Director of Security for more information at 701-627-8052.

ACADEMIC PROGRAMS OF STUDY

DEGREES

The Nueta Hidatsa Sahnish College curricula are organized programs of study designed to provide opportunities for developing the necessary skills, competencies, and experiences in chosen program areas. This will enable students to achieve their educational goals.

The Nueta Hidatsa Sahnish College offers the Bachelor of Arts Degree, Bachelor of Science Degree, Associate of Arts Degree, Associate of Science Degree, Associate of Applied Science Degree, and Vocational Certificate of Completion.

BACHELOR OF ARTS AND BACHELOR OF SCIENCE

The Bachelor of Arts (BA) & Bachelor of Science Degree (BS) programs are designed to provide a recognized course of instruction that leads to professional competence in the student's area of study. These programs also prepare the student for graduate work in the field.

The *two (2) Bachelor of Science Degree Programs* offered at Nueta Hidatsa Sahnish College are:

- Elementary Education
- Environmental Science

The *two (2) Bachelor of Arts Degree Program* offered at Nueta Hidatsa Sahnish College is:

- Business Administration and Management
- Native American Studies

ASSOCIATE OF ARTS AND ASSOCIATE OF SCIENCE

The Associate of Arts (AA) & Associate of Science Degree (AS) programs are designed to provide a recognized course of instruction that leads to credits transferable to other institutions of higher education. These programs also prepare the student for employment in a variety of areas.

The *seven (7) Associate of Arts Degree Programs* offered at the Nueta Hidatsa Sahnish College are:

- Addiction Studies
- Business Administration
- Early Childhood Education
- Elementary Education

-
- Human Services: Social Work Concentration
 - General Studies
 - Native American Studies

The *six (6) Associate of Science Degree Programs* being offered at Nueta Hidatsa Sahnish College are:

- Computer Science
- Environmental Science
- Equine Studies
- Mathematics
- Pre-Engineering
- Science

VOCATIONAL CERTIFICATES

Nueta Hidatsa Sahnish College recognizes a continuing need to expand educational opportunities beyond the traditional academic disciplines. The Vocational curriculum is designed to meet practical instruction and training needs of the Reservation communities. Vocational Education Certificates provide an alternative approach to educational programs in both design and duration.

The *four (4) Vocational Certificates* offered at Nueta Hidatsa Sahnish College are:

- Comp TIA A+
- Early Childhood Associate
- Unmanned Aircraft Systems
- Welding Technology

NHSC'S INSTITUTIONAL LEARNING OUTCOMES

General education at the Nueta Hidatsa Sahnish College is an integral and important part of the student's college experience. General education provides students with learning experiences that reinforce NHSC's Institutional Learning Outcomes:

1. Students will develop critical thinking skills.
2. Students will be able to clearly communicate both orally and in writing.
3. Students will effectively utilize quantitative reasoning, scientific methods and technology.
4. Students will acquire intellectual concepts and dispositions that enable them to live and contribute as active and successful tribally educated participants in a diverse and global society.
5. Students will have an awareness of emotional, mental, physical, social, and spiritual wellness.

GENERAL EDUCATION REQUIREMENTS

The following general education requirements must be completed to earn a Bachelor of Arts, Bachelor of Science, Associate of Arts, Associate of Science, or Associate of Applied Science degree from Nueta Hidatsa Sahnish College.

Bachelor of Arts (BA) & Bachelor of Science (BS)

35 Credit Hours

- English Composition – 6 credits
 - ENG 110
 - ENG 120
- Communication – 3 credits
 - COMM 110
- Social Sciences – 6 credits
- Arts & Humanities – 6 credits
 - NAS 201
 - Tribal Language
- Laboratory Science – 4 credits
- Mathematics – 4 credits
 - MA 103 or higher
- Technology – 3 credits
- Wellness – 2 credits
- Foundations & Fitness – 1 credit
 - PSY 100

Associate of Arts (AA) & Associate of Science (AS)

36 Credit Hours

- English Composition – 6 credits
 - ENG 110
 - ENG 120
- Communication – 3 credits
 - COMM 110
- Social Sciences – 6 credits
- Arts & Humanities – 6 credits
 - NAS 201
 - Tribal Language
- Laboratory Science – 4 credits
- Mathematics – 4 credits
 - MA 103 or higher
- Technology – 3 credits
- Wellness – 2 credits
- Foundations & Fitness – 2 credits
 - PSY 100
 - ASMT 200

Associate of Applied Science (AAS)

22 Credit Hours

- English Composition – 3 credits
 - ENG 110 or BOTE 210
- Communication – 3 credits
 - COMM 110
- Arts & Humanities – 6 credits
 - NAS 201
 - Tribal Language
- Mathematics – 3 credits
- Technology – 3 credits
- Wellness – 2 credits
- Foundations & Fitness – 2 credits
 - PSY 100
 - ASMT 200

ALPHABETICAL LISTING OF PROGRAMS

ADDICTION STUDIES

Degree: Associate of Arts

Credit Hours Required: 65

Addiction Studies (A.A.) offers a paraprofessional level of competence in the field of helping addiction professionals. The learner has the opportunity at the conclusion of study to transfer to a four-year college continuing their pursuit of a bachelor's degree in the field of interest. Addiction Studies associate degree is theoretical and applied knowledge regarding the nature, etiology, and treatment of alcohol and other drug issues. The curriculum emphasizes paraprofessional skill development for a career in the addiction profession.

Program Learning Outcomes:

- The student will gain an understanding of the dynamics of addiction
- The student will understand the process of counseling, knowledge and reasoning in the profession of addiction.
- The student will have an understanding of scientific inquiry and thinking as it applies to addiction and skills development.
- The student gain basic concepts of human behavior and interrelationships as it pertains to addiction

Professional Course Requirements:

ADS 210 Intro to Practical Pharmacology in Addiction & Recovery	3
ADS 215 Ethical & Legal Issues in the Substance Abuse Profession	3
ADS 220 Alcohol Drugs Helping Skills & Lab	4
ADS 222 Alcohol & Drug Group Interaction & Lab	4

BUSINESS ADMINISTRATION, AA

Degree: Associate of Arts

Credit Hours Required: 64

This program will prepare persons for positions in the accounting/business world, for transfer to a four-year college. It will also prepare students for an administrative or management-related career or for the development and operation of a small business depending on the electives selected by the students.

The curriculum is designed to introduce students to the fundamentals of accounting, as needed in the advanced, technological business world of today. This includes an understanding of basic concepts, and definitions, as well as learning the characteristics and methods used in modern businesses.

The Mandan, Hidatsa, and Arikara Nations' history, language, social, and spiritual culture is incorporated over entirety of course or as specific course subject requires. The individual instructor will actively seek culturally relevant materials to incorporate into the classroom setting.

Program Learning Outcomes (PLOs):

- The student will describe and illustrate the accounting systems, including financial and managerial accounting, with a clear understanding of financial statements.
- The student will identify the fundamentals of the management process, focusing on the concepts
- and techniques basic to the manager, including planning, organizing, leading, and controlling.
- The student will exhibit professional skills in written and verbal communication.
- The student will create a business plan and/or marketing plan.
- The student will use various technologies to identify, analyze and synthesize data and information to support decision making in organizations.

Professional Course Requirements:

ACCT 200 Accounting I	3
ACCT 201 Accounting II	3
ACCT 215 Business in Legal Environment	3

COMP TIA A+ CERTIFICATION

Degree: Certificate

Credit Hours Required: 24

Computing Technology Industry Association (CompTIA) A+ training offers standard competency for entry-level service technicians in the computer industry. Earning CompTIA, A+ Certification means that an individual possesses the knowledge, skills, and customer service skills necessary to be a successful computer service technician offering a nationally recognized and industry recognized credential for new entrants into the field. Indeed, CompTIA A+ certification is the most widely recognized certification available across the IT industry.

The CompTIA A+ certification provides students with the basic knowledge and skills necessary for a career in PC support. The program prepares students to sit for and pass the CompTIA A+ 220-1001 and 220-1002 certification exams. The topics include installation, configuration, preventative maintenance of PC hardware components, mobile devices, the basics of networking, security, virtualization, desktop imaging, and deployment. Students will also gain knowledge of diagnostic and troubleshooting processes for various types of technical issues.

Program Learning Outcomes (PLOs):

- Describe the standard features of PC hardware found on desktop and laptop computers
- Explain network hardware, protocols, and how to build a network
- Identify unique features and concerns specific to laptop computers Describe the printing process, installation, and maintenance of common printer types
- Describe IT support operational procedures in a workplace
- Explain the features, tools, and installation options of Windows Operating Systems
- Identify the components of Windows Operating Systems networking
- Describe common security threats and security-breach prevention methods
- Explain the network setup, security, and synchronization of mobile devices
- Describe the diagnostic and troubleshooting processes for hardware, software, networking, and security issues

General Education Requirement:

CSCI 101 Introduction to Computers	3
CSCI 160 Computer Science I	4
NAS 201 History of TAT	3
SOC 100 E-Portfolio/Job Seeking	1

COMPUTER SCIENCE

Degree: Associate of Science

Credit Hours Required: 66

NHSC's Computer Science associate degree program provides two years of computer science education to prepare a student for transfer to a 4-year institution to pursue their bachelor's degree. The program prepares graduates for immediate entry-level employment in any size company utilizing computer knowledge and technology. This degree provides both theory and hands-on training in programming language too. Graduates adding industry certification such as A+, Network+ have an advantage. The program provides students with the foundation required to build a rewarding career in the continually expanding field of Computer Science.

Program Learning Outcomes (PLOs):

- Students will be able to apply knowledge of computing and mathematics applicable to the discipline.
- Students will be able to analyze a problem and identify and define the computing requirements appropriate to its solution.
- Students will be able to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs.
- Students will be able to use current techniques, skills, and tools necessary for computing practice.
- Students will be able to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the tradeoffs involved in design choices.
- Students will be able to apply design and development principles in the construction of software systems of varying complexity.

Professional Course Requirements:

EDUCATION--TEACHER EDUCATION DEPARTMENT

“Those Who Teach”

O gii waagabuus (Mandan); Agumaagigu'uckike (Hidatsa); Niiniitahnaa'iitawihu (Arikara)

The Nueta Hidatsa Sahnish College Teacher Education Department offers four (4) degrees/certificates.

EARLY CHILDHOOD EDUCATION:

- Early Childhood Certificate
- A.A. Early Childhood Education

ELEMENTARY EDUCATION:

- A.A. Elementary Education
- B.S. Elementary Education

Overview:

“The education of aspiring teachers through NHS College is based upon the motto, “It Takes an Earth Lodge Village.” Our village of learners includes students, students’ families, cultural mentors, learning experts, college faculty, supervising teachers, and our community, all collaborating in a Circle of Practice (CoP) and a Community of Learning (CoL). Each student’s collaborative academic journey to exemplify “Those Who Teach” is built upon NHS College’s general education program that reflects a strategic mission and vision embedded with values based on the CREDE model.

The purpose of our Teacher Education Programs is to train teacher candidates as leaders well-prepared to facilitate the most effective culturally-responsive instruction that maximizes academic achievement, particularly in the areas of mathematics and science. We work very closely with MHA Education, Head Start, and the New Town, Mandaree, Parshall, Twin Buttes, and White Shield schools as well as the surrounding school communities.

We train candidates in early childhood, elementary education with an emphasis on middle school math and/or science.

Mission and Vision of the Teacher Education Department:

Mission

The mission of the Teacher Education Department is to integrate the Earth Lodge model into the Teacher Education Programs. The four core merits of CREDE: culture, research, and excellence in diversity education that connect our students’ learning to their environment and make meaning in their lives.

Vision

Our aspiring teachers and teacher candidates will create learning experiences that perpetuate our past, preserve our present, and prepare our futures.

EARLY CHILDHOOD CERTIFICATE

Certificate of Completion: Early Childhood

Credit Hours Required: 16

An Early Childhood Certificate is used primarily for paraprofessional teacher's aide or independent business owners to comply with state licensure requirements. In addition, a candidate completing may also choose to complete the requirements to fulfill the national Child Development Associate (CDA). (Please see <http://www.cdacouncil.org/about/cda-credential>)

Program Learning Outcomes (PLOs):

- **Learner and Learning:** The student will be able to demonstrate an understanding or advancing learning in diverse and developmentally appropriate early childhood environments. and creative learning in an early childhood setting, a classroom, and at home.
- **Content:** The student will be able to identify and apply comprehensive and age-appropriate strategies to early childhood curriculum.
- **Instructional Practice:** The student will be able to use reflective assessment to appropriately apply culturally relevant strategies and technologies to assess student's mastery of child learning.
- **Professional responsibility:** The student will be able to demonstrate positive relationships and continuous learning within the field while advancing in their profession.

Professional Course Requirements:

EC 210 Introduction to Early Childhood Education	3
EC 220 Early Childhood Development: Pre-birth through age Eight	3
EC 222 Program Administration	3
EC 233 Curriculum Instruction & Learning Environments	3
EC 236 Positive Child Guidance	3

EARLY CHILDHOOD EDUCATION, AA

Degree: Associate of Arts

Credit Hours Required: 69

The Early Childhood Education program is designed to prepare candidates for employment in various human services positions, such as Head Start teacher or assistant teacher, parent educator, preschool teacher, teacher's aide, social services paraprofessional, and/or independent business owner. The main goal of the Early Childhood Development degree program is to provide candidates with the knowledge and skills necessary for success in working with children in a variety of settings.

Program Learning Outcomes (PLOs):

- **Learner and Learning:** The student will be able to demonstrate an understanding or advancing learning in diverse and developmentally appropriate early childhood environments. and creative learning in an early childhood setting, a classroom, and at home.
- **Content:** The student will be able to identify and apply comprehensive and age-appropriate strategies to early childhood curriculum.
- **Instructional Practice:** The student will be able to use reflective assessment to appropriately apply culturally relevant strategies and technologies to assess student's mastery of child learning.
- **Professional responsibility:** The student will be able to demonstrate positive relationships and continuous learning within the field while advancing in their profession.

Core Requirements

ELEMENTARY EDUCATION, AA

** Teacher Candidates must complete an AA in Elementary Education, prior to entrance into the Teacher Education Program to receive a B.S. In Elementary Education, unless special permission from the Program Director is granted.*

Degree: Associate of Arts

Credit Hours Required: 66

We invite you to explore our Elementary Education program. The Associate of Arts degree in Elementary Education offers students the opportunity to advance into a four-year degree program.

Program Learning Outcomes (PLOs):

- The candidate will be able to develop a preliminary written personal philosophy of education.
- The candidate will be able to create a standards-based lesson plan.
- The candidate will demonstrate competency and best classroom practices by completing a classroom management plan.

Professional Core Requirements:

EDU 210 Intro to Exceptional Children	3
EDU 222 Technology for Teachers	3
EDU 232 Classroom Management & Learning	3
EDU 238 Children's Literature	3
EDU 240 Preparation for Praxis I	2
EDU 250 Intro to Education	3
EDU 273 Physical Science for Elementary Teachers	3
EDU 298 Pre-Professional Experience	1
EDU 305 Diversity & Multicultural Education	3
EDU 324 Creative Arts for Elementary Teachers	3
MA 277 Math for Elementary Teachers I	3
Total Professional Course Semester Hours	30

Specified General Education Course Requirements:

PSY 111 Intro to Psychology (Social Science)	3
PSY 250 Developmental Psychology (Social Science)	3
BIO 150 General Biology I/Lab (Science Lab)	4
HPER 210 First Aid/CPR (Wellness)	1
CSCI 101 Intro to Computers (Technology)	3

ELEMENTARY EDUCATION, BS

Degree: Bachelor of Science

Credit Hours Required: 121

“Those Who Teach”

O gii waagabuus (Mandan); A gumaagigu’uckike (Hidatsa); Niiniitahnaa’iitawihu (Arikara)

Our “Those Who Teach” program at NHSC prepares candidates to teach grades 1 through 8. Our program endeavors to bring up-to-date curriculum and field experiences to the teacher candidates to ensure quality preparation for their future classrooms.

** Teacher Candidates must complete an AA in Elementary Education, prior to entrance into the Teacher Education Program to receive a B.S. In Elementary Education, unless special permission from the Program Director is granted.*

Criteria for the Admission to Teacher Education

The student who intends to pursue a program in teacher education must apply to the Teacher Education Department and be approved for admission into the program. An applicant must meet the following criteria to be considered for admission:

1. A minimum cumulative grade point average of 2.75
2. Satisfactory academic performance of a C or better in all General Education, Institutional Requirements, Wellness Requirements, and Additional Program Requirements.
3. Satisfactory academic performance of C or better in MATH 103 – College Algebra
4. Successful completion of the Praxis I exam, known as the Core Academic Skills for Educators, with a satisfactory score required by the state of North Dakota prior to application to the teacher education program and prior to admittance to the B.S. in Elementary Education. (Candidates can be admitted provisionally with written permission from the Director of Teacher Education, stating that Praxis I needs to be completed prior to admittance to the B.S. in Elementary Education and with the understanding that the student must successfully complete EDU 411 Educational Assessment (1 credit).

Praxis Requirements/Testing Information

PRAXIS I - PRAXIS CORE ACADEMIC SKILLS EXAM

The Praxis I tests are now known as the Core Academic Skills for Educators. Test Sites: Bismarck, Dickinson, Fargo, Grand Forks, and Grand Forks. See Educational Testing Services website (ets.org) for additional information and register for the exams. Below are the passing scores for the Praxis I tests.

Praxis Required Tests

	Core Skills Test Code	Qualifying Score	Minimum Score
Reading	5713	156	149
Writing	5723	160	153
Math	5733	150	143

Core Academic Skills: Applicants must meet individual qualifying scores in Reading, Writing, and Math **OR** meet a composite score of 466 with no score being below the minimum set for each test. Reading minimum is 149, writing minimum is 153, and math minimum is 143.

Scores: Score reports are available online through the ETS account 2 to 3 weeks after the testing window closes or 2-3 weeks after your test date for tests offered continuously. Please save your score report as a pdf document and email it to espbinfo@nd.gov when you are ready to apply for licensure.

5. Written recommendations from three professionals
6. Essay on why the student would like to enter the teacher education program
7. Work in progress on the electronic portfolio
8. Professional resume
9. Demonstrate a commitment to the learning community model
10. Commit to teaching in local school
11. Exhibit suitable character necessary to teach

The Teacher Education Department and a committee consisting of faculty and staff will interview the applicant, review the documentation, and make a recommendation. If the applicant is denied admission due to a condition that can be corrected, the applicant may reapply when the deficiency is removed or may be put on interim probation.

Continuance to the B.S. in Elementary Education

In order to continue to the B.S. in Elementary Education, the candidate must:

1. Maintain a minimum cumulative grade point average of 3.0 and earn a grade of a B or better in the professional course requirements and in courses taken after admission to the program.
2. Exhibit suitable character and evidence of good conduct, physical and mental health.
3. Continue to obtain satisfactory recommendations from faculty, staff, and field experience supervisors.
4. Prepare to pass the Praxis II exams with a satisfactory score required by the state of North Dakota for Principles of Learning and Teaching and Curriculum, Instruction and Assessment, Grades 1-6.

PRAXIS II

The Praxis II exam is taken the semester prior to student teaching. It is a two-part instrument that assesses knowledge of general and subject-specific teaching skills, principles of teaching and learning, subject assessment,

and foundations of education. A candidate must attempt both the PLT and Praxis II for elementary education in order to enter the student teaching experience.

Elementary Education

Elementary Education: Curriculum, Instruction, and Assessment (5017) Qualifying score: 153

AND

Principles of Learning and Teaching (PLT): PreK–12 (5625) Qualifying score: 157

OR

Principles of Learning and Teaching (PLT): Grades K-6 (5622) Qualifying score: 160

If requirements are not maintained, the Teacher Education Department and a committee consisting of faculty and staff may recommend probation or suspension from the program. Any such action would be reflected in a letter from the Teacher Education Department to the candidate.

Student Teaching

Student teaching is the concluding experience of the Teacher Education Program at Nueta Hidatsa Sahnish College. It is completed during the candidate's final semester and requires at least 16 full-time consecutive weeks. During this time, candidates apply what they have learned through their college course work and field experiences. Student teaching allows the pre-service teachers a time to plan and carry out lessons that follow our four core merits: culture, research, excellence in diversity education (CREDE). They also use a variety of assessment techniques to determine suitability of the lessons, success of instruction and understanding of their own students. During this time, it is expected that the pre-service teachers will experience and learn additional decision making skills, instructional approaches, classroom management courses of action, and general competence.

Criteria for Admission to Student Teaching

A candidate must meet the following criteria to be considered for admission to student teaching:

1. Senior standing or equivalent with a minimum cumulative grade point average of 3.0 or better since admission to the teacher education program.
2. Maintain excellent attendance in classes and field experiences.
3. Successful completion of the (Praxis I-prior to enrollment in the Teacher Education Program and) Praxis II exams as per qualifying state scores. Special permission may be granted by the Director of Teacher Education to complete Praxis tests after admission into the program.
4. Continued satisfactory performance on all criteria for admission and retention in the teacher education program.
5. Completion of the professional education sequence before student teaching. The Teacher Education Department in consultation with a committee of faculty and staff may make exceptions to this criterion if circumstances warrant.
6. Submission of student teaching application to the Teacher Education Department during the semester preceding student teaching.
7. A criminal background investigation including the Bureau of Criminal Investigation and Federal Bureau of Investigation must be completed prior to student teaching.
8. During student teaching, students will not be allowed to take more than three semester hours of credit during the 16 weeks of student teaching without approval from the Teacher Education Department. Classes cannot be taken during the daily full-time student teaching assignment block.

Nueta Hidatsa Sahnish College reserves the right to have the candidates meet additional requirements that may be established by the Teacher Education Department.

Criteria for Graduation and Licensure Recommendation

The Teacher Education Department makes recommendations for graduation and teacher licensure. In order to graduate and be endorsed for licensure, a candidate must meet the following requirements:

1. Cumulative grade point average of 3.0 or better since admission to the Teacher Education Program.
2. Completion of all program requirements, as defined by the Teacher Education Department.
3. Successful student teaching experience.
4. Successful completion and presentation of an electronic portfolio.
5. Teacher Candidates will be considered completers when all coursework is complete.
6. Graduates are responsible for successfully completing both Praxis I and II and submitting all exam scores and required documents for state licensure.

The teacher candidate sends the application to the North Dakota Education Standards and Practices Board (ESPB) for issuance of a teaching license. Teacher candidates will not be deemed completers and diplomas will not be issued until all coursework and Praxis test requirements have been fulfilled.

Our Teacher Education Department is accredited by the North Dakota Education Standards and Practices Board. The most recent accreditation information can be found at:

http://www.hlcommission.org/index.php?option=com_directory&Itemid=&Action=ShowBasic&instid=1164

Degree: Bachelor of Science

Credit Hours Required: 121

Our Bachelor of Science in Elementary Education Program, *Mada Maagarishtauro Awa Hee Aadsa Maa Aru Maa Giguckiigash* (The ones that teach our children how everything on this earth works), became accredited with the North Dakota Education Standards and Practices Board and the Higher Learning Commission in February 2011.

Program Learning Outcomes (PLOs):

- The candidate will be able to develop and revise a written personal philosophy of education.
- The candidate will be able to create two content standards-based lesson plans.
- The candidate will compile key artifacts in a completed e-portfolio that demonstrate teaching competency.
- The candidate will demonstrate an understanding of standards set by the licensing body, Education Standards and Practices Board (ESPB), Interstate Teacher Assessment and Support Consortium (InTASC), Council for the Accreditation of Educator Preparation (CAEP), and the College's teacher preparation program.
- The candidate will be observed periodically throughout their teaching degree.
- The candidate will demonstrate competency and best classroom practices by completing a Classroom Management Plan.

ENVIRONMENTAL SCIENCE

Degrees: Associate of Science and Baccalaureate of Science

Credit Hours Required: A.S.: 63 credits and B.S.: 120 credits

The Environmental Science Program at NHSC focuses on integrating local Fort Berthold environmental issues with Mandan, Hidatsa, and Arikara cultures. The program will provide a solid foundation in a range of specialties including: water, air, and soil quality; wildlife, range, and fisheries management; toxicology; and resource conservation, which will enable our students to gain employment in a wide range of natural resource-related areas.

The two-year Associate of Science degree flows seamlessly into the Bachelor of Science degree and graduates from NHSC's environmental science program will be able to provide essential support for remediating, restoring, and managing local natural resources. The program will prepare students for employment in such fields as fish and wildlife management, recreation management, resource management, environmental quality and range/grasslands management. Although students will study a range of specialties, they should specialize in one of these fields through the choice of electives, the student internship, and their field research.

Program Learning Outcomes (PLOs):

After completing the Associate of Science in Environmental Science:

- The student will be able to describe, orally and in writing, the similarities and differences between traditional native versus modern views of the Earth.
- The student will be able to describe biological, chemical and physical influences on the environment from human activities.
- The student will be able to demonstrate an understanding of the methodology in scientific research through completion of a research paper by selecting, integrating and synthesizing information.
- The student will demonstrate general knowledge of current environmental issues on local, regional and global scales.
- The student will be able to describe the interactions between and the interdependence of the Earth's ecosystems.
- The student will demonstrate the use of environmental geospatial tools.

After completing the Bachelor of Science in Environmental Science:

- The student will be able to demonstrate an understanding of advanced scientific research including project design, experimentation, statistical analysis and interpretation, writing and publication, and ethical considerations.
- The student will describe transport mechanisms for contaminants as they travel through various environmental media including water, soil, and air.
- The student will demonstrate current environmental issues on Fort Berthold as well as be able to associate them with Mandan, Hidatsa, and Arikara beliefs and cultures.
- The student will be able to explain wildlife population ecology and management options for game and non-game/range species.

Associate of Science Degree:

Core Requirements:

BIO 124 Environmental Science	4
BIO 151 Biology II	4
CHEM 121 Chemistry I	4
CHEM 122 Chemistry II	4
SOIL 210 Introduction to Soil Science	3
Elective – Choose from one of the following:	3
ARSC 236 Introduction to Range Management	
GEOG 105 Fundamentals of GIS	

Total Semester Hours 22

Research Component

BIO 225 Research Methods	3
Elective – Choose from one of the following:	2-3
BIO 230 Field Research	
BIO 297 Environmental Science Internship	

Total Semester Hours 5

General Education Requirements:

See: General Education Requirements

(BIO 150 Biology I and POLS 234 Basic Indian Law are directed electives under the Gen Ed Requirements)

Total Semester Hours 36

Cumulative Hours 63

Bachelor of Science Degree:

Core Requirements:

ARSC 236 Introduction to Range Management	3
BIO 124 Environmental Science	4
BIO 151 Biology II	4
CHEM 121 Chemistry I	4
CHEM 122 Chemistry II	4
GEOL 100 Earth Science	4
MATH 210 Elementary Statistics	4
GEOG 105 Fundamentals of GIS	3
SOIL 210 Introduction to Soil Science	3
Total Semester Hours	33

Research Requirements (pick two)

BIO 225 Research Methods	3
BIO 230 Field Research	3
BIO 297 Environmental Science Internship	2
Total Semester Hours	5

Professional Requirements

BIO 316 Global Climate Change	3
BIO 324 Ecology	4
BIO 331 Soil Ecology	3
BIO 350 Freshwater Ecology	4
BIO 370 Zoology	4
BIO 420 Air & Water Quality	4
BIO 422 Environmental Law	3
BIO 431 Wildlife & Fisheries Conservation & Management	3
BIO 460 TAT Environmental Issues, Ethics, and Beliefs	3
BIO 493 Senior Research	3
CHEM 421 Environmental Chemistry	3
ENG 452 Scientific Literature & Writing	3
Total Semester Hours	40

Electives – choose 7 credits from the following:

BIO 202 Microbiology (4 credits)	
BIO 206 Ethnobotany (4 credits)	
BIO 388 Native American Ecological Knowledge (3 credits)	
BIO 444 Grassland Ecology (3 credits)	
CHEM 240 Survey of Organic Chemistry (4 credits)	
CHEM 360 Elements of Biochemistry (4 credits)	
Total Semester Hours	7

EQUINE STUDIES

Degree: Associate of Science

Credit Hours Required: 64

The mission of the Equine Studies degree program is to provide students with a realistic venue for pursuing their passion for horses. The program is designed to increase students' knowledge of the science, behavior, care, and management of horses, to expand their awareness of the equine industry well above that of the average horse-person, and to understand the importance of horses in native culture. NHSC's experiential approach and broad-based curriculum allows the successful graduate to pursue a wide range of equine-related professions.

Students in the Equine Studies program will have options in electives to emphasize in Equine Assisted Services or Natural Horsemanship. After completion of the A.S. degree at NHSC, students interested in continuing on to a B.S. degree in Equine Science from another University are encouraged to take electives at the A.S. level in those subject areas.

Classes are taught both on campus and at the Healing Horse Ranch in Parshall, ND. Horses will be provided by the college for use in classes.

Program Learning Outcomes (PLOs):

Program graduates will:

- Be well-versed in general knowledge about the equine industry including the common breeds, equine activities and events, equine-related business principles, and equine industry career options.
- Demonstrate knowledge of the horse in Native American, particularly Great Plains Indians, history and culture.
- Articulate the role of the horse in the fields of mental health, physical therapy, wellness, public health, and education.
- Demonstrate intermediate horsemanship skills on the ground and mounted.
- Demonstrate proper equine safety procedures and policies and communicate written safety policies.
- Communicate the principles of equine behavior and demonstrate training and natural horsemanship communication methods with horses.
- Demonstrate competency in basic anatomy and physiology of the horse, be conversant of common disease and lameness problems, communicate principles of equine nutrition and basic horse care to maximize horse health and performance, implement preventative health programs for horses, and demonstrate basic care and first aid for horses.
- Demonstrate assessment of horses for suitability, function, soundness & health.
- Demonstrate teaching, facilitation, and management skills in equine educational outreach to youth and community.

Core Requirements:

ARSC 155 Intro to Natural Horsemanship: Gaining Confidence & Respect	2
ARSC 161 Equine Business Management	3
ARSC 252 Natural Horsemanship: Building a Relationship	2
ARSC 260 Introduction to Equine Studies	2
ARSC 260L Equine Care & Management Lab	1
ARSC 261 Basic Equitation & Horsemanship	1

ARSC 262 Equine Marketing	2
ARSC 265 Great Plains Indian Horsemanship	2
ARSC 360 Equine Nutrition and Care	3
Total Core Semester Hours	18

Electives (10 credits – choose from one of two emphases):

Emphasis: Natural Horsemanship

ARSC 254 Natural Horsemanship: Harmony with your Horse I	3
ARSC 255 Natural Horsemanship: Harmony with your Horse II	3
ARSC 299 Equine Practicum	1-3
ARSC 362 Young Horse Starting & Development	3

Emphasis: Equine Assisted Services

ARSC 210 Introduction to Equine Assisted Services	3
ARSC 310 Principles of Equine Assisted Services	3

GENERAL STUDIES

Degree: Associate of Arts

Credit Hours Required: 62

The program is designed to provide students with the opportunity to acquire basic concepts and skills in major areas of study in addition to the major cultural traditions of the Mandan, Hidatsa, and Arikara tribes. The General Studies program will provide students with a well-rounded academic and cultural experience that will provide a solid educational foundation that will prepare students for transfer to a four-year college or for entry into the workforce.

Institutional Learning Outcomes (ILOs):

1. Students will develop critical thinking skills.
2. Students will be able to clearly communicate both orally and in writing.
3. Students will effectively utilize quantitative reasoning, scientific methods and technology.
4. Students will acquire intellectual concepts and dispositions that enable them to live and contribute as active and successful Tribally educated participants in a diverse and global society.
5. Students will receive information and training on emotional, mental, physical, social, and spiritual wellness.

HUMAN SERVICES: SOCIAL WORK CONCENTRATION

Degree: Associate of Arts

Credit Hours Required: 65

Human Services Social Work curriculum is designed to prepare students interested in working with businesses to obtain entry-level employment in public and private social service agencies. The social work student will be equipped with the skills, knowledge, values, and sensitivity to effectively serve human needs in a variety of community settings. Each class will provide the student with the paraprofessional level of competencies necessary to prepare them to work in general social services or prepare them for a specialized practice upon their transfer to a four-year college.

Program Learning Outcomes (PLOs):

- Identify as a professional social worker and conduct oneself accordingly.
- Apply social work ethical principles to guide professional practice.
- Apply critical thinking to inform and communicate professional judgments.
- Engage diversity and difference in practice.
- Advance human rights and social and economic justice.
- Engage in research-informed practice and practice-informed research
- Apply knowledge of human behavior and the social environment.

Professional Course Requirements (21 credits)

SWK 150 Interpersonal Skills	3
SWK 160 Introduction to Social Work	3
SWK 255 Social Work Profession	3
SWK 256 Social Welfare	3
SWK 257 Human Development in the Social Environment	3

MATHEMATICS

Degree: Associate of Science

Credit Hours Required: 65

The Mathematics Program is designed to prepare a student for entry-level studies in general mathematics and for further education in mathematics-related areas of study. A two-year curriculum in mathematics is available for students who plan to obtain an Associate of Science degree by completing the NHSC requirements.

Program Learning Outcomes (PLOs):

- Apply Mathematical reasoning and procedures to real-world problems.
- Communicate clearly, orally and in writing, the process by which they approach problems, and the conclusions drawn from solving them.
- Recognize the Historical Roots of Mathematics, and the ways in which Mathematics has affected the history of human intellectual endeavors.
- Utilize scientific methodology and Mathematical analysis to investigate their physical and social environments.
- Use technology to calculate, graph, and analyze data.
- Demonstrate how mathematics is tied to the history and culture of the Nueta, Hidatsa, and Sahnish people.

Professional Course Requirements

MA 105 Trigonometry	3
MA 129 Basic Linear Algebra	3
MA 165 Calculus I	4
MA 166 Calculus II	4
MA 209 or 210 Statway II or Elementary Statistics	4
MA 265 Calculus III	4

NATIVE AMERICAN STUDIES, AA

Degree: Associate of Arts

Credit Hours Required: 63

The Native American Studies program is interdisciplinary in its approach, blending the academic disciplines of History, Anthropology, Geography and Archeology with the inclusion of Native oral history and perspective. This program emphasizes the Nueta, Hidatsa, and Sahnish people's histories, traditions, cultures and languages. Native American Studies is a testament to the living and continuing rich traditions and cultures of these Three Affiliated Tribes and represents the foundation stone on which NHSC was built. The program is structured to prepare students for employment either within tribal cultural ecosystems or outside native communities in consultation. This field of study provides foundational courses for students comprehending contemporary and historical indigenous communities and this field works to reinforce understandings of indigenous identities. The Native American Studies program employs indigenous research methodologies and theory, to prepare students for graduate school in the academic disciplines that are embedded in NAS.

Two-Year Program Learning Outcomes (PLOs):

- Students will be able to explain the concept of tribal sovereignty and how it is affected by the federal trust relationship, and how it interfaces with the state government
- Students will know how tribal governments developed, and how they function today
- Students will understand the interplay of tribal history, culture, and politics in the shaping of tribal perspectives
- Students will be able to identify historical and cultural diversity in Native literature—both oral and written
- Students will demonstrate an understanding of historical and contemporary experiences and issues of Indigenous peoples in North America from the perspective of American Indian peoples

Core Requirements

NAS 101 Intro to Native American Studies	3

NATIVE AMERICAN STUDIES, BA

Degree: Bachelor of Arts

Credit Hours Required: 120

The Native American Studies program is interdisciplinary in its approach, blending the academic disciplines of History, Anthropology, Geography and Archeology with the inclusion of Native oral history and perspective. This program emphasizes the Nueta, Hidatsa, and Sahnish people's histories, traditions, cultures and languages. Native American Studies is a testament to the living and continuing rich traditions and cultures of these Three Affiliated Tribes and represents the foundation stone on which NHSC was built. The program is structured to prepare students for employment either within tribal cultural ecosystems or outside native communities in consultation. This field of study provides foundational courses for students comprehending contemporary and historical indigenous communities and this field works to reinforce understandings of indigenous identities. The Native American Studies program employs indigenous research methodologies and theory, to prepare students for graduate school in the academic disciplines that are embedded in NAS.

Four-Year Program Learning Outcomes (PLOs):

- Students will engage in effective oral and written communication.
- Students will be able to conduct critical analyses of texts.
- Students will demonstrate a comprehensive understanding of contemporary and historical issues and ideas related to Native American peoples.
- Students will be able to conduct research independently, being aware of the available Native Studies resources and appropriate research methodologies.
- Students will demonstrate an understanding of historical and contemporary experiences and issues of Indigenous peoples in North America from the perspective of American Indian peoples.

Core Requirements

NAS 101 Introduction to Native American Studies	3
NAS 102 MHA Spiritual Beliefs	3
NAS 105 Native American Art	3
NAS 114,116,118 (Choose One) Nueta (Mandan), Hidatsa, Sahnish (Arikara) II	3
NAS 203 Native American Philosophy	3
NAS 213 Tribal Government	3
NAS 221 History of Indian Education	3
NAS 240 Research & Writing in Native American Studies	3
ENG 265 Native American Literature	3
NAS 301, 302, 303 (Choose One) History of Nueta, Hidatsa, or Sahnish	3
Total Semester Hours	30

Professional Development Requirements

BIO 388 Native American Ecological Knowledge	3
NAS 307 Native American Leadership: Past & Present	3

NAS 308 Tribal, State, & Federal Programs on Indian Reservations	3

Cultural Honors Society

The Cultural Honors Society is an academic organization under the Native American Studies Department mentoring students willing to engage in rigorous scholarship. Major criteria for the selection of Cultural Honors Students include being on the honor roll and showing potential to conduct research. The research-based program helps students hone their research skills by conducting studies related to Mandan, Hidatsa, and Arikara. Students receive opportunities to present their research locally, regionally, and nationally.

Page | 83

PRE-ENGINEERING

Degree: Associate of Science

Credit Hours Required: 66

This program is designed to prepare students for transfer to a four-year college to complete a program in the Engineering field. The curriculum introduces students to the nature of the profession and to the different specialties in Engineering. The program also provides thorough grounding in the necessary Mathematics, Physics, and Chemistry courses which are the foundation of all Engineering and emphasize how Engineers can benefit the local community and society as a whole.

The Pre-Engineering program provides a two-year course of study at NHSC with an additional two years of study at an affiliated university. Students completing the program receive an Associate degree in Pre-Engineering from NHSC and a Bachelor of Science in one of the Engineering disciplines from the affiliated university.

Students must achieve a C or better in all core classes to graduate with an A.S. degree in Pre-Engineering.

Program Learning Outcomes (PLOs):

- The student will be able to identify, formulate, and solve engineering problems.
- The student will be able to apply knowledge of mathematics, science, and engineering to real-world problems.
- The student will be able to work effectively as members or leaders of a team to accomplish an objective.
- The student will have knowledge of contemporary issues.
- The student will have an understanding of professional and ethical responsibility.
- The student will be able to communicate clearly, orally, and in writing the process by which they approach problems, and the conclusions drawn from solving them.
- The student will demonstrate the ability to design and conduct experiments, as well as to analyze and interpret data.
- The student will have the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

The Pre-Engineering Program at Nueta Hidatsa Sahnish College is part of the Pipeline for Tribal Pre-Engineering to Society (PTiPS) pre-engineering/engineering collaboration between mainstream university, North Dakota State University and tribal colleges, Candeska Cikana Community College, Nueta Hidatsa Sahnish College, Turtle Mountain Community College, and Sitting Bull College.

Directed Elective Course Requirements

(Courses are counted toward the NHSC General Education Requirements)

CHEM 121 Chemistry I/Lab	4
ENGR 116 Intro to Engineering	3
MA 103 (or higher) College Algebra (or higher)	4

Engineering Core (13 credits, as advised):

SCIENCE

Degree: Associate of Science

Credit Hours Required: 64

The Science Program is designed to prepare a student for entry-level studies in general science and can be used as a concentration in a specific field of science. The student has the option to begin secondary education course work. The courses are tailored to meet the needs of the student who will transfer to a four-year degree program in a science major.

Program Learning Outcomes (PLOs):

- Discuss a process that would enable one to classify a newly discovered organism into one of the 5 Kingdoms.
- The student will be able to demonstrate an understanding of the processes involved in the scientific method.
- The student will be able to describe, orally and in writing, the similarities and differences between indigenous and western views of Scientific Research Methods.
- Predict what changes a biological or physical disturbance to an ecosystem might cause in the community of living organisms in that ecosystem.
- Apply the geological principles of cross-cutting and superposition to fossils in different strata to infer common ancestry.
- The student will demonstrate familiarity with the periodic table, units of measurement, and basics of reaction of stoichiometry/energy.

Professional Course Requirements:

UNMANNED AIRCRAFT SYSTEMS CERTIFICATION

Degree: Certificate of Completion

Credit Hours Required: 9

The NHSC Unmanned Aircraft Systems (UAS) Certificate is designed to train a professional workforce how to operate UAS in a variety of different settings including Medical Transport, surveying and mapping, search and rescue (S&R), environmental monitoring, and police surveillance. Essential skill sets including mission planning, pre-flight inspections, programming, equipment testing, troubleshooting and maintenance, and autopilot software are emphasized.

Students who successfully complete the training will receive a certification for the skills and knowledge necessary in the field of UAS airframes and aerodynamics, system designs and components, autopilot programming and fundamentals, sensors and payload operations, how to operate in National Airspace for UAS operations, and FAA UAS Regulations.

Program Learning Outcomes (PLOs):

- Understand the evolution of Unmanned Aircraft Systems
- Be able to monitor, interpret and plan UAS missions around weather
- Understand the principles of aerodynamics and flight
- Know the proper procedures for operating within the National Airspace
- Gain operational knowledge of various Autopilots and user interface across UAS
- Be able to assess the proper sensor for industry requirements
- Gain proficiency with pre-/post-flight operations and in-flight procedures
- Know all of the Federal Aviation Administration regulations that apply to Unmanned Aircraft Systems

Professional Course Requirement:

WELDING TECHNOLOGY

Certificate of Completion: Welding Technology

Credit Hours Required: 34

The State of North Dakota is in dire need of professional welders. The NHSC welding program provides students with the basic welding skills needed for entry-level welding jobs and apprenticeship programs.

Program Learning Outcomes (PLOs):

- Synthesize all welding positions (flat, horizontal, vertical, overhead, pipe) with the six basic welding processes.
- Exhibit the fundamentals of welding/cutting processes and application.
- Read and interpret basic blueprints, welding symbols, and welding codes and specifications.
- Indicate the ability to compute basic math skills to include fractions, decimals and measurements.
- Illustrate proper welding safety procedures and communicate written safety policies.

General Education Requirement:

GPE 104 OSHA 10 Safety	1
HPER 210 First Aid/CPR	1
SOC 100 E-Portfolio/Job Seeking Skills	1
NAS 099 Into to History of the TAT	1

COURSE DESCRIPTIONS

ACCOUNTING (ACCT)

199 Special Topics

0.5-4 CREDITS

Subjects and credits will vary.

200 Elements of Accounting I

3 CREDITS

An introductory course in the fundamental procedures of accounting, including recording of transactions, account classification, book of original entry, special journals, closing procedures, and financial statements.

201 Elements of Accounting II

3 CREDITS

A continuation of Accounting I with more study applied to accounting for notes and interest, inventory and plant assets, payroll systems, partnerships, and corporations. Prereq: ACCT 200

205 Cost Accounting

3 CREDITS

This course includes study applied to commonly used cost accounting systems, such as job order costing and process cost accounting. Where applicable, this course will provide a provision for graduation project. Prerequisite: ACCT200 or equivalent.

215 Business in Legal Environment

3 CREDITS

This course includes contracts, agencies, employment and negotiable instruments.

299 Special Topics**

0.5-4 CREDITS

Subjects and credits will vary.

**Course offered only as needed

321 Managerial Accounting

3 CREDITS

Topics covered in this course include personnel policies, programs and procedures, standards, employment, staffing, wage and salary administration, personnel laws, and personnel research. Prerequisite ACCT 201.

ADDICTION STUDIES (ADS)

210 Introduction to Practical Pharmacology in Addiction and Recovery

3 CREDITS

This course is an introduction to pharmacological aspects of addiction, recovery, and behavioral therapies in the treatment of substance use disorders.

215 Ethical & Legal Issues in the Substance Abuse Profession

3 CREDITS

This course will explore the ethical and legal issues within the substance abuse field. The student will identify and discuss ethical and legal issues frequently encountered by treatment professionals.

220 Alcohol/Drug Helping Skills & Lab

4 CREDITS

Introduce the student to multicultural counseling skills and theory. The course will help in the development of basic communication and individual helping skills appropriate in the dynamics of dealing with abusers of alcohol and other drugs.

222 Alcohol & Drug Group Interaction & Lab

4 CREDITS

Introduces basic dynamic of counseling group interaction theory. The student will develop facilitative skills directed toward working with groups in the management of alcohol and drug abuse.

223 Alcohol and Drug Treatment Continuum

3 CREDITS

This course will emphasize continuum of addiction treatment care. The student will explore Screening, Assessment, and Engagement, Treatment Planning, Collaboration, and Referral, Counseling, and Professional and Ethical Responsibility. The student will be introduced to International Credentialing & Reciprocity Certification & Reciprocity Consortium credentialing criteria for certification under the Great Plains Tribal Chairman's Health Board Behavioral Health & Recovery.

ANIMAL & RANGE SCIENCE (ARSC)

098 Fundamentals of Horsemanship

1 CREDIT

Basic grooming, saddling, bridling, mounting, groundwork, correct riding position, and proper coordination of the riding aids will be addressed. Lab Fee \$25.00

123 Feeds and Feeding

3 CREDITS

This course covers the principles of feeding livestock including digestive systems, nutrient requirements, nutrient characteristics, and sources utilized in the formulation of balanced rations. Lab Fee \$25.00

155 Natural Horsemanship: Gaining Confidence & Respect

2 CREDITS

Students will gain an understanding of the basic concepts of natural horsemanship, first via groundwork, and then riding. Using a natural approach, the student will learn and implement a number of basic maneuvers to gain the horse's respect and confidence. These activities will increase the student's awareness of safety issues around horses and will increase the student's ability to read the horse's body language. The student will begin to

understand the importance of feel, timing, and balance when working with horses. The student will learn safe and efficient saddle techniques and how to safely mount the horse. In the saddle, the student will learn the fundamentals of rein position and will practice control of the horse in the gaits of walk and trot. In addition to mastery of the theory and ideology of natural horsemanship, students must also demonstrate their competency and mastery of covered techniques by their correct application of skills sets with their horse both on the ground and under saddle. Students will demonstrate their understanding of course material via class participation, written field and research reports, and examinations. 2 three-hour laboratories. Lab Fee \$25.00

161 Equine Business Management

3 CREDITS

Students will study the forms of business, income tax considerations, develop a business plan, insurance considerations, liability programs, records, hobby versus a business, agreements and contracts.

164 Equine Behavior, Groundwork and Safety

2 CREDITS

This class includes understanding mental capacity, motivation, and reactions of horses to different training techniques. Proper restraining procedures to protect the horse and handler are explored. Imprinting training for a foal is discussed. Natural Horsemanship groundwork will be demonstrated. A safety program will be designed for breeding or training operation. Lab Fee \$25.00

210 Introduction to Equine Assisted Services

3 CREDITS

This course is designed as Part I of a two-course series ARSC210 – Intro to Equine Assisted Services and ARSC310 - Principles of Equine Assisted Services. This course is for participants to gain an introductory understanding of the Equine Assisted Services (EAS) field and its application within education, facilitation, coaching, mental health, and physical therapy fields. The course will address theories that helped inform and develop the practice of

EAS, the history and development of the field, as well as considerations of elements of safe, effective, ethical practice. Students will become familiar with current research, supporting professional organizations, practitioners, and programs relevant to their area of focus, as well as issues facing the field. 1 two-hour lecture and 1 two-hour laboratory. Lab Fee \$25.00

236 Introduction to Range Management

3 CREDITS

This course covers the principles of range management, which include plant identification, range evaluation, and range improvement.

252 Natural Horsemanship: Building a Relationship

2 CREDITS

In this course, the student will learn how to get the horse to respond at a new level. In ARSC 155, the goal was to develop respect and confidence. The student will develop more feel, better timing, and more harmony with the horse. The student will learn about impulsion and how to use reins less and the seat more while in the saddle. In addition to mastery of the theory and ideology of natural horsemanship, students must also demonstrate their competency and mastery of covered techniques by their correct application of skills sets with their horse, both on the ground and under saddle. If time permits, students will refine that respect and confidence to build a connection that will be tested by work at liberty (without a lead line and halter). Students will demonstrate their understanding of course material via class participation, written field and research reports, and examinations. 2 three-hour laboratories. Pre-Req: ARSC 155, Lab Fee \$25.00

254 Natural Horsemanship: Harmony with your Horse I

3 CREDITS

The primary objective of this course will be to take the skills and knowledge learned in ARSC 155 and ARSC 252 and further develop these skills so that the horse and the human achieve positive reflexes. Students will progress to using a higher level of communication on the ground and

see more of the relationship from ground to saddle. In the saddle, students will get harmony with the horse and gain knowledge of a horse's self-carriage and impulsion. The student will learn impulsion programs and the different patterns of different gaits. Students will also learn about the importance of "seat connection" while riding a horse and the importance of rein and feet connection. In addition to mastery of the theory and ideology of natural horsemanship, students must also demonstrate their competency and mastery of covered techniques by their correct application of skill sets with their horse, both on the ground and under saddle. Students will demonstrate their understanding of course material via class participation, written field and research reports, and examinations. 3 three-hour laboratories. Pre-Req: ARSC155, Lab Fee \$25.00

255 Natural Horsemanship: Harmony with your Horse II

3 CREDITS

Entering into this course, a student should have a thorough understanding of and have competent abilities both on the ground and in the saddle. The student will advance the skills, confidence, and respect gained on the ground by creating a stronger lead rope-to-feet connection. In the saddle, the horse and rider will develop more emotional collection, improving impulsion, and self-carriage in all three gaits. The increased harmony between ground connection developed through increased harmony between the horse and rider will prepare them for the next level of refinement. In addition to mastery of the theory and ideology of natural horsemanship, students must also demonstrate their competency and mastery of covered techniques by their correct application of skill sets with their horse, both on the ground and under saddle. Students will demonstrate their understanding of course material via class participation, written field and research reports, and examinations. 3 three-hour laboratories. Pre-Req: ARSC 254, Lab Fee \$25.00

260 Introduction to Equine Studies

2 CREDITS

This course provides a comprehensive overview of the horse as a unique species, integrating biological, behavioral, and industry perspectives. Students will explore equine anatomy, physiology, nutrition, reproduction, genetics, health management, and behavior, while also examining current trends and career opportunities in the equine industry. Emphasis is placed on understanding the scientific principles underlying equine care, wellness, and performance.

260L Equine Care & Management Lab

1 CREDIT

A laboratory course designed to supplement lecture material covered in ARSC 260. Students will learn management and husbandry skills relevant to modern horse care practices. 1 two-hour laboratory. Lab Fee \$25.00

261 Basic Equitation & Horsemanship

1 CREDIT

This course introduces students to the fundamentals of horsemanship and equitation, with an emphasis on the principles of equine and rider biomechanics. Students will develop foundational riding skills, learn safe horse handling practices, and explore how posture, balance, and movement patterns in both horse and rider affect performance, communication, and welfare. Through mounted and unmounted instruction, students will analyze gait mechanics, rider position, and equipment fit, integrating theory with hands-on application. The course emphasizes safety, correct technique, and a science-based understanding of the horse-rider partnership. 1 two-hour laboratory. Lab Fee \$25.00

262 Equine Marketing

2 CREDITS

Students will study methods of marketing horses and horse-related activities. Methods of marketing a breeding program will be covered, as well as preparing and marketing the individual horse, horse businesses including training programs, equine assisted services, and

equine events. Technology and current marketing methods, including graphic design, website development, and social media will be utilized. Additionally, fundamentals of previous classes will apply techniques towards hosting equine related events and preparing and marketing a horse for a sale.

265 Great Plains Indian Horsemanship

2 CREDITS

This course examines the importance of the horse in Native American culture in history and in the present. Students will learn traditional and contemporary Native relational horsemanship techniques.

297 Equine Training Techniques

3 CREDITS

This class is designed to teach the student the fundamentals of training a horse to be soft, supple and responsive. It will teach the student how to use the entire body to guide a horse and how to become part of the horse instead of just a passenger. Pre-requisite: ARSC 164 & 261. Lab Fee \$25.00

298 Agriculture Internship

3 CREDITS

This course provides the student with the opportunity to experience their chosen field firsthand through practical, hands-on training in a tribal food systems-related, equine, or other agriculture-based operation. The student's advisor will approve the location. Grade is based on work performance, regular reports, and on-site supervisor's evaluation. Credits are earned based on the number of hours worked per semester.

299 Equine Practicum

1-3 CREDITS

This course offers individualized instruction to support equine studies students in meeting mid-term and final program benchmarks. Emphasis is placed on advancing horsemanship skills and developing effective methods for teaching horsemanship concepts to youth. Pre-Req: ARSC

261 – Basic Horsemanship or instructor approval. Lab Fee \$25.00.

310 Principles of Equine Assisted Services

3 CREDITS

This course is designed for participants to gain a comprehensive understanding of the Equine Assisted Services (EAS) field and its application within education, facilitation, coaching, mental health, and physical therapy fields. The course will address theories that helped inform and develop the practice of EAS, the history and development of the field, as well as considerations of elements of safe, effective, ethical practice. Students will become familiar with current research, supporting professional organizations, practitioners and programs relevant to their area of focus, as well as issues facing the field. 1 two-hour lecture and 1 two-hour laboratory. Lab Fee \$25.00

311 Trauma-Focused Equine Assisted Services

3 CREDITS

This course is designed for participants to gain a comprehensive understanding of trauma and its effect on brain function and how horses can play a role in healing from trauma. Students learn about Trauma-Focused integration into the Equine Services fields and its applications within education, facilitation, coaching, mental health and therapy.

360 Equine Nutrition & Care

3 CREDITS

This course focuses on the principles and practices of feeding and managing horses for optimal health, performance, and longevity. Students will examine the digestive physiology of the horse, nutrient requirements at various life stages, feed types and quality, ration formulation, and common nutritional disorders. Emphasis is placed on evaluating and developing feeding programs based on scientific research and individual horse needs. The course also explores how targeted nutritional strategies support proper care, enhance performance, and aid in the management or prevention

of specific health conditions. Laboratory activities and case studies reinforce concepts through practical application in real-world scenarios. Lab Fee \$25.00

361 Intermediate Equitation and Horsemanship

1 CREDIT

This course is a continuation of ARSC 261. Further emphasis will be placed on the development of the balanced seat and coordinated aids necessary to complete more advanced maneuvers. Pre-requisite: ARSC 261. 1 two-hour laboratory. Lab Fee \$25.00

362 Young Horse Starting & Development

3 CREDITS

Principles and application of techniques required to train a young horse to ride. 3 three-hour laboratories. Pre-requisite: ARSC 252, Lab Fee \$25.00

365 Natural Horsemanship Methods

3 CREDITS

Students will learn to develop respect, confidence, and connection with their horse that will be tested by work at liberty (without a lead line and halter). Students will develop feel, timing, and harmony with the horse. The student will learn about impulsion and how to use reins less and the seat more while in the saddle. In addition to mastery of the theory of natural horsemanship, students must also demonstrate their competency and mastery of covered techniques by their correct application of skills sets with their horse, both on the ground and under saddle. 3 three-hour laboratories. Pre-Req: ARSC 164 or ARSC 155, Lab Fee \$25.00

411 Equine Assisted Services Practicum

1-3 CREDITS

In this practical teaching course, students will team teach for 6-12 weeks with an Equine Assisted Services certified instructor at a local program, assisting with lesson plans and program plan development, as well as instruction and evaluation of students. Lab Fee \$25.00

ART (ART)

120 Painting

3 CREDITS

This course will give the students a chance to explore their art talents in the area of painting. Working with tempera, acrylic and oil paints, the students can expand their capabilities from mixing colors to producing landscapes, still life and action products in paint. Lab Fee \$75.00

130 Drawing I

3 CREDITS

Study and practice of observational drawing focusing on accurate representation of observed subject matter. Perception, hand-eye control, measures and proportion, light and shadow, and design elements emphasized. Lab Fee \$25.00

199 Special Topic

0.5-4 CREDITS

Subjects and credits will vary.

ARTIFICIAL INTELLIGENCE (AI)

100 Introduction to AI

3 CREDITS

This course provides a foundational overview of artificial intelligence (AI) and its applications across various industries. Students will explore core AI concepts, including machine learning, neural networks, natural language processing, and robotics. The course emphasizes hands-on experience with AI tools and techniques, offering practical exercises and projects to reinforce learning. Through lectures, case studies, and lab work, students will develop an understanding of how AI technologies are transforming fields such as healthcare, finance, and engineering. By the end of the course, students will be equipped with the knowledge to critically evaluate AI solutions and their impact on society,

preparing them for further study or entry-level roles in the AI field.

ASSESSMENT (ASMT)

200 Assessment of Student Learning

1 CREDIT

This culmination course provides non-bachelor students with the opportunity to reflect on their courses and academic journey. It provides a platform to showcase their experiences and academic achievements to a panel of academic advisors, educators, and the campus community in the form of a presentation, project, paper, or similar assessment. Part of the course will focus on preparation for the future, including preparing for graduation by completing the Graduation Application, Graduation Survey, as well as career preparatory tasks: resume writing, interview skills, and professional communications related to individual career goals. Course Fee \$80

AVIATION TECHNOLOGY (AVIT)

126 Introduction to UAS

2 CREDITS

This course of instruction introduces the student to the history of Remotely Piloted Aircraft and their current and future development for use in a burgeoning civil industry. Specific blocks deal with aircraft, ground, communications, launch and recovery systems while emphasizing human integration into the overall system.

238 UAS Operator Certification

3 CREDITS

This course will develop the students' knowledge and skills needed to manage and operate small remotely piloted aircraft. Course content includes Federal Aviation

Regulations, airspace authorization criteria, and operational approval requirements. Mission employment skills will be acquired through both classroom and hands-on flight activities. Flight activities will include launch and recovery operations, emergency procedures, plus mission planning and execution. Students must complete the appropriate UAS flight lessons to satisfactorily complete the course. Pre-requisite: AVIT 126

333 UAS Remote Sensing

4 CREDITS

This course will develop the students' knowledge and skills needed to manage and operate small remotely piloted aircraft. Course content includes Federal Aviation Regulations, airspace authorization criteria, and operational approval requirements. Mission employment skills will be acquired through both classroom and hands-on flight activities. Flight activities will include launch and recovery operations, emergency procedures, plus mission planning and execution. Students must complete the appropriate UAS flight lessons to satisfactorily complete the course. Pre-requisite: AVIT 126

BIOLOGY (BIO)

111 Concepts of Biology

4 CREDITS

A survey of living things and their biological relationships. Provides general knowledge and cultural appreciation of contemporary biology. Includes laboratory and field activities. Offered as needed. Lab Fee \$25.00

124 Environmental Science

4 CREDITS

A study of the relationship of humans to their environment, including major environmental problems facing mankind today. Includes laboratory and field activities. Offered Spring. Lab Fee \$25.00

150 General Biology I

4 CREDITS

Basic biological concepts include the fundamental processes of cells and life systems, genetics, and evolution. Includes laboratory. Offered Fall. Lab Fee \$25.00

151 General Biology II

4 CREDITS

A continuation of Biology I with an emphasis on plant and animal classification and relationships. Includes laboratory. Prerequisite: BIO 150. Offered Spring. Lab Fee \$25.00

199 Special Topics

0.5-4 CREDITS

Subjects and credits will vary. Offered as needed.

202 Intro to Microbiology

4 CREDITS

This course will familiarize students with classification, recognition, production, and control positive and negative impacts of all types of microorganisms. Includes laboratory. Prerequisite: BIO 150 or consent of instructor. Offered Spring. Lab Fee \$25.00

206 Ethnobotany

4 CREDITS

Observation, identification and classification of native North Dakota plants with emphasis on structural, edible and medicinal uses by Tribal Nations past and present. Includes laboratory and field activities. Offered Fall of even-numbered years.

220 Anatomy and Physiology I

4 CREDITS

Course is a general survey of the human body systems and their functions including an introductory study of cells and tissues, chemical processes, anatomical terminology, and skeletal, muscle, and nervous systems and functions. Includes Laboratory. Prerequisite: BIO 150

or consent of instructor. Offered Fall semester. Lab Fee \$25.00

221 Anatomy and Physiology II

4 CREDITS

Course is a general survey of the human body systems and their functions including an introductory study of the nervous systems, endocrine system, blood, immune, cardiovascular, respiratory, digestive, urinary, reproductive systems, and pregnancy and human development. Includes Laboratory. Prerequisite: BIO 220 or consent of instructor. Offered Spring Semester. Lab Fee \$25.00

225 Research Methods

3 CREDITS

This course introduces basic physical and biological field measurements. Students will learn to use appropriate equipment to identify, quantify, and record resources in the field. Offered Fall.

230 Field Research

3 CREDITS

The student will identify a specific problem related to the field of his/her interest within Environmental Science. He/she will conduct a literature review, design a research project, and collect field data related to that problem. An oral presentation of the report is required. Prerequisite: BIO 225. Offered Spring.

297 BIO Environmental Science Internship

2 CREDITS

This course provides the student an opportunity to experience environmental science in the workplace in conjunction with their program of study. One semester hour of credit will be earned for each 45 contact hours of internship. The student's advisor will approve the location. Prerequisite: Must be completed during last two semesters of Environmental Science degree plan and must have consent of the instructor. Offered Spring.

299 Special Topics

0.5-4 CREDITS

Subjects and credits will vary. Offered as needed.

316 Global Climate Change

3 CREDITS

Overview of the basic concepts, issues and policies related to climate change comparing global issues with regional problems related problems and solutions. Prerequisite: GEOL 100. Offered Spring of even-numbered years.

324 Ecology

4 CREDITS

Overview of the principles governing the interrelationship between plants, animals, and environments. Emphasis is on ecological communities throughout North America. Includes laboratory and field activities. Prerequisite: BIO 150 or consent of instructor. Offered Fall of even-numbered years.

331 Soil Ecology

3 CREDITS

This course engages students with the principles of soil-plant-animal interactions and their influences on environmental and agricultural issues of global significance (e.g., sustainable agriculture, global climate change, diversity conservation). Pre-requisite SOIL 210. Offered Spring of odd-numbered years.

350 Freshwater Ecology

4 CREDITS

Students will learn the biological, chemical, and physical characteristics of inland waters including origins, interrelationships and the effect of civilization. Topics covered will include rivers, lakes, reservoirs, and wetlands. Includes Laboratory. Prerequisites: Biology 150, Biology 151. Offered Summer of odd-numbered years. Lab Fee \$25.00

370 Zoology

4 CREDITS

Students will be introduced to the natural history, classification, anatomy and physiology of vertebrates and invertebrates. Includes methods of observing, identifying, and collecting local vertebrates and invertebrates. Includes laboratory. Pre-requisite: BIO 150 or by permission of the instructor. Offered Fall of odd-numbered years. Lab Fee \$25.00

388 Native American Ecological Knowledge

3 CREDITS

This course is based mainly on the traditional knowledge of the Mandan, Hidatsa, and Arikara in determining our holistic relationship to our universe. The course will examine how we apply our knowledge of a networked universe to develop reciprocal relationships within our existence. Offered as needed.

420 Air and Water Quality

4 CREDITS

The course will acquaint students with sources, dispersion patterns, effects, and regulations of air and water pollutants. Sampling and analysis of air and water pollutants included during lab. Includes laboratory. Prerequisite: BIO 150 or consent of instructor. Offered Fall of even-numbered years. Lab Fee \$25.00

422 Environmental Law

3 CREDITS

A survey of the laws related to natural resources use and management at local, state, tribal and federal levels. Offered Fall of odd-numbered years.

431 Wildlife & Fisheries Conservation & Management

3 CREDITS

In this course, students will study the management of fish, wildlife, and other populations. Students will apply principles from various sub-disciplines of the biological and social sciences to current conservation problems. The course will examine topics such as predation, wildlife and ichthyological diseases, carrying capacity, and the

history of wildlife conservation and management. The focus will be on species located on Fort Berthold, both historically and presently, as well as Mandan, Hidatsa, and Arikara cultural beliefs and practices. Pre-requisite: BIO 150, BIO 324, or consent of the instructor. Offered Summer of even-numbered years.

444 Grassland Ecology

3 CREDITS

This course covers the plant, animal, and environmental factors which relate to management, productivity, and utilization of forage and grassland plants. Morphological and physiological characteristics of plants will form the basis for managing and understanding plant responses to management and environmental influences. Interactions between herbivores, Humans, and plants will be discussed. Pre-requisite: BIO 151 and SOIL 210. Offered Spring of odd-numbered years.

460 TAT Environmental Issues, Beliefs, and Ethics

3 CREDITS

Understand and examine the methods of perceiving and strategizing environmental issues of concern for Mandan Hidatsa and Arikara Nation. This course will focus cultural beliefs and ethics concerning environmental issues as they relate to current energy development and its environmental impact. Other general environmental topics related to natural resource development will also be addressed. As the issues are clarified the potential for energy and resource perspectives will allow for strategic planning for long term sustainable scenarios to be summarized. Collaboration and research will be done with student groups and faculty projects to be developed in the class with the collaboration and review of environmental agencies and other university sources. Cultural input will be part of the collaborative efforts of this dynamic, interdisciplinary and problem-solving science course. Pre-requisite: BIO 422 or by permission of the instructor. Offered Fall of even-numbered years.

493 Senior Research**3 CREDITS**

This course involves students in experimental design, field or lab experimentation, data analysis, and conclusions. Prerequisite: Senior status and approval of advising instructor and Department Chairperson. Offered Spring of odd-numbered years.

**Course offered only as needed

**BUSINESS ADMINISTRATION
(BADM)**

120 Introduction to Business**3 CREDITS**

Acquaints the student with the American Capitalist model, as well as the systems used by other countries. This course will also provide an overview of all business-related activities.

170 Entrepreneurship – Journey into Business**3 CREDITS**

This is an introductory course focusing on understanding the characteristics and role of the entrepreneur. This course is specifically focused on developing Native American entrepreneurs and is taught in the context of starting or running a business ownership in Indian Country. Students will develop an awareness of the opportunities for business ownership and develop some skills needed to effectively run a business. A capstone project will allow students to develop a business plan for a venture of their choosing.

199 Special Topics**0.5-4 CREDITS**

Subjects and credits will vary.

201 Principles of Marketing**3 CREDITS**

This course is an introduction to the distribution of goods and services and marketing policies.

202 Principles of Management**3 CREDITS**

This course presents the fundamentals of the management process, focusing on the concepts and techniques basic to the manager, including planning, organizing, staffing, leading, and controlling.

206 Writing a Business Plan**2 CREDITS**

This course focuses on the business plan as a blueprint that entrepreneurs must develop to enhance the chances of launching their ventures successfully. Prerequisite: BADM 205

219 Entrepreneur Management – Growing a Business**3 CREDITS**

Content includes how to plan, organize, manage, and grow an entrepreneurial business. Students will continue to build on skills learned in BADM 170, but with more of a focus on growing and improving an existing business. The course will review and enhance aspects of a business plan, such as financial projections, cash flow, marketing human resource development, ethics, risk management, pricing, advertising, promotion, and more. Emphasis on Native American culture and heritage.

281 Organizational Behavior**3 CREDITS**

This course emphasizes individual and group behavior within an organizational structure.

291 Leadership Development**3 CREDITS**

This course provides students with opportunities to engage in leadership development activities through membership in NHSC's American Indian Business Leaders chapter, a nationally chartered student leadership

organization focusing on civic responsibility, academic excellence, social and cultural awareness, career development and personal growth through team building, mentoring and networking.

297 Business Internship

3 CREDITS

This course allows the student to experience their chosen field firsthand through practical, hands-on training in a business related to marketing, management, the various business administrative fields, and casino/hotel/restaurant operations.

299 Special Topics

0.5-4 CREDITS

Subjects and credits will vary.

301 Principles of Management

3 CREDITS

This course focuses on the nature of management, the evolution of management thought, strategic management and planning concepts, decision making and creative problem solving, and motivation and leadership in a changing environment.

303 Human Resource Management

3 CREDITS

Topics covered in this course include personnel policies, programs and procedures, standards, employment, staffing, wage and salary administration, personnel laws, and personnel research.

304 Small Business Management

3 CREDITS

Focuses on the problems encountered by small business owners. Also provides a general guideline to small business start-ups. Topics include financing, location, credit & collection, legal requirements, etc.

Prerequisite: BADM 120

307 International Business

3 CREDITS

International Business introduces conceptual and operational problems of participating in international business. Coverage includes a study of managerial, marketing, financial, accounting, legal, economic, and cultural environments in foreign markets for the conduct of world business.

321 Principles of Marketing

3 CREDITS

This course acquaints students with the principles, concepts and perspectives underlying marketing functions, including the conception, pricing, promotion, and distribution of products, services, and ideas, and the role of marketing in society.

353 Business Finance

3 CREDITS

This course will introduce the student to the essentials of financial management. Coverage includes financial analysis, working capital management, capital budgeting, cost of capital, dividend policy, and long-term financing decisions. Prerequisites ACCT 201 and MATH 210.

340 Project Management

3 CREDITS

This course introduces the concepts, processes, and knowledge areas of project management as a means of complementing and integrating with other management disciplines. The course objectives are that students will develop an understanding of concepts, processes and knowledge areas critical to successful project completion, along with the development of their own project plan. Students will also identify and recognize the factors that cause projects to exceed budget, time limitations, and generally fail to meet stakeholder expectations.

401 Tribal Enterprises

3 CREDITS

This course provides a framework for understanding historical and contemporary Tribal business, leadership, governance, and economic development. Students will gain an understanding of the role and responsibilities of a tribal planner or program director who may function as a

grant writer, a grant researcher, a project manager, or a development specialist.

406 Business Ethics

3 CREDITS

In this course, students will study ethical issues faced by businesses including distributive justice, capitalism, decision-making, corporate responsibility, corporate morality, governance, whistleblowing, hiring policies, codes of ethics, advertising, safety, pollution, and foreign business practices. Prerequisites: BADM 301 Principles of Management.

416 Operations Management

3 CREDITS

Operations Management introduces the concepts, issues, and problems of operations management and the management of the production function. Problems are analyzed and solutions are recommended. Microcomputer applications are addressed.

465 Strategic Management

3 CREDITS

Strategic management is an analysis of the objectives of business firms and the development and evaluation of strategies and policies designed to meet these objectives. Cases are emphasized.

489 Entrepreneurship and Business Venture

3 CREDITS

This course focuses on entrepreneurship, new venture creation, and the completion of a business plan. The business plan applies principles, concepts, and a framework to real-world solutions.

498 Business Capstone

3 CREDITS

This Business capstone course is an integrative course that brings together the theory and practice of business school education. It will consist of a final project related to a real-world setting and the application of learned skills and methods to develop a solution related to a business challenge in the local, national, or global business environment. The project may be research-based or oriented toward problem-solving. The project will be reviewed by a panel of academic advisors, faculty, and peers.

BUSINESS INFORMATION TECHNOLOGY (BIT)

220 Management Information Systems

3 CREDITS

This course is designed to provide an introduction to systems and development concepts, technology acquisition, and various types of application software that have become prevalent or are emerging in modern organizations and society. Also introduces students to contemporary information systems and demonstrates how these systems are used throughout global organizations. The focus of this course is on the key components of information systems - people, software, hardware, data, and communication technology, and how these components can be integrated and managed to create competitive advantage.

BUSINESS, OFFICE, TECHNICAL EDUCATION (BOTE)

102 Keyboarding I

3 CREDITS

Emphasis is placed on the development of correct stroking techniques using the typewriter and/or microcomputer keyboard. Proficiency in the application of these skills will be used to complete simple letters, manuscripts, and tables. Lab Fee \$20.00

147 MS Word

3 CREDITS

This course will provide hands-on experience using Word for Windows. Students will learn to create, edit, save, and print documents, along with advanced word processing features.

152 Keyboarding II**3 CREDITS**

This course is designed for students who type less than 40 words per minute but have a basic knowledge of the keyboard. Emphasis is placed on business letters, reports, tables, and speed development. Prerequisite: BOTE 102 or Equivalent. Lab Fee \$20.00

188 Computerized Accounting**3 CREDITS**

Accounting applications utilizing the computer. This course will include programs for journalizing, accounts receivable, accounts payable, inventory and payroll. Prerequisite: ACCT 200 or equivalent. Lab Fee \$10.00

199 Special Topics**0.5-4 CREDITS**

Subjects and credits will vary.

202 Keyboarding III**3 CREDITS**

This course is devoted to the acquisition of superior skills in typing, proofreading, and speed development. Prerequisite: BOTE 152. Lab Fee \$20.00

210 Business Communications**3 CREDITS**

The study and practice of writing for results. All types of business correspondence are included. This includes letters, memorandums, reports, as well as preparation of resumes and job applications.

217 Records Management**2 CREDITS**

This course will provide an introduction to the principles and practices of record management. The four basic filing systems: alphabetic, subject, numeric, and geographic will be covered.

247 Spreadsheet Applications**3 CREDITS**

This course will provide students with hands-on experience using Excel for Windows. The student will be using Cengage/MindTap platform. Prerequisite: BOTE 102 or Equivalent. Lab Fee \$10.00

257 MS Access**3 CREDITS**

This course will include hands-on operation of the computer, to introduce the student to the planning and designing of a database system using software for database management. Prerequisite: BOTE 102 or Equivalent. Lab Fee \$10.00

275 Office Procedures**3 CREDITS**

Office procedures is a course designed to help the student become familiar with the activities and duties required of an office worker of today. Students will learn procedures for good office communications, using reference materials, proofreading techniques, telephone usage, and mail and work procedures. Where applicable, this course will provide a provision for a student's graduation project. Lab Fee \$10.00

299 Special Topics**0.5-4 CREDITS**

Subjects and credits will vary.

****Course offered only as needed**

CHEMISTRY (CHEM)

115 Introductory Chemistry**4 CREDITS**

Introduces students to basic principles and concepts of chemistry. Topics include atomic theory, stoichiometry, bonding and nuclear chemistry. Includes laboratory.

Prerequisite: MA 102 or consent of instructor. Offered Fall. Lab Fee \$25.00

116 Introduction to Organic and Biochemistry

4 CREDITS

Study of carbon Chemistry. Functional groups, bonding and uses, with special emphasis on applications to living systems. Includes laboratory. Prerequisite: CHEM 115 or consent of instructor. Offered as needed.

121 Chemistry I

4 CREDITS

An introduction to the principles of chemistry, including the scientific method and problem-solving, atomic theory, elements and compounds, stoichiometry, and equations. Includes laboratory. Offered Fall. Lab Fee \$25.00

122 Chemistry II

4 CREDITS

A continuation of Chemistry I with an emphasis on bonding and molecular structures, equilibrium, and thermodynamics. Introduces organic and biochemistry. Includes laboratory. Prerequisite: CHEM 121. Offered Spring. Lab Fee \$25.00

199 Special Topic

0.5-4 CREDITS

Subjects and credits will vary. Offered as needed.

240 Survey of Organic Chemistry

4 CREDITS

This course covers the structure, nomenclature, preparation, stereochemistry, mechanisms, and reactions of organic compounds. CHEM 240 is designed to prepare students who require one semester of organic chemistry for specific programs or prepare for higher level organic chemistry courses. Lab Fee: \$25.00. Prerequisite: CHEM 121, CHEM 122

299 Special Topic

0.5-4 CREDITS

Subjects and credits will vary. Offered as needed.

360 Elements of Biochemistry

4 CREDITS

Study of major classes of biological compounds, anabolism and catabolism of macromolecules, enzyme kinetics, intermediary metabolism, and control mechanisms. Emphasis on human nutritional biochemical processes. Lab Fee \$25.

Pre-requisites: BIO 150, BIO 151

421 Environmental Chemistry

3 CREDITS

In this course, students will understand and examine the environment at the chemical and biological micro and macro levels as a natural and modified system. Topics will include contamination by anthropomorphic sources of the water, soil, and air, as well as environmental processes involving the fate and distribution of natural compounds and pollutants. Toxicology will be discussed in regard to the effects of those elements or compounds which threaten the diverse ecological systems as well as the poisonous effects on man. Pre-requisites: BIO 124, CHEM 121, CHEM 122

**Course offered only as needed

COMMUNICATION (COMM)

110 Fundamentals of Public Speaking

3 CREDITS

This course concentrates on important elements of public speaking. It includes instruction in basic concepts and techniques, which enable students to design and effectively deliver a variety of speeches.

COMPUTER INFORMATION SYSTEMS (CIS)

232 Graphic Design I 3 CREDITS

At the completion of this course the student should have a basic knowledge in using the Adobe Photoshop software. They will learn how to manipulate photographs using various Photoshop techniques. Includes laboratory. Lab Fee \$25.00

COMPUTER SCIENCE (CSCI)

101 Introduction to Computers 3 CREDITS

A basic study of computer science. Students will understand the architecture of personal computers as well as the various applications for different hardware and software components.

102 Computer Basic and Hardware 3 CREDITS

This course is designed to meet the needs of students who want to prepare to support desktop and laptop computers as well as mobile devices. The course helps equip learners with the knowledge and skills needed to be IT professionals and to prepare learners to take the CompTIA A+ exam (Exam 220-901). While teaching the fundamentals of hardware and IT technical support using CompTIA A+ exam objectives as its framework, the course reflects current technology, techniques, and industry standards in this dynamic, fast-paced field of IT technical support. The course covers updated hardware, mobile devices and network troubleshooting. Those seeking to pass the CompTIA A+ certification exams will find the course approach and content especially helpful. All CompTIA A+ 220-901 exam objectives are covered in the course.

103 Networking and Troubleshooting 3 CREDITS

This course is designed to help students understand and explore computer networks, with special focus on computer network and system architecture, addressing, naming, forwarding, routing, and communication networks. Besides the theoretical foundations, students are encouraged to acquire practical experience by using Testout network pro or CompTIA n+ labs. Also, will prepare students who want to obtain network certification.

104 Operating System and Technologies 3 CREDITS

This course is designed to help students learn, understand, explore, and provide a basic clear description of the concepts that underline operating systems. Operating systems are an essential part of any computer system. Similarly, this course on operating systems is an essential part of any computer-science education. This field is undergoing rapid change, as computers are now prevalent in virtually every application, from games for children through the most sophisticated planning tools for governments and multinational firms. This course will use examples of many real-world operating systems to illustrate fundamental operating-system concepts. However, particular attention is paid to Microsoft family of operating systems (including Windows Vista, 2000, XP, 7 & 10) and various versions of UNIX (including Solaris, BSD, and Mac OS X). Will also provide a significant amount of coverage of the Linux operating system reflecting the most recent version of the kernel.

105 Software Troubleshooting and Security 3 CREDITS

This course comprehensively covers the skills and knowledge necessary for effective software troubleshooting and security in a professional IT environment. Participants will gain insights into the responsibilities of application administrators, along with strategies for designing, securing, and maintaining software systems. The course will also explore key

security aspects, disaster recovery, and practical troubleshooting techniques.

106 Introduction to Cyber Security

3 CREDITS

This introductory course covers the fundamental principles and practices of cybersecurity, including various types of cyber threats, vulnerabilities, and attacks. Students will learn about cryptography, network security, risk management, ethical hacking, and incident response through hands-on labs and real-world case studies. The course aims to equip students with practical skills in identifying and mitigating security risks. By the end of the course, students will have a foundational understanding of cybersecurity concepts, preparing them for further study or entry-level roles in the field. No prerequisites are required for this 3-credit course.

160 Computer Science I

4 CREDITS

This course introduces core programming basics—including data types, control structures, algorithm development, and program design with functions—via the Python programming language. Prerequisite: CSCI 101; Offered: Fall.

161 Computer Science II

4 CREDITS

It's a continuation of CSCI 160 that emphasizes more advanced programming language features and basic data structures. Prerequisite: CSCI160; Offered: Spring.

213 Modern Software Development

3 CREDITS

This course introduces a breadth course on the software engineering process. Basic concepts are reviewed, and some methods for each type of activity are explained and experienced. Prerequisite: CSCI 161 or instructor consent; Offered: Fall.

299 Special Topics**

0.5-4 CREDITS

Subjects and credits will vary.

**Course offered only as needed

ECONOMICS (ECON)

199 Special Topics

0.5-4 CREDITS

Subjects and credits will vary.

201 Microeconomics

3 CREDITS

Micro-principles of supply and demand, as well as resource allocations in an enterprise system, developed and applied to the distribution of income, problems of capitalist system, technology, growth, and the world economy.

202 Macroeconomics

3 CREDITS

Fundamental principles of Macro-Economics and their present-day application, including the scope of economics, analysis of supply and demand, monetary policy, and economic stability.

299 Special Topics**

0.5-4 CREDITS

Subjects and credits will vary.

**Course offered only as needed

EARLY CHILDHOOD EDUCATION (EC)

210 Introduction to Early Childhood Education

3 CREDITS

This course investigates the theories that influence the field of early childhood education. Developmentally

appropriate methods and teaching materials will be covered, as well as the need for a variety of strategies that aid in the children's physical, social, emotional, aesthetic, and cognitive development. The course content will emphasize cultural diversity, especially that of the Mandan, Hidatsa, and Arikara tribes. Emphasis will also be on the requirement of special needs children. Offered Spring and Fall.

211 Observation and Assessment

3 CREDITS

This course is designed to acquaint the students with a variety of ways of observing, recording, and analyzing the behavior and development of children. Assessment of children will be analyzed by looking at a variety of assessment activities that can be done with children. There will be a minimum of eight hours of field experience in order to practice observation and assessment. Prerequisites: EC 210.

213 Young Children's Language and Emerging Literacy

3 CREDITS

This course investigates both typical and atypical development of language and thought in children 0-8, as a basis for understanding working with young children in educational settings, and addresses ways early childhood professionals can help young children to develop fluency, vocabulary, phonemic awareness, comprehension, language development, and emerging literacy.

220 Early Childhood Development: Pre-birth through age eight

3 CREDITS

This course is a study of human growth and development from conception to age eight and will provide students with the foundation for becoming competent early childhood professionals. Emotional, social intellectual, cultural, language and physical development norms will be addressed. The student will gain knowledge and understanding of the stages of child development and of the variation of development among children. Observations of young children are required.

222 Program Administration

3 CREDITS

This course provides information on childcare programs including record-keeping, writing policies and procedures, licensing, observing and recording children's development, budgeting issues, and staffing patterns. Interpersonal relationships will be a major focus of this course. Cultural diversity and special needs will be addressed in the course content.

233 Curriculum, Instruction and Learning Environments

3 CREDITS

This course is a study of various curriculum philosophies and needs, as well as procedures, techniques, and methods deemed appropriate for use in early education curriculum planning. Culturally relevant curriculum planned and designed for the "whole" child in the areas of physical, social, cognitive, and emotional development will be emphasized.

234 Learning and Play

3 CREDITS

This course will address theories about play development and learning as applied to young children; and environmental design that is physically, socially, intellectually, and emotionally safe and healthy.

236 Positive Child Guidance

3 CREDITS

This course explores principles of guidance and the development of self-discipline in children with emphasis on social and interpersonal behavior. Positive means to support children's social and emotional development, as well as strategies to establish productive relationships with families will be emphasized. Cultural diversity, especially as it pertains to Mandan, Hidatsa and Arikara, and special needs will be addressed in the course content.

238 Home, School, and Community

3 CREDITS

This course focuses on the responsibilities of early childhood professionals and caregivers to children, their families, and their communities. The course content will emphasize cultural diversity, especially that of the Mandan, Hidatsa, and Arikara, as well as special needs children.

290 Pre-Professional Experience

1 CREDIT

Students in this class will participate in an early field experience in early childhood setting to gain practical experience in areas such as: observing teaching; participating in small instructional groups, and other activities assigned by the cooperating teacher.

295 Practicum

2 CREDITS

This course will provide classroom orientation on what is expected of the students in their practicum; then the students will be placed with teachers/caregivers in childcare centers/classrooms serving children ages 0 to six years old. Students will spend a total of 30 hours in the centers/classrooms. Work hours will be arranged by the teacher/caregiver and the student. The instructor will bring the class together at midterm to check their progress and share experiences. The teacher/caregiver will submit oral and written reports regarding student progress to the instructor. Periodic student-instructor conferences are required to discuss progress or problems. Students will submit a log and a journal of their experiences. Offered as needed. Prerequisite: EC 290 Pre-Professional Experience

299 Special Topics**

0.5-4 CREDITS

Subjects and credits will vary.

**Course offered only as needed

EDUCATION (EDU)

199 Special Topics

0.5-4 CREDITS

Subjects and credits will vary.

210 Introduction to Exceptional Children

3 CREDITS

This orientation course surveys the identification and characteristics of exceptional children. It covers the educational responsibilities of teachers according to public law 94-142 (PL 94-142). It reviews individualized education plans and critical education problem solving approaches. Appropriate special education methods and materials will be covered. The course emphasizes cultural diversity, especially that of the Mandan, Hidatsa, and Arikara tribes.

222 Technology for Teachers

3 CREDITS

The major emphasis of the course will be the development of computer skills for classroom teachers. Topics include applications for lesson plans, technology integration in the curriculum, record keeping, graphics, the Internet, and also software and web page evaluations.

232 Classroom Management & Learning Environments

3 CREDITS

This course explores the methods and techniques to ensure an educational setting enhances learning. Management and discipline plans will be constructed and analyzed.

238 Children's Literature

3 CREDITS

This course is an introductory study of the main genres of children's literature in the first six grades. Students will analyze their personal preferences of reading for children. Prerequisite: ENG 110.

240 Preparation for Praxis I

2 CREDITS

Students taking this course will be reviewing and applying the test taking skills needed to score at or above the State of North Dakota cut scores for the Praxis I (Pre-Professional Skills Test). The course will focus on various testing formats, test taking skills, writing practice tests, mathematics practice tests, and reading practice tests.

241 Preparation for Praxis II

2 CREDITS

Students taking this course will be reviewing and applying the test taking skills needed to score at or above the State of North Dakota cut scores for the Praxis II (Principles of Teaching and Learning and Curriculum, Instruction, and Assessment Tests). The course will focus on various testing formats, test taking skills, reading practice tests, and writing responses.

250 Introduction to Education

3 CREDITS

This course introduces teaching as a profession. It includes the social, psychological, historical, and philosophical foundations of education. Students will begin to design a personal philosophy of education.

273 Physical Science for Elementary Teachers

3 CREDITS

Physical Science for elementary teachers will introduce concepts of Physics (Motion, Heat, Light, Sound, Pressure, Aerodynamics, Magnetism, and Electricity). The course covers the laws, theories, and facts of science and to teach science to grade school children. Classroom experiments, demonstrations, classroom management, appropriate assessment techniques, and collaboration methods in the science room will be addressed.

297 Middle School Field Experience

2 CREDITS

Students in this class will participate in a field experience in a middle school classroom to gain practical experience in areas such as: observing teaching and adolescent

behavior; participating in small instructional groups; correcting assignments; assisting with record-keeping; assisting with technology; and other activities assigned by the cooperating teacher. Offered Spring of even-numbered years.

298 Pre-Professional Experience

1 CREDIT

Students in this class will participate in an early field experience in elementary or secondary schools to gain practical observation experience in areas such as: observing teaching; participating in small instructional groups; correcting assignments; record-keeping; educational technology; and other activities conducted by the teacher.

299 Language and Curriculum Development

3 CREDITS

Goals for this class are: 1. Participate in a total immersion experience using the Hidatsa, Mandan, and Arikara culture and language; 2. Review culturally appropriate literature; 3. Develop constructivist teaching lessons that integrate language and culture into the curriculum. Offered as needed.

300 Elementary Practicum I

1 CREDIT

This course is designed to give students practical experience in the classroom. Students in this class will participate in an early field experience in elementary or secondary schools to gain practical experience in areas such as: observing teaching; participating in small instructional groups; correcting assignments; assisting with record-keeping; assisting with technology; and other activities assigned by the cooperating teacher.

305 Diversity & Multicultural Education

3 CREDITS

This course examines the historical development of American ethnic and cultural diversity. It will help students better understand children in culturally diverse

classrooms as well as preparing them to teach about cultural diversity.

320 Curriculum Instruction & Assessment

3 CREDITS

A general curriculum development and instruction course designed for undergraduate pre-service teachers across all disciplines. It introduces and provides practice in planning, multiple instructional strategies, and methods of formal and informal assessment.

324 Creative Arts for Elementary Teachers

3 CREDITS

This course will provide teachers with Creative Arts content knowledge as well as a variety of approaches to instruct children in the classroom. The educational success of our children depends on giving them imagination, creativity, and a sense of expression as well as academic competencies. Areas to be covered include artistic literacy, dance, music, theater, visual arts, and student assessment.

392 Foundations, Issues, and Trends

2 CREDITS

Students will study current issues and trends in education and the political and social conflicts which affect the teaching profession and progress in American education. Students will also be required to develop a personal philosophy of education and learn how an effective school philosophy can guide school as they develop their educational goals.

400 Elementary Practicum II

1 CREDIT

This course is designed to be taken concurrently with the methods courses. Students will work with children in the areas of science, math, reading, social studies, language arts, physical education, and art under the teachers' supervision.

402 Teaching Reading in the Content Area/Diagnostic Reading

3 CREDITS

This course is a study of teaching reading at the elementary and middle school levels as well as learning about current approaches to assessment and methods to assist students who are having difficulty with reading and writing. The application of reading methods and strategies in literature and content area reading for different purposes will be emphasized, as well as application of strategies and study skills, and use of a variety of performance assessments.

411 Educational Assessment & Seminar

1 CREDIT

This course will teach candidates how to assess students and how to document their progress through data collection and ePortfolio work. Candidates will also meet regularly to discuss their practical experiences in the classroom, to complete candidate disposition and self-assessments, and to strategize regarding educational issues. Students taking this course will also be reviewing and applying the test taking skills needed to score at or above the State of North Dakota cut scores for the Praxis I (Pre-Professional Skills Test). Testing formats, test taking skills, and practice tests will be examined. (Co-Req: Practicum I) (Fall – Sophomore Year).

412 Educational Assessment & Seminar

1 CREDIT

This course will teach candidates how to assess students and how to document their progress through data collection and ePortfolio work. Candidates will also meet regularly to discuss their practical experiences in the classroom, to complete candidate disposition and self-assessments, and to strategize regarding educational issues. Students taking this course will also be reviewing and applying the test taking skills needed to score at or above the State of North Dakota cut scores for the Praxis II (Principles of Teaching and Learning and Curriculum, Instruction, and Assessment Tests). (Spring or Fall Junior Year) (Co-Requisite: EDU 400 Practicum II).

417 Curricular Considerations of Nuclear STEM Application

1 CREDIT

Curricular considerations of Nuclear STEM application will go more in depth into the applications and techniques of nuclear energy. This course will explore the experiments, applications and implications of periodic table reactions, sources of natural and man-made radiation, and engineering behind nuclear science. Effective STEM classroom demonstrations, classroom management, appropriate assessment techniques, and cooperative and collaborative methods will also be discussed and demonstrated.

419 Closing the Loop: Technology, Soft Skills and Assessment in Nuclear STEM

1 CREDIT

This course will review the whole education circle in Nuclear STEM: build the curriculum, assess the curriculum, and create owners of personal learning. Build the curriculum: We will review applications and implications of Nuclear STEM (periodic table reactions, sources of natural and manmade radiation, and engineering behind Nuclear science) through hands-on experiments, activities, and digital simulations. Assess the curriculum: review techniques of formative and summative assessment that ensures that ideas are “sticking”. Create owners of their own personal learning: Soft Skills and motivation techniques will be reviewed and discussed through lectures and hands-on activities.

421 Math Methods & Materials

3 CREDITS

This course is a survey of current elementary and middle school math teaching strategies and math programs with an integration of theory and practice. Students explore how to facilitate the learning of mathematics in a constructivist environment through the use of investigations, manipulatives, technology, and holistic forms of assessment.

422 Language Arts Methods & Materials

3 CREDITS

This course includes curriculum, theory, and methodology in language arts. Students will design constructivist curriculum based upon philosophies of instruction in reading, writing, listening, speaking, and thinking.

423 Reading Methods & Materials

3 CREDITS

This course is designed to examine effective research based instructional practices used to teach reading in the elementary and middle school curriculum. Students will learn different approaches to reading and writing in the classroom, with an emphasis on constructivism, to effectively meet learners’ needs.

424 Social Studies Methods & Materials

2 CREDITS

This course is a survey of elementary and middle school social studies teaching strategies and social studies programs with an emphasis on the integration of theory and practice. It is designed to help the student to understand and analyze the different modes of teaching social studies and to gain the competencies necessary for organizing a unit in social studies. Constructivist methods will be emphasized.

426 Science Methods & Materials

3 CREDITS

This course is a survey of current elementary and middle school science teaching strategies and science programs with an emphasis on the integration of theory, practice, and constructivism. Offered Spring of odd-numbered years.

492 Student Teaching

12 CREDITS

This course provides students with the opportunity to assume the role of a classroom teacher in an educational setting under the supervision of a cooperating teacher and the Teacher Education Department. This is an

opportunity for students to create constructivist lesson plans, utilize them, and assess outcomes using the skills they have learned. (Last semester of senior year)

498 Supervision of Student Teachers**

1 CREDIT

This course prepares and trains classroom teachers to work with student teachers. It is offered to teachers who have their own classrooms who are looking to supervise and guide undergraduate student teachers. Offered as needed.

**Course offered only as needed

ENGLISH (ENG)

110 Composition I

3 CREDITS

This course introduces students to a more engaged process of writing involving three essential stages: pre-writing, drafting, and revision/final draft submission. Essential grammar and punctuation elements are also reviewed and refined. Narrative and expository writing is emphasized.

120 Composition II

3 CREDITS

This course builds on the writing process introduced in ENG 110 to support students in the successful composition of research-based essays. Students will write essays related to their academic focus/personal interest to support their college-level writing development. Advanced grammar and punctuation elements are also introduced. Persuasive writing is emphasized. Prerequisite: ENG 110

211 Introduction to Creative Writing

3 CREDITS

This course concentrates on important elements of the creative writing process. Students will investigate three

types of creative writing: short stories, poetry and drama through the use of professionally written examples. Students will then creatively write their own short stories, poems and one-act plays.

199 Special Topics

0.5-4 CREDITS

Subjects and credits will vary.

265 Native American Literature

3 CREDITS

This course allows students to survey a wide range of Native American Literature, beginning with the oral tradition of myths and legends, transitional literature to modern short stories, poetry and novels. Course work will include discussion of readings designed to teach standard genres of literature. It will focus largely on student experience and response to the literature.

299 Special Topics

0.5-4 CREDITS

Subjects and credits will vary.

452 Scientific Literature & Writing

3 CREDITS

This course is designed to prepare students to objectively read, examine, and interpret scientific research literature. Students will examine all aspects of information literacy as it applies to their field of study. Students will also learn the methodology of writing research papers for publication. Pre-requisites: MATH 210-Statistics, BIO 150-Biology I, BIO 225-Research Methods, BIO 297-Environmental Science Internship or consent of instructor. Offered Spring of odd-numbered years.

**Course offered only as needed

GEOGRAPHY (GEOG)

105 Fundamentals of GIS

3 CREDITS

Basics of GIS for acquiring/creating and visualizing data to answer geographic questions. Topics such as GIS software's, spatial coordinates, spatial data, Global Position Systems (GPS), and basic spatial analyses are emphasized through hands-on learning. Special emphasis on an introduction to applying GIS tools focusing on preserving history and culture, conserving and protecting the environment, monitoring and managing infrastructure and natural resources, studying health issues and planning how to best use ancestral lands.

150 Introduction to Geography

3 CREDITS

Major geographic themes will be studied and applied including the physical environment and regional analysis.

199 Special Topics

0.5-4 CREDITS

Subjects and credits will vary. Offered as needed.

299 Special Topics

0.5-4 CREDITS

Subjects and credits will vary. Offered as needed.

****Course offered only as needed**

GEOLOGY (GEOL)

100 Earth Science

4 CREDITS

This course is a study of the Earth, its internal and external processes, atmosphere and natural resources. Lab Fee \$25.00

199 Special Topic

0.5-4 CREDITS

Subjects and credits will vary. Offered as needed.

299 Special Topics

0.5-4 CREDITS

Subjects and credits will vary. Offered as needed.

****Course offered only as needed**

HEALTH, PHYSICAL EDUCATION, AND RECREATION (HPER)

101 Walking

1 CREDIT

This course offers instruction, practice and participation in the basic skills, body mechanics and terminology associated with walking. This course is also designed to improve the student's knowledge of healthy living and exercise practices so that they can incorporate what they learn into their lifelong journey of health and wellness.

102 Fitness I

1 CREDIT

This course offers instruction, practice and participation in the basic skills, body mechanics and terminology associated with fitness activities.

103 Archery I

1 CREDIT

This course offers instruction, practice and participation in the basic skills, body mechanics and terminology associated with archery.

104 Advanced Fitness

1 CREDIT

This course offers instruction, practice and participation in the basic skills, body mechanics and terminology associated with fitness activities at a higher-impact level.

105 Aerobics**1 CREDIT**

This course offers instruction, practice and participation in the basic skills, body mechanics and terminology associated with aerobic exercise.

106 AIHEC Prep**2 CREDITS**

Students will participate in various activities such as handgames, beading, and ribbon skirt/shirt making in preparation for the annual AIHEC Student Conference. Total commitment and a willingness to participate is required to be eligible to attend and participate at AIHEC.

115 Golf**1 CREDIT**

This course offers instruction, practice and participation in the basic skills, body mechanics and terminology associated with Golf.

150 Advanced Basketball**1 CREDIT**

This course offers instruction, practice and participation in the basic skills, body mechanics and terminology associated with basketball.

199 Special Topic**1 CREDIT**

Subjects and credits will vary.

210 First Aid/CPR**1 CREDIT**

This course will teach the student the principles of cardiopulmonary resuscitation, automatic electronic defibrillation, and first aid. This will allow the students to be able to recognize emergency situations, provide immediate first aid or choking interventions, and implement the steps of CPR until emergency personnel arrive. Lab fee: \$40.

225 Elementary Health and Physical Education Activities and Methods ☐**3 CREDITS**

This course provides information and skills to implement coordinated health education in the elementary grades. It provides support and effective instruction for Elementary physical instruction. Offered every Spring.

299 Special Topics**0.5-4 CREDITS**

Subjects and credits will vary.

****Course offered only as needed**

HISTORY (HIST)

103 United States History I**3 CREDITS**

A survey of early American history, including old world background, transformation of British institutions into American institutions, the Revolutionary War period, the establishment of the Union, and the Civil War period up until reconstruction.

104 United States History II**3 CREDITS**

This course offers a survey of the last century of American history from Reconstruction to the present.

220 North Dakota History**3 CREDITS**

The study of the history of North Dakota is to examine the peoples, the events and the landscapes of the state. The history of North Dakota will allow for more than a study of names, dates, facts and figures that relate to the 71,000 square miles of the territory on the Northern Great Plains. This course will encourage the placing of the region in historical context, the politics of immigration, historical frameworks, thematic structures, economic dependency and possible directions for the future of the

state. Emphasis on North Dakota tribes, and specifically the Nueta, Hidatsa, and Sahnish people.

199 Special Topics

0.5-4 CREDITS

Subjects and credits will vary.

299 Special Topics

0.5-4 CREDITS

Subjects and credits will vary.

****Course offered only as needed**

HUMANITIES (HUM)

255 Native American Children's Literature

3 CREDITS

This course is a study of literature which includes stories, poetry, myths and legends about Native Americans. The course will include Native American tribes in the United States.

MATHEMATICS (MA)

All students enrolling in their first NHSC math course are required to take a math placement exam during registration.

098 Statway STEM Algebra Bridge

1 CREDIT

This course is a co-requisite course for MA 209 - Statway II Statistics for students that desire to take College Algebra after the completion of Statway I & II. The course provides necessary bridge materials needed for students to be prepared to take College Algebra the following semester. Co-Req: MA209.

102 Intermediate Algebra

4 CREDITS

Introduction to sets, properties of real numbers, algebraic expressions, linear equations, quadratic equations, graphing, and use of calculators. Prerequisite: MA 101 (Grade of C or higher) or Placement. Lab Fee \$25.00

103 College Algebra

4 CREDITS

Equations and inequalities, functions and graphs, polynomial and rational functions, exponential and logarithmic functions, systems of equations. Prerequisite: MA 102 (Grade of C or higher) or Placement. Lab Fee \$25.00

104 Finite Mathematics

4 CREDITS

Functions, matrices, linear systems, linear programming, probability and statistics, mathematics of finance and logic. Prerequisite: MA 102 (Grade of C or higher) or Placement. Lab Fee \$25.00

105 Trigonometry

3 CREDITS

Functions of the general angles, solutions of trigonometric equations and triangles, graphs of the functions, inverse function, and identities. Prerequisite: MA 103 (Grade of C or higher) or Placement. Lab Fee \$25.00

107 Pre-Calculus

4 CREDITS

An introductory overview of differential and integral calculus, theory of equations, limits, series, sequences and analytic geometry. Prerequisite: MA 102 or equivalent (Grade of C or higher) or Placement. Lab Fee \$25.00

129 Basic Linear Algebra

3 CREDITS

Systems of linear equations, matrices, determinants, vector spaces, lines and planes in space, linear

transformations, eigenvalues and eigenvectors. Prereq: MATH 105 or MATH 107. Lab Fee \$25.00

165 Calculus I

4 CREDITS

Limits, continuity, differentiation, intermediate value and mean value theorem, indefinite integrals, and definite integrals. Prerequisite: MA 105/107 (Grade of C or higher) or Placement. Lab Fee \$25.00

166 Calculus II

4 CREDITS

Application of integrations, methods of integrations, sequences, and series. Prerequisite: MA 165 (Grade of C or higher). Lab Fee \$25.00

208 Discrete Mathematics

4 CREDITS

Set theory, functions, relations, graph theory, Boolean algebra, logic, induction and difference equations. Prerequisite: MA 103 (Grade of C or higher). Lab Fee \$25.00

209 Statway II Statistics

4 CREDITS

This course is the second in a two-semester sequence designed to guide students in completing the topics covered in both beginning algebra and college-level introductory statistics in one year. The two-semester sequence is useful to students whose academic program is satisfied by an introductory statistics course. Statway Statistics II covers sampling distributions, Central Limit Theorems, confidence intervals, and hypothesis testing for population proportions, population means, and means of paired differences. Chi-square tests for one- and two-way tables and ANOVA methods are also covered, as well as necessary topics from beginning algebra. The curriculum is based on student collaborative group learning. Students must have completed MA 099 in a previous semester in order to register for MA 209. Lab Fee \$25.00 (*Students desiring to take MA103 – College*

Algebra the next semester should also take Co-Req: MA100 Statway STEM Algebra Bridge)

210 Elementary Statistics

4 CREDITS

Descriptive statistics, sampling statistical methods of gathering, presenting, and analyzing data. Topics include basic concepts in measuring, scaling, binomial and normal distribution, hypothesis testing and regression. Lab Fee \$25.00

227 Applied Linear Algebra

3 CREDITS

Matrices, vectors, systems of linear equations and inequalities, mappings, determinants, and linear programming. Prerequisite: MA 165 (Grade of C or higher). Lab Fee \$25.00

265 Calculus III

4 CREDITS

Multivariate and vector calculus including partial derivatives, multiple integration and its applications, line and surface integrals, Green's Theorem and Stoke's Theorem. Prerequisite: MA 166 (Grade C or higher). Lab Fee \$25.00

266 Differential Equations

3 CREDITS

Solution of elementary differential equations by elementary techniques, Laplace transforms, systems of equations, matrix methods, numerical techniques, and applications. Prerequisite: Math 265 (Grade C or higher). Lab Fee \$25.00

277 Math for Elementary Teachers I

3 CREDITS

This course is designed to train elementary education candidates in mathematical content and learning theory. Content includes the application of arithmetic concepts and solutions of problem solving. Topics include numeration systems, number theory, operations on the whole and rational numbers. Appropriate use of

calculators, computers and manipulative usage are used in their course. Prerequisites: MA103 or higher. Lab Fee \$25.00

278 Math for Elementary Teachers II

3 CREDITS

This course will integrate the understanding of content with the understanding of how students learn mathematical concepts. Students study the application of mathematical concepts to the solution of problems. Mathematical content includes topics in geometry, measurement, modular arithmetic, algebra, statistics, and probability. Lab Fee \$25.00

NATIVE AMERICAN STUDIES (NAS)

099 Introduction to History of the Three Affiliated Tribes

1 CREDIT

This course will provide a general overview of the Mandan, Hidatsa, and Arikara tribes.
No pre-requisites.

101 Introduction to Native American Studies

3 CREDITS

This course will provide a general overview of the various tribes throughout the United States. The course will include the study of locations, language groups, cultural groups, cultural practices, and similarities and relationships of the Native Americans. Emphasis will be placed on the examination Nueta, Hidatsa, and Sahnish people.

102 MHA Spiritual Belief

3 CREDITS

This is an introductory course on the spiritual beliefs and traditional practices of the Nueta, Hidatsa and Sahnish people. Basic conceptualizations of prayer, ceremony, belonging, patterns of rebirth, death, and the afterlife will be explored with a special emphasis on Nueta, Hidatsa

and Sahnish worldview and perspective. Students will be introduced to progenitor entities and origins of rites and cultural practice. These practices under study include smudging, sweat lodge, cultural protocol, the nature of spirits, and ceremonial practice. This class will set a template for the understanding of basic protocols and the origins of historic and contemporary practice that will allow for students to later explore comparisons between spiritual belief systems.

105 Native American Art

3 CREDITS

This course will acquaint and enable the student to participate in and gain basic knowledge of Native American Artists. This will include their own Culture, Styles, Techniques and Media. From the Southwest, Eastern, West, North, Northwest Coast, and Twentieth Century Trends in Modern Native Art. Lab Fee \$50.00

113 Hidatsa I

3 CREDITS

Introduction of basic fundamentals of sound, pronunciation, vocabulary, and phraseology. The course integrates Native American culture with the language. Lab Fee \$25.00

114 Hidatsa II

3 CREDITS

Hidatsa II is a continuation of Hidatsa I with an emphasis on grammar, writing, and conservation. The course integrates Native American culture with the language. Prerequisite: NAS 113 or equivalent. Lab Fee \$25.00

115 Nueta (Mandan) I

3 CREDITS

Introduction to basic fundamentals of sound, pronunciation, vocabulary, and phraseology. The course integrates Native American culture with the language. Lab Fee \$25.00

116 Nueta (Mandan) II**3 CREDITS**

Nueta (Mandan) II is a continuation of Mandan I with an emphasis on grammar, writing and conversation. The course integrates Native American culture with the language. Prerequisite: NAS 115 or equivalent. Lab Fee \$25.00

117 Sahnish (Arikara) I**3 CREDITS**

Introduction to basic fundamentals of sound, pronunciation, vocabulary, and phraseology. The course integrates Native American culture with the language. Lab Fee \$25.00

118 Sahnish (Arikara) II**3 CREDITS**

Sahnish (Arikara) II is a continuation of Sahnish (Arikara) I with an emphasis on grammar, writing and conversation. The course integrates Native American culture with the language. Prerequisite: NAS 117 or equivalent. Lab Fee \$25.00

119 Native American Singing**3 CREDITS**

This course is designed to teach the student the fundamentals of singing at the drum. Emphasis will be placed on the songs of the Nueta, Hidatsa, and Sahnish people.

120 Native American Hand Games**3 CREDITS**

This course is designed to teach hand games and perform the games as a team. Emphasis will be placed on the associated rules and songs of the Nueta, Hidatsa, and Sahnish people. In addition, the AIHEC hand game rules will also be taught.

199 Special Topics**0.5-4 CREDITS**

Subjects and credits will vary.

201 History of the Three Affiliated Tribes**3 CREDITS**

This course will examine the origin of the Nueta, Hidatsa, and Sahnish tribes, based on oral traditions. There will be an emphasis on the Independence Era (pre-contact) to immerse and strengthen the sense of identity of the Nueta, Hidatsa, and Sahnish people. Archeology will be included as a resource.

203 Native American Philosophy**3 CREDITS**

This course will provide an introduction to the Native American philosophical thought, as expressed in selected readings and lectures. A humanistic and objective approach will be used to study various tribal philosophical beliefs with an emphasis on the philosophical beliefs of the Nueta, Hidatsa, and Sahnish people. (Course also listed in the Philosophy area)

204 Native American Health Perspectives**3 CREDITS**

This course is designed to provide the student with knowledge of health issues from the Native American point of view. There will be an overview of pre-contact wellness and traditional health systems. It will study various health concerns of Native American people. Causes of contemporary health disparities will also be discussed. Emphasis will be placed on the examination of the health issues of the Nueta, Hidatsa, and Sahnish people.

205 Native American Issues in Film**3 CREDITS**

This is a special topic tribal studies course, which focuses on the motion picture industry role in the institutionalization of stereotyping and racism of Indian people in the United States. It is a factual, rather than judgmental approach. The course will present films from the silent era to the present. Course work will concentrate on student responses and analysis to films as well as group projects to allow students to follow their

own interests in dealing with the issues of the course. Lab Fee \$30.00

206 Ethnobotany

4 CREDITS

Observation, identification and classification of native North Dakota plants with emphasis on structural, edible and medicinal uses by Tribal Nations past and present. Includes laboratory and field activities.

210 Introduction to Ethnopedology

3 CREDITS

A hybrid discipline that encompasses a worldwide view on the soil and land knowledge systems of the Mandan, Hidatsa, Sahnish populations and land classification systems; introduction to the chemical, physical, and biological properties of soils; the origin, classification and distribution of soils and their influence on people and food production management and conservation of soils; and the environmental impact of soil use.

213 Tribal Government

3 CREDITS

This course provides an analytical description of tribal governments and their legal, social, and political structure. Emphasis will be placed on the examination of the tribal government of the Three Affiliated Tribes.

221 History of Indian Education

3 CREDITS

This course will provide a historical review of the education of Native Americans prior to and during the history of the United States. Special attention will be paid to the traditional education system, assimilation policies, education legislation, boarding school experience, American education, and the tribal college movement. The historical review will increase understanding of the history and traumatic transition of tribes to an American education system. This course will support individual historical research on a selected topic. Emphasis will be placed on the history of the education systems of the Nueta, Hidatsa, and Sahnish people.

225 Traditional Gardening and Foods Lab

2 CREDITS

This lab course is designed to re-introduce participants to the traditional diet and gardening practices of the Nueta, Sahnish, and Hidatsa Peoples. Lab fee \$50.

240 Research and Writing in Native American Studies **3 CREDITS**

Research and Writing in Native American Studies explores the academic research process where students will engage in the interrogation of sources from digital media, published written sources, oral testimony, and distinguish between the tradition of legitimizing materials and information in the historical period versus contemporary strategies. The course will teach students strategies for reading academic material effectively and efficiently. This will prepare students for graduate level reading requirements. Students will also learn strategies for writing academically and the use of in-text citations and creating examples of blending sources from a broad range of academic disciplines.

298 NAS Pre-Professional Experience

1-3 CREDITS

The student will participate in a field experience in the community and related tribal programs to gain practical experience in areas such as management and administration, working with technology, language immersion experience, cultural knowledge, museum activities, tourism, and more as assigned by the instructor.

299 Special Topics

0.5-4 CREDITS

Subjects and credits will vary.

301 History of the Nueta (Mandan)

3 CREDITS

This course examines the history and culture of the Nueta from pre-contact, through contact, to the present. Through the letters, reports, writings, and journals of

early explorers, traders, merchants, and missionaries, and through the oral literature and teachings of the Nueta. The course will explore the Nueta way of life and the subsequent changes wrought by the immigrations of other peoples to Nueta territory. The Earth Lodge as a symbol of the extended family and a woman's power of ownership will be examined, as will the economically beneficial agrarian practices of the Nueta women.

302 History of the Hidatsa

3 CREDITS

This course examines the history and culture of the Hidatsa from pre-contact, through contact, to the present. Through the letters, reports, writings, and journals of early explorers, traders, merchants, and missionaries, and through the oral literature and teachings of the Hidatsa, the course will explore the Hidatsa way of life and the subsequent changes wrought by the immigrations of other peoples to Hidatsa territory. The Hidatsa *Sun Dance* and its importance to the Hidatsa culture will be explored. The Earth Lodge as a symbol of the extended family and a woman's power of ownership will be examined, as will the economically beneficial agrarian practices of the Hidatsa women.

303 History of the Sahnish (Arikara)

3 CREDITS

This course examines the history and culture of the Sahnish from pre-contact, through contact, to the present. Through the letters, reports, writings, and journals of early explorers, traders, merchants, and missionaries, and through the oral literature and teachings of the Sahnish. The course will explore the Sahnish way of life and the subsequent changes wrought by the immigration of other peoples to Sahnish territory. The Seven Societies of the Sahnish and their importance to the Sahnish culture will be explored. The Earth Lodge as a symbol of the extended family and a woman's power of ownership will be examined, as will the economically beneficial agrarian practices of the Sahnish women.

304 Native American Art History

3 CREDITS

This course will examine the major Native American art traditions and forms from pre-contact, through contact, to the present. Art designs, forms, and techniques of the Mandan, Hidatsa, and Arikara will be emphasized.

307 Native American Leadership: Past and Present

3 CREDITS

Leadership issues among Native Americans will be studied along with the exploration of traditional and contemporary concepts of leadership. Leadership styles and their impacts regarding accomplishments will be addressed. Traditional leadership included not only chiefs but also medicinal, spiritual, traditional art practitioners, and societies. Traditional and contemporary leadership roles include males and females. Emphasis will be placed on the examination of leadership among the Nueta, Hidatsa, and Sahnish people.

308 Tribal, State, and Federal Programs on Indian Reservations

3 CREDITS

Tribal governments on Indian lands generally do not have a tax base with which to govern the people. Many services to Native Americans have their roots in treaty rights. Thus education, health, and social service programs are primarily funded through scant allocations from the federal government. There are numerous agencies where governments may obtain funding through the grant process. These will be identified and discussed in this course. Emphasis will be placed on the examination of the programs of the Nueta, Hidatsa, and Sahnish people.

309 Native American Religion and Spirituality

3 CREDITS

Students in this course will analyze certain historic and present-day tribal beliefs. Foundations of Native American religions will be discussed from the perspective of the tribal-specific belief systems. Topics will include various aspects of Native American beliefs such as healing, balance, ceremony, medicine people, and the

legal protection of Native American religion. Students will explore the colonial impacts of European religions and their proselytizers on Native American spirituality. Spiritual revitalization efforts among people will also be studied. Emphasis will be placed on the examination of the religion and spirituality of the Nueta, Hidatsa, and Sahnish people.

330 Plains Native American Cultures

3 CREDITS

This course will provide an overview of the history and cultures of the Native American Plains societies of the Great Plains. It explores traditional and contemporary (Independence Era or Pre-contact through today) Plains Native American societies and cultures. It takes a look at their histories, cultures, social and political organizations, and interactions with each other. Further, it looks at cultural changes, issues facing contemporary cultures and societies, and situations on reservations today with an emphasis on the Nueta, Hidatsa, and Sahnish people.

350 Native American Languages

3 CREDITS

The course explores the connection between Native American languages and culture. This will examine Native American language revitalization methodologies and introduce students to the basics of sociolinguistics. This class will compare the difference between oral and written languages. This course will provide an overview of Native American languages with an emphasis on Nueta, Hidatsa, and Sahnish.

352 American Indian Philosophical Thought

3 CREDITS

This course will explore Native American thought from pre-contact through the present by examining oral narratives and written materials. Students will understand how Native Americans think about multiple subjects to include social, spiritual, legal, political, aesthetic, scientific, environmental, and historical matters.

379 Special Topics

1-3 CREDITS

Prerequisite: six hours of NAS courses.

Course must cover topics of special interest to NAS such as politics and tribal government, contemporary health issues, educational policies and trends, and Native culture in the U.S. and North Dakota.

385 Native American Economic Development

3 CREDITS

This course will explore the economic systems and the structure of the reservation economy to include agriculture, small business, and tribal enterprise. Emphasis will be placed on the examination of the economic systems of the Nueta, Hidatsa, and Sahnish people.

388 Native American Ecological Knowledge

3 CREDITS

An overview of the relationships between Indigenous peoples and their environments, including an exploration of cultural, historical, and contemporary aspects of Indigenous environmental philosophies; the nature, control and transmission of Native American Ecological Knowledge, and historical uses of ecological knowledge in managing the environment.

400 Indian Country Today

3 CREDITS

This course acquaints students with a myriad of contemporary issues confronting Native Americans today. Issues of tribal sovereignty, tribal politics, ethics in government, political activism, appropriation of Native religious ceremonies, Native water rights, hunting and fishing rights, jurisdictional issues, gaming, education, and contemporary Indian arts will be studied. Emphasis will be placed on the examination of contemporary issues of the Nueta, Hidatsa, and Sahnish people.

401 Evaluating Research on TAT

3 CREDITS

This course is designed for students to conduct value-based content analyses of research about the Three Affiliated Tribes. Each student will do a limited case study of the researcher, and a content analysis of the researcher's work related to the Three Affiliated Tribes. A few of the researchers to be studied include Alfred Bowers, Gilbert Wilson, Martha Warren-Beckwith, Joseph Cash. Other less known individuals will also be studied.

402 Agricultural & Natural Resource Management in Native American Comm.

3 CREDITS

This course will concentrate on agriculture practices and natural resource management of Native American communities with an emphasis on the Three Affiliated Tribes. The class will review the history of agriculture and natural resource management. The class will also examine principles and practices that positively impact environments. The disciplines of ecology, natural resource management, and conservation will be explored. Topics that can be covered include ecology and taxonomy of important organisms, tract identification, acreage calculations, leasing requirements, erosion control, USDA programs, ranching equipment, and grazing strategies.

420 Federal Indian Law and Policy

3 CREDITS

The focus of this course is the historic development of federal Indian law and related federal policies. It will address fundamental theoretical issues such as the establishment of Indian Law, historic and postcolonial policies directly affecting reservation Indians in the United States, and the critical relationship between Indian law and policy. A review will be conducted of primary documents, treaties, case law, and agencies which are the foundations of federal relationships with Indian Tribes. Emphasis will be placed on the examination of the federal laws and policies affecting the Nueta, Hidatsa, and Sahnish people.

424 Native American Oral Literature

3 CREDITS

The oral literature of Native America provides a wealth of historical, social, economic, and spiritual literary material. This course will explore the different genres of oral literature and different theoretical approaches to examining oral literature. Emphasis will be placed on the oral literature of the Nueta, Hidatsa, and Sahnish people. Offered Fall to respect the traditional storytelling period.

425 Tribal Colleges and Higher Education

3 CREDITS

This course will explore history, mission, governance, organization, finance, curriculum, and current challenges of tribal colleges. The course will also include student characteristics and student support services, responsibilities, and evaluation and assessment. This class will examine the different philosophies of tribal colleges and how each college responds to the needs of their community. This class will look at their contributions to Native education, academia, states and federal agencies. Emphasis will be placed on Nueta Hidatsa Sahnish College and the higher education of the Nueta, Hidatsa, and Sahnish people.

430 Native American Studies Internship

4 CREDITS

Prerequisite: completion of 18 hours of Native American Studies curriculum and permission of internship coordinator. Participation in a supervised work experience. Grade is based on work performance, regular reports, and on-site supervisor's evaluation.

444 Native American Environmental Issues and the Media

3 CREDITS

This course acquaints students with a myriad of environmental issues facing tribal nations today as a result of natural resource development, and with how the media presents such issues. Students will examine the impacts of oil and gas development, coal-generated power plants, hunting, fishing, and boating. By reading, viewing, and analyzing media literature, reports, and

visual materials, students will learn to use a critical approach in determining the underlying intent and value of the productions. These issues will be studied and reflected upon through a tribal worldview and perspectives. Emphasis will be placed on the examination of environmental issues of the Nueta, Hidatsa, and Sahnish people.

492 Directed Readings

1-3 CREDITS

Prerequisite: six hours of NAS courses.

Must be led by a faculty member to approve a topic area related to Native American Studies. Faculty members and students must agree on text related to topic, assessment and evaluation.

494 Independent Study

1-3 CREDITS

Prerequisite: six hours of NAS major courses and permission of instructor. Work on a topic of the student's choosing taken under the direct supervision of a faculty member. May involve directed reading and research or participation in a community-based activity. Students will be required to give a written report or research papers.

499 Senior Thesis in Native American Studies

3 CREDITS

This course is open only to majors/double majors by arrangement with the Vice-President for Native American Studies. A formal thesis is required for the course. Please contact the Native American Studies office for the rules pertaining to completion of this course.

NURSING (NURS)

100 Nurse Assistant Training

4 CREDITS

This course will provide students with the knowledge, skills, and attitudes necessary to provide basic nursing care to a variety of populations. The students will be

introduced to the clinical setting where they will learn the skills needed to care for all clients with various health care needs. The course requires 59 hours of theory that is delivered asynchronously. Students will be required to participate in 16 hours of hands-on practice in the lab setting. All hours must be completed to qualify for taking the North Dakota State Certified Nurse Assistant Exam. Lab fee: \$60.

PHYSICS (PHY)

105 Physical Science

4 CREDITS

This course provides a survey of the material world and the principles of physics, chemistry, and the earth, and space sciences. The course provides general knowledge and appreciation of achievements in modern science. Includes laboratory and field activities. Offered as needed. Lab Fee \$25.00

211 Physics

4 CREDITS

This is a beginning course for students without a calculus background. Students will demonstrate an understanding of the foundations of Classical Physics—force, energy, power, position/velocity/ acceleration, momentum, waves—and skills in interpreting graphs, critical thinking, problem-solving, and applications. Includes review of trigonometry and the metric system. Offered as needed. Prerequisite: College Algebra/Trigonometry

251 University Physics I

4 CREDITS

The calculus-based general physics course sequence for students majoring in chemistry, physics, or engineering. Topics: Newtonian mechanics and gravitation, work and energy, solids and fluids, heat and thermodynamics. The laboratory is a part of this course. A student may not receive credit for Physics 251 and also Physics 211. Prerequisite: MA 165.

252 University Physics II

4 CREDITS

The calculus-based general physics course sequence for students majoring in chemistry, physics, or engineering. Topics: vibrations and waves, electricity and magnetism, light and optics, and an introduction to modern physics. The laboratory is a part of this course. Prerequisite: PHY 251 or ENGR 201 and ENGR 202.

POLITICAL SCIENCE (POLS)

114 American Government I

3 CREDITS

An introduction to political science through the study of the American political system, including the Constitution, the political process; the structure, powers, and procedures of the Presidency; and Congress and the Judiciary.

115 American Government II

3 CREDITS

A course in the study of the structure, function, and problems of state and local government, including executive, legislative, and judicial processes; federalism and metropolitan government.

199 Special Topics

0.5-4 CREDITS

Subjects and credits will vary.

234 Basic Indian Law

3 CREDITS

This course is designed to gain understanding and knowledge of the laws governing Indian tribes across North America. A historical overview of the developing relationships, beginning with treaty making and ending with the Indian's relationship with the federal government today. Emphasis on North Dakota Tribes and the uniqueness of tribal governments.

250 Public Administration

3 CREDITS

This course examines the forms and trends of public administrative organization, including management, legislative and judicial controls of public administering. Where applicable, this course will include a provision for a student's graduation project.

299 Special Topics

0.5-4 CREDITS

Subjects and credits will vary.

****Course offered only as needed**

PRE-ENGINEERING (CE, ENGR, EE, ME)

CE 204 Surveying I/Lab

4 CREDITS

Field and office problems using surveying instruments, measurements and computations with emphasis on mathematics concepts. Prerequisite: MA 105 or 107.

ENGR 116 Intro to Engineering

3 CREDITS

This course is an introduction to the engineering profession. It provides an overview of various engineering disciplines, engineering ethics, and relevant concepts from science and mathematics. Additionally, students will develop the problem solving, computer, and study skills required for success with subsequent engineering coursework.

ENGR 117 Computer-Aided Design and Drafting (CADD) **1 CREDIT**

This course provides students with a broad introduction into two-dimensional and three-dimensional Computer-Aided Design and Drafting (CADD) and modeling with a focus on producing a 3D printable capstone project.

ENGR 201 Statics**3 CREDITS**

This course will cover scalar and vector approaches to trusses, frames and machines, internal forces, friction forces, center of gravity, centroid, and moment of inertia.

Prerequisite: MA165

ENGR 202 Dynamics**3 CREDITS**

This course will cover dynamics of particles and rigid bodies, work energy, impulse-momentum, principles of conservation of energy and momentum. Prerequisite:

ENGR 201 & MA166

ENGR 290 Manufacturing Process**3 CREDITS**

Traditional Manufacturing Processing Methods as employed in contemporary practice. Includes: properties of materials, machining, casting, forming and fabrication techniques. Several experiments will be conducted on various manufacturing processes in the laboratory.

ENGR 297 Engineering Internship**1-3 CREDITS**

This course allows the student to experience engineering in the workplace in conjunction with their program of study. The student's advisor will approve the location. Credits are earned based on the number of hours worked per semester. Prerequisite: ENGR 115 or ENGR 116

EE 206 Circuit Analysis/Lab**4 CREDITS**

Introduction to electric circuit components. Fundamental laws of circuit analysis. Steady state and transient analysis of DC and AC circuits. Electric power calculations.

Prerequisite: MA 166

ME 223 Mechanics of Materials**3 CREDITS**

Introduction to stress, strain, and their relationships; torsion of circular shafts, bending stresses, deflection of

beams, stress transformations, buckling. Prerequisite: ENGR 201.

ME 350 Thermodynamics**3 CREDITS**

Introduction and application to the laws of thermodynamics; analysis of closed and open systems; introduction to heat transfer, Carnot principle, engine power plants and refrigeration applications.

Prerequisites: ENGR 202.

PSYCHOLOGY (PSY)

100 Psychology of Student Success**1 CREDIT**

Designed to help students succeed in college, including introduction to Information Literacy, goal setting, and problem solving. Basic wellness including physical health, assertiveness, time management and communication skills will be emphasized. Students will understand student assessment and will begin developing their e-portfolios.

111 Introduction to Psychology**3 CREDITS**

Fundamentals of psychology will be presented, including the physiological and cultural basis of human behavior; theories of learning, thinking and behavior; techniques of studying human behavior.

115 Horses & Holistic Health**2 CREDITS**

Introduction to the range of horse-assisted health and wellness programs, including models and methods. Introduction to traditional native cultural perspectives on horses and healing; equine-assisted psychotherapy and learning; therapeutic riding; and relational horsemanship models will be covered. Lab fee \$25.00

199 Special Topics**0.5-4 CREDITS**

Subjects and credits will vary.

201 Dynamics of Adjustive Behavior & Mental Health**3 CREDITS**

Presents the principles of behavior adjustment. It is concerned with how socially relevant behavior is learned, what the motivating functions are, and how they operate in life. Prerequisite(s): PSY 111.

230 Educational Psychology**3 CREDITS**

Emphasizes principles of child development, learning theory, classroom management, and effective teaching through lectures, class discussion, research review groups, and field experiences Prerequisite: ED 250 and PSY 111. Offered Spring of even-numbered years.

244 Dynamics of Addiction**3 CREDITS.**

Emphasizes the history of drugs of abuse, theories and controversies about chemical dependency, and multidisciplinary approaches to treatment. Prerequisite(s): PSY 111.

250 Developmental Psychology**3 CREDITS**

This course will examine the normal physical, intellectual, emotional, and social influences on psychological development. Emphasis will be placed on the significance of childhood and Adolescence in adult development. Prerequisite: PSY 111

255 Adolescent Psychology**3 CREDITS**

An overview of theories of human development from conception through adolescence, including the physical, cognitive, language, social, and educational aspects of the individual's development. Special emphasis will be on adolescent issues and problems such as substance abuse.

261 Psychology of Adjustment (Life Span)**3 CREDITS**

This course overviews the theories of human development from conception through childhood including physical, cognitive, emotional, social and behavioral parameters, norms and atypical patterns. The principles of behavior adjustment will be presented, as well as how socially relevant behavior is learned. Motivational functions will be covered and how they operate in life. A case study is required. Prerequisite: PSY 111.

270 Abnormal Psychology**3 CREDITS**

This course studies classifications of abnormal behaviors, both past and present, in an effort to understand causes, both functional and organic, of abnormal behaviors. Current psychological models of abnormal behavior, as well as treatment methods, as well as treatment methods, will be addressed.

Prerequisite: PSY 111

285 Practicum**2 CREDITS**

The objective of the Practicum is to expose students to a variety of experiences within human service delivery systems. Students will work with local and regional human service agencies, including hospitals, in their area of interest, including participation in individual, group, and family counseling, special emphasis in addiction counseling. Lab Fee \$10.00

299 Special Topics**0.5-4 CREDITS**

Subjects and credits will vary.

**Course offered only as needed)

SOCIOLOGY (SOC)

100 E-Portfolio/Job Seeking Skills

1 CREDIT

This course will assist students with developing the skills necessary to be successful in employment. The course will include self-assessment, creation of resumes, interviewing, and job seeking skills. It will also integrate classroom study with real work experience. The work experience will increase the student's technical skills and knowledge, as well as allow classroom learning to be correlated into on-the-job practice. No pre-requisites required.

110 Introduction to Sociology

3 CREDITS

This course will delve into the nature of culture, society, and socialization. An analysis of group life and other social forces will be undertaken, such as: role, status, social stratification, and collective behavior.

115 Family Science

3 CREDITS

An introduction to family science concepts, including family life cycle, different styles of family life, and the influence of society on the family.

215 Marriage and Family

3 CREDITS

This course will explore contemporary changes in families and their structure, impacts on the choices available to family members, and constraints that often limit our choices. This approach will assist students in comprehending a better understanding of the families in which they were raised and are forming themselves. The course will look at issues on family behaviors and after the completion of the course, students will be able to make better decisions in their everyday lives.

110 Social Work Values & Ethics

3 CREDITS

This course will help students acquire the knowledge base required to identify ethical issues, the skills necessary to resolve ethical dilemmas, and the capacity to make ethical decisions when confronted with conflicting duties and choices that occur within the context of professional social work at all levels of practice.

150 Interpersonal Skills

3 CREDITS

Introduces fundamentals of communication between individuals. Explores aspects of self-expression and relationship communication. Acquaints the student with fundamental concepts relative to communication between individuals. To give insights into the dynamics of interpersonal communication. To aid in the understanding of how people present themselves to other people, and how others perceive them in return.

160 Introduction to Social Work

3 CREDITS

This course focuses on major concepts and principles of professional social work, including: the development of social welfare; the history of social work; the knowledge, skills, and value base of social work; models of social work methods; and current social work practice applications. The course also looks at the basis of knowledge from which the theories of social justice and diversity spring and lays a foundation for social workers' professional entry into both public and private arenas.

199 Special Topics

0.5-4 CREDITS

Subjects and credits will vary.

220 Domestic Violence

3 CREDITS

This course addresses concerns about violence against women, specifically domestic violence. The course will discuss historical and cultural factors, feminist origins of the domestic violence movement, dating violence,

SOCIAL WORK (SWK)

dynamics of captivity, trauma and recovery, child witnesses, offender issues, treatment, prevention and social change approaches, and non-violent men's movements.

230 Aging and Social Work

3 CREDITS

This course will help students to understand the biological, psychological, and sociocultural aspects of aging and service delivery to elders from a social work perspective. Students will examine the forces and critical issues that impact elders across the lifespan.

231 Contemporary Issues of Native American Families1 CREDIT

This course is designed as a community seminar focusing on contemporary issues. The community will be welcome to attend the sessions. The concepts of planning, teamwork, and organizing community forums will be secondary objectives.

255 Social Work Profession

3 CREDITS

This course will familiarize students with the various roles, functions, and tasks which social workers perform in a variety of settings and acquaint them with the primary skills and practices of generalist social work. Students will be introduced to social work practice as a multi-level and multi-method approach to influencing change in problem situations.

256 Social Welfare

3 CREDITS

This course provides a comprehensive introduction to the challenges, demands, opportunities, and benefits associated with the profession of social work. A special focus is placed on the field of social work and how it is inextricably linked with the amelioration of social problems at various stages of the history of American social welfare. A brief review of the early ideologies and values that have formed the basis of the American welfare are provided. This course also examines, in a

critical manner, the ideological differences between conservatives (including libertarians), liberals, and radicals, and how these have impacted programs and services.

257 Humans Development in the Social Environment3 CREDITS

Students in this foundation course are provided with an understanding of the intersection between the social environment and the healthy lifespan development of individuals, families, groups, and communities. Throughout this course, students increase their comprehension of how the environment and social context serve to mediate or intersect with the healthy development of each individual, family, group, or community. They examine the ways gender, socioeconomic status, sexual orientation, race and ethnicity, and disability impact human development. Students explore human behavior through the lens of human development, environment, and social context. Pre-Req: SWK 150, SWK 255

260 Cultural Diversity

3 CREDITS

This practice course exposes students to knowledge of racial/ethnic groups and to provide skills for effective social work intervention with each group. Theoretical and practice dimensions of social work with oppressed people are addressed in this course. Students are guided in understanding their own cultural and ethnic heritage, increasing their sensitivity to the ethnic reality of culturally diverse groups in this country, as they prepare to work with diverse populations.

268 Methods of Social Work Research

3 CREDITS

This course provides an introduction to basic research methodologies, which provide a framework and fundamental tool for ethical and competent professional social work practice. The course has practical importance in that the knowledge and skill domains of research enable social workers to be knowledgeable consumers of

social research. Further these knowledge and skill domains allow social workers to identify and select the most appropriate interventions, services and programs, to monitor their effectiveness and respond to the accountability concerns of program participants, funders and the general public. Pre-Req: SWK 255

270 Native American Children and Adolescent Mental Health and Well-Being

3 CREDITS

This course will address the cultural aspects of Native American Children and Adolescent Mental Health & Well-Being for students to gain knowledge about theories, assessment and intervention. The students will research and analyze the status of children and adolescents within the Mandan, Hidatsa and Arikara Nation to gain knowledge, skills, and values for competent social work practice. Pre-req: SWK 257

299 Special Topics

0.5-4 CREDITS

Subjects and credits will vary.

****Course offered only as needed**

SOIL SCIENCE (SOIL)

SOIL 210 Introduction to Soil Science

3 CREDITS

Physical, chemical, and biological properties of soils as related to use, conservation, and plant growth.

Lab Fee \$10.00

SOIL 221 Soil Management and Conservation

3 CREDITS

Principles and practices of soil management and conservation planning in relation to soil erosion, tillage systems, crop production, sustainability, and environmental quality. Lab Fee \$10.00

199 Special Topics

0.5-4 CREDITS

Subject and Credits will vary

energy usage and knowledge of alternatives that allow for a sustainable future.

WELDING (WELD)

151 Welding Theory I

4 CREDITS

This course introduces the process of shielded metal arc welding, gas metal arc welding, plasma cutting, flux core arc welding, and oxy-fuel cutting to the student. Safety practices that are observed in the industrial field are reviewed and safe welding practices are performed in the shop environment. Selection of welding electrodes, amperages, supplies, and materials used in industry are introduced. Offered Fall.

152 Welding Theory II

4 CREDITS

This course is a continuation of Welding Theory I which involves how electric welding components work. AC/DC currents, troubleshooting, and proper setup for different welding processes are covered. Students will gain the ability to determine what type of rod and procedure to use in order to produce cost-effective repairs and quality welds while utilizing OSHA safety standards as guidelines in the process. Offered Spring.

153 Welding Lab I

5 CREDITS

This course provides students with the skills necessary to perform cutting and brazing with the oxygen acetylene process. Students will learn to produce high quality welds using the shielded metal arc using the E60 and E70 series

welding electrodes. All safety procedures required with personal protective equipment will be incorporated. Offered Fall. Lab Fee \$750.

154 Welding Lab II

5 CREDITS

Students will perfect skills on plate steel in all positions using shielded metal arc welding, gas metal arc welding, flux core arc welding, and plasma arc cutting. Offered Spring. Lab Fee \$750.

155 Blueprint Reading for Welding

4 CREDITS

This program concentrates on the understanding and use of technical blueprints. This includes basic lines, geometric construction, orthographic projection, isometric projection, oblique projection, pictorial drawings, and structural sizes. Offered Fall.

165 Blueprint Symbols for Welding

4 CREDITS

This course is a continuation of WELD 155 and introduces the American Welding Society standardized welding symbols used on blueprints. Actual prints from industry are used during this course. Prerequisite: WELD 155. Offered Spring.

187 Types of Non-Destructive Testing

3 CREDITS

This course studies non-destructive tests such as: magnetic particle, eddy current, visual, ultrasonic, dye penetrant, and radiographic. Offered Spring.
